Student excellence

470 National Merit Scholars
595 National Hispanic Scholars
Top producer of Fulbright students – Fulbright 2019

Faculty excellence

5 Nobel laureates
5 MacArthur fellows
7 Pulitzer Prize awardees
24 American Academy of Arts and Sciences fellows
23 National Academy of Sciences members
37 John Simon Guggenheim Memorial Foundation fellows
143 National Endowment for the Humanities fellows
250 Fulbright American Scholars

Academic excellence

No. 1 in Innovation in the U.S. (2016–2021)
– U.S. News & World Report

No. 1 in the U.S. and No. 5 in the world for advancing the United Nations’ Sustainable Development Goals – Times Higher Education

Top 10 in the world for programs in environmental science and engineering, public administration and management
– Shanghai Ranking, Global Ranking of Academic Subjects 2020

Research excellence

NSF HERD Rankings 2018:
No. 1 in anthropology research expenditures
No. 1 in geological and earth sciences research expenditures
No. 2 in transdisciplinary science research expenditures
No. 4 in social sciences research expenditures
No. 5 in humanities research expenditures

Top 12 of all universities worldwide for U.S. patents awarded
– Intellectual Property Owners Association 2019
Arizona State University is one of the fastest growing research enterprises in the U.S.

**Economic impact**

W. P. Carey School of Business

Wyatt Brooks
PhD University of Minnesota
Brooks is an associate professor in the Department of Economics. He joined ASU from the University of Notre Dame, where he was an assistant professor and the Joe and Deborah Loughrey Collegiate Chair in Economics and Human Development. Brooks received his doctorate in economics from the University of Minnesota, and his research focuses on development, international trade and macroeconomics.

Paul Décaire
PhD University of Pennsylvania
Décaire is an assistant professor in the Department of Finance. He joins ASU after earning his doctoral degree in finance at the University of Pennsylvania, where he was awarded the Mack Institute for Innovation Management Fellowship and earned The Wharton School’s Dean’s Fellowship for Distinguished Merit. His research examines empirical corporate finance, corporate investment, capital budgeting and learning.

Christian Kim
PhD University of Michigan
Kim is an associate professor in the Department of Marketing, joining W. P. Carey from the other Carey School of Business at Johns Hopkins, where he was an associate professor. Kim earned his doctorate in marketing from the University of Michigan. He researches economic mobility, well-being, materialism, self-control and sales promotion and has been recognized with a Marketing Science Institute Research Award.
Alexis Villacis  
PhD Virginia Polytechnic Institute and State University  
Villacis is an assistant professor at the Morrison School of Agribusiness. He joined ASU from Virginia Tech, where he received his doctorate in agricultural and applied economics. Villacis previously worked for the Department of Agriculture of Ecuador and taught classes at University Espiritu Santo in Ecuador. His research interests include agricultural production economics and international agricultural development.

Nicholas Vreugdenhil  
PhD Northwestern University  
Vreugdenhil is an assistant professor in the Department of Economics. He joined ASU from Northwestern University, where he received his doctorate in economics and was awarded with a dissertation fellowship. Vreugdenhil's research interests include industrial organization and energy and environmental economics.

Heng Zhang  
PhD University of Southern California  
Zhang is an assistant professor in the Department of Supply Chain Management, which he joins after graduating from the University of Southern California with a doctorate in operations management. Zhang also did a stint as a research scientist at Amazon. His research interests intersect data science and operations.
Herberger Institute for Design and the Arts

Erin Barra
BM Berklee College of Music
An authoritative voice in music, technology and education, Barra is an assistant professor and the director of popular music in the School of Music, Dance and Theatre at ASU, executive director of Beats By Girlz, course developer for Berklee Online and former associate professor at the Berklee College of Music in Boston. Specializing in composition, production, performance and creative music technology application, she has worked with and represented companies such as Ableton, ROLI, MusicTech, Moog and iZotope. She has presented at Loop, NAMM, SXSW, Moogfest, Gearfest, KIEM, Future of Music Coalition, Yale’s EXPOL and Re-Mixed Media Festival.

Michael Compitello
DMA Yale School of Music
Compitello is a dynamic percussionist active as a chamber musician, soloist and teaching artist. With cellist Hannah Collins as New Morse Code, Compitello has created a singular and impactful repertoire through long-term collaboration with some of America’s most esteemed composers. Currently, his Unsnared Drum project seeks to reinvent the much-maligned instrument through collaboration with four of America’s most dynamic women composers. In addition to his work as an assistant professor in the School of Music, Dance and Theatre at ASU, Compitello is assistant director of Avaloch Farm Music Institute.

Jamal Duncan
DMA Michigan State University
Duncan is an assistant professor of instrumental conducting in the School of Music, Dance and Theatre where he conducts the Wind Symphony and teaches courses in instrumental conducting. An advocate of new music, Duncan is actively involved in the commissioning and performance of new works on the cutting edge of contemporary concert band and chamber music.
Rachel Finley  
**MFA Florida Atlantic University**  
A Miami-based actor, director, spoken word artist and educator, Finley joins ASU as an assistant professor of acting in the School of Music, Dance and Theatre. Finley’s acting and directing experience includes both stage and camera work. She was a founding member of South Florida’s Alliance Theatre Lab and the poetry performance troupe, Chaos Theory. Finley’s research interests focus on a decolonized approach to actor training and dialect work.

Robert Farid Karimi  
**MFA University of Southern California**  
Karimi is an assistant professor in the School of Music, Dance and Theatre. A critically acclaimed performer, author and social engagement artist, Karimi designs interactive immersive game-performance experiences to spark players to imagine worlds of mutual community nourishment. A Creative Capital artist, Pushcart Prize-nominated writer, National Poetry Slam Champion, their work is published in various platforms worldwide. Their research focuses on the power of play and playfulness in socially engaged art and the role of cultural collision in shaping the nonbinary imaginary.

Shawn Lawson  
**MFA The School of the Art Institute of Chicago**  
Lawson is an associate professor and animation area coordinator in the School of Art. His artistic practice focuses on creating the computational sublime. Lawson has performed or exhibited, around the globe, live-coding, machine learning and real-time computer graphics. He has received grants from NYSCA and the Experimental Television Center and has been in residence at CultureHub and Signal Culture.

Felipe Mesa  
**MBArch Polytechnic University of Catalonia (Spain)**  
Mesa is an assistant professor in The Design School. Prior to ASU, he was with Universidad Pontificia Bolivariana in Columbia, where he developed a design-build studio focused on designing and constructing wooden projects in partnership with municipal leaders from rural underserved areas. Mesa understands the architectural project as a provisional pact, a permeable configuration, and a positive expression of the eco-social constraints surrounding us. He is a founding member and principal in the design practice PLAN: B Architects.
Galina Mihaleva  
PhD National Academy of Art (Bulgaria)  
Mihaleva is an associate professor in fashion design in the School of Art. Her research on the development of smart clothing is interdisciplinary and collaborative, integrating technology, media art, textile design, live performance, humanities and biodesign. She is a recipient of the Accelerating Creativity and Excellence Awards Grant: “Merging the lines between fashion, material science and engineering.”

Fernanda Aoki Navarro  
PhD University of California, San Diego  
An assistant professor in the School of Music, Dance and Theatre, Navarro is a composer of acoustic and electroacoustic music, developing intermedia works, performance art and installations. She is interested in sound, in the relationship between the corporeality of the performers and the physicality of their instruments, in the exploration between music and language and in the transformational power that experimental music can exert on issues related to feminism and social otherness.

Katie Parker  
MFA The Ohio State University  
Parker is an associate professor and assistant director in the School of Art. In 2008, she co-founded Future Retrieval, mining archives and museums to digitally collect and make objects that re-examine the history of decorative arts. Future Retrieval has received Smithsonian Artist Research Fellowships (NY/DC), Iaspis Art Grants (Sweden), Lloyd Library Research Fellowships (OH) and residencies at Dresdner Porzellan (Germany).

Maura Reilly  
PhD New York University  
Reilly is associate professor of art history and museum studies in the School of Art. She is the founding curator of the Sackler Center for Feminist Art at the Brooklyn Museum, where she organized major exhibitions like Global Feminisms and Judy Chicago’s The Dinner Party. Reilly is the author of several books — most recently “Curatorial Activism: Towards an Ethics of Curating” (Thames & Hudson, 2018). Her next book, “Museum Reckoning,” examines the many ethical concerns museums currently face worldwide.
Nicholas Shea  
**PhD The Ohio State University**  
Shea is an assistant professor of music theory in the School of Music, Dance and Theatre. He received his doctorate at The Ohio State University. He primarily studies how musicians from various training and backgrounds conceptualize and execute the various components of musical structure, using techniques such as motion capture, corpus studies and theoretical analysis.

Dongwoo (Jason) Yeom  
**PhD Ajou University (South Korea)**  
Yeom is an assistant professor of architecture in the Design School. He has a strong interest in human-building integration, high-performance building and sustainable building design. He conducted his postdoctoral research at California State Polytechnic University, Pomona and the University of Southern California. Prior to joining ASU, he was an assistant professor of architecture at Lawrence Technological University in Michigan.
Mayra Artiles Fonseca
PhD Virginia Polytechnic Institute and State University

Artiles Fonseca is an assistant professor in engineering at the Polytechnic School. Her research expertise includes engineering doctoral education structure, experiences of underrepresented minorities in doctoral engineering programs, and doctoral student motivation and persistence. Prior to transitioning into engineering education, Artiles worked at the Ford Motor Company as an electrified vehicle thermal engineer.

Geunyeong Byeon
PhD University of Michigan

Byeon is an assistant professor in the School of Computing, Informatics, and Decision Systems Engineering. She studies operations research, with a focus on computational aspects of large-scale optimization as well as its application to challenging engineering problems arising in electric power systems. She was awarded the Michigan Institute for Computational Discovery and Engineering fellowship and honorable mention for the Richard and Eleanor Towner Prize for Outstanding PhD Research.

Jedidiah Crandall
PhD University of California, Davis

Crandall is an associate professor in the School of Computing, Informatics, and Decision Systems Engineering. He measures censorship, surveillance and other threats to internet freedom, especially those that affect at-risk populations, such as journalists and activists, when the network itself is malicious. His honors and awards include a 2009 National Science Foundation CAREER award and the 2015 Senior Faculty Research Excellence Award from The University of New Mexico School of Engineering.
Sergio Garcia-Segura
PhD University of Barcelona (Spain)
Garcia-Segura is an assistant professor in the School of Sustainable Engineering and the Built Environment. He works on sustainable management within the water-energy nexus from fundamental and applied science perspectives. He seeks energy sustainable and off-grid approaches using nano-enabled, photo-assisted and electrochemically driven catalytic processes for solving environmental challenges. His work on the field of applied electrochemistry has been published in more than 90 articles.

Yoon Hwa
PhD Seoul National University (South Korea)
Hwa is an assistant professor in the School of Electrical, Computer and Energy Engineering. His research is shaped by the emerging trend toward advanced manufacturing processes that focus on the question of how best to synthesize functional materials or to construct rationally designed device architectures for energy storage and conversion systems so that affordable energy can be given to society.
Mohammadreza Imani  
PhD University of Michigan, Ann Arbor  
Imani is an assistant professor at the School of Electrical, Computer and Energy Engineering. His research interests are in the broad area of applied electromagnetics, with a focus on the co-design of hardware and software. He uses metamaterial design concepts as a blueprint for finding sometimes unconventional solutions to common problems in sensing, imaging, wireless communication and wireless power transfer.

Ashif Sikandar Iquebal  
PhD Texas A&M University  
Iquebal is an assistant professor in the School of Computing, Informatics, and Decision Systems Engineering. His research focuses on methodological foundations in data science along with innovations in advanced manufacturing technologies to address key challenges associated with realizing autonomy in smart manufacturing. His research papers were recognized as winners or finalists for five best student paper and poster awards at the Institute for Operations Research and the Management Sciences and the Institute of Industrial and Systems Engineers annual conferences.

Kailong Jin  
PhD Northwestern University  
Jin is an assistant professor of chemical engineering in the School for Engineering of Matter, Transport and Energy. He seeks to design, synthesize and engineer polymeric materials that can address technological issues in energy, the environment and sustainability. His current research thrusts include 3D printing polymer nanocomposites, nanostructured polymer films, nanoporous polymers and sustainable polymers for improved chemical circularity.

Nicolò Michelusi  
PhD University of Padova (Italy)  
Michelusi is an assistant professor in the School of Electrical, Computer and Energy Engineering. He is a senior member of the Institute of Electrical and Electronics Engineers and serves as associate editor for IEEE Transactions on Wireless Communications. His research focuses on the design and analysis of distributed wirelessly connected systems using methods from stochastic optimization and machine learning.
Duong Nguyen  
**PhD University of British Columbia (Canada)**  
Nguyen is an assistant professor in the School of Electrical, Computer and Energy Engineering. His research lies at the intersection of operations research, economics and engineering, with a focus on developing mathematical models for decision-making and economic analysis of large-scale networked systems such as cloud and edge computing and smart grids. He’s a recipient of the Vanier Canada Graduate Scholarship.

Gokul Pathikonda  
**PhD University of Illinois, Urbana-Champaign**  
Pathikonda is an assistant professor in School for Engineering of Matter, Transport and Energy. He works on fluid mechanical problems related to aerospace, atmospheric and chemical industrial applications. His expertise is in application of laser-based nonintrusive diagnostics to optimally investigate fundamental turbulent phenomena. He was previously a researcher at Georgia Institute of Technology, University of Notre Dame and University of Illinois, Urbana-Champaign.

Ni Trieu  
**PhD Oregon State University**  
Trieu is an assistant professor in School of Computing, Informatics, and Decision Systems Engineering and the Biodesign Institute. Her research interests are in cryptography and security, with a specific focus on secure computation and its applications such as online advertising, secure machine learning and privacy-preserving bio-computing. Before joining ASU, she was a postdoctoral fellow at the University of California, Berkeley.

Dina Verdín  
**PhD Purdue University**  
Verdín is an assistant professor in the Polytechnic School's engineering education systems and design program. Her research focuses on broadening participation in engineering by examining underrepresented students’ access to the field and the factors that promote and inhibit persistence in engineering. She is interested in developing pedagogical practices to leverage minoritized students’ funds of knowledge in the engineering classroom.
Zhe Xu
PhD Rensselaer Polytechnic Institute
Xu is an assistant professor in the School for Engineering of Matter, Transport and Energy. Before joining ASU, he was a postdoctoral fellow at The Oden Institute for Computational Engineering and Sciences at the University of Texas at Austin. He obtained a doctorate from the Department of Electrical, Computer, and Systems Engineering at Rensselaer Polytechnic Institute in 2018.

Sui Yang
PhD University of California, Berkeley
Yang is an assistant professor in the School for Engineering of Matter, Transport and Energy. His research centers on materials and optics, with a focus on artificial quantum and meta-materials as well as light-matter interactions at extreme aspects and quantum level. He has received Microsystems and Nanoeengineering Young Scientist Award and Elsevier Reaxys PhD Prize.
College of Global Futures

Melissa Nelson
PhD University of California, Davis
Nelson (Anishinaabe/Métis) is a professor of Indigenous sustainability in the School of Sustainability. She served as a professor of American Indian Studies at San Francisco State University for 18 years. She is an ecologist and interdisciplinary scholar focused on Indigenous environmental studies, traditional ecological knowledge and food sovereignty. She is the editor and co-editor of two books focused on Indigenous practices for environmental sustainability.

Kathleen Vogel
PhD Princeton University
Vogel is a professor and the deputy director in the School for the Future of Innovation in Society. Vogel's overall research interests relate the study of knowledge production on security and intelligence problems. She was previously an associate professor in the School of Public Policy at the University of Maryland.
Thunderbird School of Global Management

**Douglas Guthrie**
PhD University of California, Berkeley

Guthrie is professor of global leadership and executive director of Thunderbird Global. From 2014 to 2019, Guthrie was a senior director at Apple, based in Shanghai China. Prior to joining Apple, Guthrie was dean of The George Washington University School of Business, vice president for University China Operations and professor of management and international business. Guthrie has held faculty positions at New York, Columbia, Harvard, Stanford and Emory universities. He is passionate about business education, leadership development and the economic reforms in China.

**Landry Signé**
PhD University of Montreal (Canada)

Signé is a world-renowned professor and leading practitioner who has won more than 60 prestigious awards and distinctions from four continents for his academic, policy, business and leadership accomplishments. He is a senior director at ASU Thunderbird, where he leads the Fourth Industrial Revolution and Globalization 4.0 Initiative and is also faculty head of the Washington, DC-based Executive Master of Global Affairs and Management. He is also a senior fellow at the Brookings Institution, a distinguished fellow at Stanford University and was named a World Economic Forum Young Global Leader for “finding innovative solutions to some of the world’s most pressing issues.”
College of Health Solutions

Cady Berkel
PhD University of Georgia
Berkel, an associate professor of integrated behavioral health, comes to the College of Health Solutions from the ASU Department of Psychology where she was an associate research professor. Her research addresses health disparities through the dissemination and implementation of family-focused, evidence-based programs in health care settings embedded in systems families regularly use. Her doctorate in child and family development and an interdisciplinary graduate certificate in qualitative research are from the University of Georgia.

Raminta Daniulaityte
PhD University of Alabama
Daniulaityte is an associate professor of population health. Her research examines social and behavioral factors affecting the health of people who use illicit drugs. Before joining ASU, she was an associate professor and associate director of the Center for Interventions, Treatment and Addictions Research in the Department of Population and Public Health Sciences at the Boonshoft School of Medicine at Wright State University.

Allison Ross
PhD Arizona State University
Ross is an assistant professor of exercise and nutritional sciences. She studies how physical activity in the form of active transportation, play and sport contributes to individual and community health within schools and neighborhoods with a focus on expanding opportunities for youth and promoting a culture of health in schools. She holds a doctorate in community development from ASU’s School of Community Resources and Development in the Watts College of Public Service and Community Solutions.
Shu Wang
PhD Tufts University
Wang is a professor of nutrition and holds a doctorate in nutritional biochemistry and metabolism. She joins ASU from Texas Tech University where she created biocompatible and biodegradable nanocarriers that enhance the delivery of nutrients and phytochemicals to the body as a way to prevent and treat chronic diseases, especially cardiovascular disease, obesity and Type 2 diabetes. Patents are pending on two of these nanocarriers.

Xing (Sherry) Zhang
PhD Cornell University
Zhang is an assistant professor of population health and is a public policy demographer. Drawing on multiple perspectives and quantitative methods from sociology, public policy, demography and population health, her research examines the role of the parent-child relationship in shaping health from adolescence to adulthood and how this varies across race, ethnicity, gender and socioeconomic status.
College of Integrative Sciences and Arts

Kathryn Lambrecht
PhD University of Nevada, Reno
Lambrecht is an assistant professor of technical communication. Her research draws on rhetoric, corpus linguistics, technical communication and data visualization to strengthen communication between experts and public audiences, particularly in STEM fields. Her interdisciplinary focus has led her to work with the National Weather Service, public health, engineering communication, identity studies and Writing in the Disciplines.

Michael Madson
PhD University of Minnesota
Madson is an assistant professor of technical communication who specializes in health and medicine. Currently, he is editing two collections on teaching writing in the health professions. He is also researching the litigation history of the U.S. opioid crisis, public perceptions of cannabis and hospital wayfinding.

Rafael Martínez-Orozco
PhD The University of New Mexico
Martínez is an assistant professor of Southwest Borderlands. His work focuses on immigration, migration, the U.S.-Mexico Borderlands and the American Southwest. At ASU, he teaches courses on the American Southwest, pop culture issues and the U.S.-Mexico Borderlands. Martínez is part of the inaugural Interdisciplinary Solutions for Social Impact Graduate Faculty program.
New College of Interdisciplinary Arts and Sciences

Malay Firoz
PhD Brown University
Firoz is an assistant professor of anthropology in the School of Social and Behavioral Sciences. His research focuses on the politics of resilience-based approaches to humanitarian aid for Syrian refugees in Jordan and Lebanon and is located at the intersections of the anthropology of humanitarianism, the anthropology of ethics, forced migration studies and Middle East studies.

Nicole Lee
PhD Texas Tech University
Lee is an assistant professor in the School of Social and Behavioral Sciences. Her research examines the intersection of science communication, public relations and digital media.

Maxwell Leung
PhD Duke University
Leung is an assistant professor in the School of Mathematical and Natural Sciences. He teaches in the pharmacology and toxicology bachelor’s degree and biological data science master’s degree programs. He is a systems biologist and toxicologist and his research areas include contaminant exposure in cannabis use, computational modeling of male reproductive defects and molecular evolution of hemp’s resistance to nematodes.
Vernon Morris  
PhD Georgia Institute of Technology  
Morris is a professor and the director of the School of Mathematical and Natural Sciences. He has led 11 transatlantic research cruises that study the influence of dust emitted from the Saharan Desert on the global atmosphere. Morris’ research focuses on the chemical evolution of atmospheric particulate in the lower troposphere and its implications to aerobiology, climate and cloud processes.

Derek Powell  
PhD University of California, Los Angeles  
Powell is an assistant professor in the School of Social and Behavioral Sciences. His research focuses on higher-order cognitive processes, such as belief revision and reasoning about complex real-world domains. He studies these issues with behavioral data science methods, including behavioral studies, analyses of large naturalistic datasets and computational cognitive modeling.

Nicholas Proferes  
PhD University of Wisconsin-Milwaukee  
Proferes is an assistant professor in the School of Social and Behavioral Sciences. His research focuses on users’ understandings of socio-technical systems, societal discourse about technology and issues of power and ethics in the digital landscape.

Tricia Redeker Hepner  
PhD Michigan State University  
Redeker Hepner is an associate professor in the School of Social and Behavioral Sciences. She is a political and legal anthropologist with a regional focus on Northeast Africa and the Great Lakes Region of Eastern Africa, and thematic interests in migration and displacement, transnationalism, human rights, transitional justice, militarism and conflict and peace.
María José Sanín Pérez  
PhD Universidad Nacional de Colombia (Colombia)  
Sanín Pérez will join as an assistant professor at the School of Mathematical and Natural Sciences. Her research focuses on biogeography, population genomics and population ecology, reproductive biology and conservation of plants of South America. She has a particular interest in the joint evolution of mountains and plant diversity in the Andes.

Yue Wang  
PhD The University of North Carolina at Chapel Hill  
Wang is an assistant professor in the School of Mathematical and Natural Sciences. Previously, he was a senior fellow at the University of Washington. Wang’s research focuses on developing novel statistical and machine learning methods for massive biological data to address cutting-edge biological, clinical and public health related problems.
Ilan Wurman
JD Stanford Law School
Wurman joins ASU as an associate professor of law. He teaches and writes in the areas of administrative law and constitutional law. He recently published a book on constitutional originalism and will soon publish a book on the 14th Amendment. He served previously as a visiting assistant professor at ASU. Prior to ASU, Wurman practiced at a large law firm and clerked for Judge Jerry Smith of the United States Court of Appeals for the Fifth Circuit.
The College of Liberal Arts and Sciences

**Gabriel Acevedo**  
PhD The Pennsylvania State University  
Acevedo is an assistant professor in the Department of English. With identities as a Latinx, bilingual and queer educator informing his research, Acevedo has interdisciplinary interests in teacher education, bilingualism, queer studies, pop culture, multimodal literacies and masculinity studies, among others. He seeks to bring tools into the classroom that expand on much-needed conversations about class, gender, sexuality and teaching practices.

**Laura Ackerman**  
PhD University of Rochester  
Ackerman is an assistant professor in the School of Molecular Sciences. Her current work focuses on lowering the environmental impact of a synthesis by developing green catalytic methods reliant on abundant feedstocks. Throughout her career, she was fortunate to serve as a teacher and mentor in many outreach programs, including for the PUEO program at Punahou School, the chemistry mentorship program at The Claremont Colleges, and the Horizons program at the University of Rochester. She was born and raised in Honolulu, Hawai‘i.

**Britta Ager**  
PhD University of Michigan  
Ager is an assistant professor in the School of International Letters and Cultures. Her research focuses on Greco-Roman magic and religion, Roman agriculture and environmental studies, Latin farming literature and sensory studies.
Leslie Alexander
PhD Cornell University
Alexander specializes in early African American and African Diaspora history, particularly late 18th- and early 19th-century Black culture, political consciousness and resistance movements. Her forthcoming book, “Fear of a Black Republic,” explores how Haitian independence influenced the rise of Black internationalism in the U.S. She has received several prestigious teaching awards and fellowships including the Ford Foundation Senior Fellowship. She is an associate professor in the School of Historical, Philosophical and Religious Studies and the School of Social Transformation.

Nicole Anderson
PhD The University of Sydney (Australia)
Anderson is a professor of English and director of the Institute for Humanities Research at ASU. She was previously head of the Department of Media, Music, Communications and Cultural Studies at Macquarie University in Australia. Co-founder and chief editor of the journal Derrida Today, her research interests span the fields of cultural theory and practice, animal studies, biopolitics, and poststructuralism. Her forthcoming book, “Bio/Culture” (Routledge), explores technology, science, art and culture.

Naneh Apkarian
PhD University of California, San Diego and San Diego State University
Apkarian is an assistant professor in the School of Mathematical and Statistical Sciences. She studies the introductory postsecondary STEM educational experience, including the development and implementation of research-based strategies for instruction and support. She has been involved in several National Science Foundation-funded projects, including as senior personnel in the Progress through Calculus project.

Curtis Austin
PhD Mississippi State University
Austin is an associate professor in the School of Historical, Philosophical and Religious Studies. He studies African American history with a focus on the civil rights and Black Power movements. Named a Choice Outstanding Academic Title, his first book, “Up Against the Wall,” examines the history of the Black Panther Party. Austin recently completed a second book titled “Dare to Struggle: A History of the Black Power Movement.” He is currently writing “Dare to Win: A History of the San Francisco 8.”
2020–2021 New Faculty Members

Timothy Balmer
PhD Georgia State University
Balmer is an assistant professor in the School of Life Sciences. A 2017 Emerging Research Grants scientist, Balmer received the Les Paul Foundation Award for Tinnitus Research. Tinnitus, a perception of ringing in the ears, affects approximately 15% of the population. Balmer's research aims to understand the nerve cells in the auditory system that may be involved in persistent cellular activity that may lead to the false perception of a sound.

Jennifer Bondy
PhD Miami University
Bondy is an associate professor in the School of Social Transformation. Her research focuses on Latina youth citizenship formations, the school socialization of children of immigrants, and the intersections of teacher education and variations in documentation status.

Katrina Bossert
PhD University of Colorado, Boulder
Bossert is an assistant professor in the School of Earth and Space Exploration and space physicist who studies dynamics and processes in the near-Earth space region and interactions between the lower atmosphere and thermosphere, a region of the ionosphere. She uses optical remote sensing instruments to study these dynamics. Her current projects investigate turbulence in the spacecraft reentry region (roughly 80 to 100 kilometers) and terrestrial weather influences on space weather.

Katherine Bynum
PhD Texas Christian University
Bynum is an assistant professor of history in the School of Historical, Philosophical and Religious Studies. Her research focuses on the Black and Brown freedom struggles, the carceral state and oral history. Her book project examines how police violence prompted African American and Mexican American civil rights activists to form broad-scale coalitions in their shared struggle for police accountability.
Changbin Chen  
PhD East China Normal University (China)  
Chen is an associate professor in the School of Life Sciences. A plant biologist, his research focuses on understanding the mechanisms of DNA break repair, homologous recombination, genome organization and evolution. Chen also develops novel vegetable varieties for short-season locations and space farming. He comes to ASU from University of Minnesota, where he was an associate professor.

Katelyn Cooper  
PhD Arizona State University  
Cooper is an assistant professor in the School of Life Sciences. Her research explores questions of equity and access in undergraduate biology education. Specifically, the Cooper lab examines how to make biology learning environments like active learning classrooms and undergraduate research experiences more inclusive for students with different identities, such as LGBTQ+ students and students with disabilities, and students with anxiety and depression.

Cassandra Cotton  
PhD McGill University (Canada)  
Cotton is an assistant professor in the T. Denny Sanford School of Social and Family Dynamics. She is a sociologist and family demographer whose research explores women’s migration, changes in kinship roles and networks, and child well-being in sub-Saharan Africa. Her current projects examine women’s decisions about childrearing in the context of internal migration into informal settlements in Kenya.

Donatella Danielli  
PhD Purdue University  
Danielli is a professor and the incoming director of the School of Mathematical and Statistical Sciences. She studies partial differential equations, calculus of variations and geometric measure theory. Danielli was named a fellow of the American Mathematical Society in 2017 and was inducted into the 2020 Class of Fellows of the Association for Women in Mathematics. Her appointment begins Jan. 1, 2021.
Marcello Di Bello  
**PhD Stanford University**  
Di Bello is an assistant professor in the School of Historical, Philosophical and Religious Studies. His research examines how reliance on statistics, probability and quantitative methods pose challenges and opportunities to the criminal justice system. Di Bello is interested in topics at the intersection of philosophy of law and epistemology, such as evidence and probability, statistics in the law, risk and decision-making, and algorithmic fairness. He was a fellow of the Institute for Advanced Study in Princeton during the academic year 2016–2017. Before joining ASU, Di Bello taught at Lehman College of The City University of New York. He enjoys the outdoors.

Mary Donovan  
**PhD University of Hawai’i at Mānoa**  
Donovan is an assistant professor in the School of Geographical Sciences and Urban Planning and the Center for Global Discovery and Conservation Science. Donovan is a quantitative spatial ecologist focused on applied questions that inform conservation and management of coupled human-natural systems. Her research includes studies on ecological dynamics, local and global impacts on coral reefs, marine spatial planning, fisheries and ecological resilience.

Caitlin Drummond  
**PhD Carnegie Mellon University**  
Drummond examines how individuals understand and use scientific evidence when forming judgments and making decisions about climate change, sustainability and the environment. Her work explores the cognitive, social and motivational processes involved in evaluating scientific evidence to improve decision-making in environmental and sustainability contexts. She is an assistant professor in the School of Human Evolution and Social Change.

Esther Florsheim  
**PhD University of Sao Paulo (Brazil)**  
Florsheim is an assistant professor in the School of Life Sciences. Specializing in allergies and the immune system, her research focuses on deciphering the causes of allergic immune reactions, including how immune and neuronal defenses can affect behavior in the context of allergies. She received several awards, including the Best Presentation Award at the 2nd Annual Yale Postdoc Symposium and the NEIC AAI Young Investigator Award.
Lauren Friedman  
PhD University of Central Florida  
Friedman is an assistant professor in the Department of Psychology. Her research aims to understand the etiology of childhood ADHD to inform interventions for the disorder. She examines the cognitive processes contributing to core symptoms and functional deficits associated with ADHD through experimental and meta-analytic techniques. She uses this knowledge to optimize behavioral interventions using novel treatment adaptations and approaches.

Lisa Han  
PhD University of California, Santa Barbara  
Han is an assistant professor of film and media studies in the Department of English. Her research interests include new media, environmental media and critical infrastructure studies. Her dissertation, “Deepwater Feeds: Mediation and Extraction at the Seafloor,” examined the material and semiotic remaking of the seafloor. Han has also published on fetal ultrasound, abortion media and internet freedom.

Ke Hu  
PhD University of Pennsylvania  
Hu is a professor in the School of Life Sciences. Her research focuses on understanding fundamental processes in cell biology, especially cellular construction, counting, movement and force-generation. By combining imaging, molecular genetics, and evolution-based approaches, she aims to determine how key molecules and structures drive these processes, how they evolve, and how this distinct evolution contributes to cellular physiology. Hu is a member of the American Society for Cell Biology and received two Whitman Center Fellowships at the Marine Biological Laboratory, Woods Hole, Massachusetts.

Huê-Tâm Jamme  
PhD University of Southern California  
An assistant professor in the School of Geographical Sciences and Urban Planning, Jamme explores issues of equitable access to opportunities from a global comparative perspective. Her research interests include urban theory, socio-spatial justice, mobilities, public space, transit-oriented development and affordable housing.
2020–2021 New Faculty Members

Zilin Jiang
PhD Carnegie Mellon University
Jiang is an assistant professor in the School of Mathematical and Statistical Sciences and the School of Computing, Informatics and Decision Systems Engineering in the Ira A. Fulton Schools of Engineering. He studies discrete geometry, graph theory and probabilistic combinatorics. His appointment begins Jan. 1, 2021.

José Kaire
PhD University of Minnesota
Kaire is an assistant professor in the School of Politics and Global Studies. He studies comparative politics and international relations. His research focuses on government repression and public support for human rights worldwide. His current projects examine the sources of political violence in non-democracies and how the international community can hold dictatorships accountable.

Lucas Klein
PhD Yale University
Klein is an associate professor in the School of International Letters and Cultures. He is a father, writer and translator. He is executive editor of the “Hsu-Tang Library of Classical Chinese Literature” (Oxford), author of “The Organization of Distance” (Brill, 2018), co-editor of “Chinese Poetry and Translation” (Amsterdam, 2019), and translator of Xi Chuan (New Directions, 2012), Mang Ke (Zephyr, 2018), Li Shangyin (NYRB, 2018) and Duo Duo (Yale, 2021).

Judit Kroo
PhD Stanford University
Kroo is a sociocultural linguist and assistant professor in the School of International Letters and Cultures. Her work, focused on Japan, examines how younger adults contest dominant ideologies governing ‘the good life.’ Using ethnography, social media mapping and discourse analysis, she shows how younger adults marshal digital, linguistic and life practice-based resources to construct alternative social spaces and engage in apolitical politics.
Yize (Henry) Li  
PhD Institute Pasteur of Shanghai, Chinese Academy of Sciences (China)  
Li is an assistant professor in the School of Life Sciences. He joins ASU from the University of Pennsylvania Perelman School of Medicine. His research focuses on antiviral innate immunity. Two recent studies have focused on the pathogenesis of Middle East respiratory coronavirus and endogenous double-stranded RNA induced CNS damage in the absence of ADAR1 activity, funded by the National Institutes of Health.

Han Hsien Liew  
PhD Harvard University  
Liew is assistant professor of Islamic studies in the School of Historical, Philosophical and Religious Studies. His research focuses on the history of Islamic political thought and Islamic scholarly culture in the premodern Middle East and Southeast Asia. He is currently working on a book project titled “Piety, Knowledge, and Emotions in Islamic Rulership: Ibn al-Jawzi’s Ameliorative Politics.”

Melissa Linton  
PhD University of California, San Diego  
Linton is an assistant professor in the School of Social Transformation and specializes in reproductive justice. Her research utilizes ethnography and cultural analyses of political texts to explore the root causes of the Central American caravan. Prior to joining ASU, Linton received her doctorate from UC San Diego, where her work was supported by the Critical Refugee Studies Initiative. She received her bachelor’s degree in English literature and American studies from University of Southern California.

Gilberto Lopez  
ScD Harvard University  
Lopez is an assistant professor in the School of Transborder Studies and is a broadly trained social scientist with experience in qualitative, quantitative and mixed methods of research. He is particularly interested in identifying structural and cultural factors that pattern the unequal distribution of disease affecting racialized minority and medically underserved populations — particularly Latinx peoples and immigrants. Lopez’ ultimate goal is to produce data that will guide the development and implementation of interventions to reduce inequities.
Natalie Lozinski-Veach  
**PhD Brown University**  
Bringing together the Frankfurt School’s view of the critical theory movement and the environmental humanities, Lozinski-Veach studies modern German thought to ask how art can help us reimagine our place among other species in new, sustainable ways. An assistant professor in the School of International Letters and Cultures, her research is situated at the intersection of ethics and aesthetics and focuses on questions of representation, language and trauma in 20th- and 21st-century works.

Miyeko Mana  
**PhD New York University Grossman School of Medicine**  
Mana is an assistant professor in the School of Life Sciences. Homing in on the intersection of stem cells, diet and cancer, Mana’s research focuses on how various diets, ranging from high-fat to calorie restriction, impact stem cells and create vulnerabilities that can lead to transformations that result in tumor initiation. She has received multiple awards, including the American Cancer Society Fellowship, National Science Foundation East Asia and Pacific Summer Institutes Fellow, and the NIH Developmental Genetics Training Award.

John McCutcheon  
**PhD Washington University in St. Louis**  
John McCutcheon is a professor and the associate director of ASU’s Biodesign Center for Mechanisms of Evolution. Prior to ASU, he was a faculty member at the University of Montana for 10 years. His research focuses on endosymbiosis or the process by which one cell becomes a long-term resident inside another cell. He and his lab members study endosymbioses that range from bacterial pathogens to the bacterial endosymbionts of insect crop pests, to the mitochondria and plastids of animal and plant cells.

Katherine Morrissey  
**PhD University of Wisconsin-Milwaukee**  
Morrissey is an assistant professor of film and media studies in the Department of English at ASU. Her research focuses on representations of female desire across popular culture, production networks and the impacts of digitization on creative communities. Morrissey serves as review editor for Transformative Works and Cultures journal and co-vice president for the International Association for the Study of Popular Romance.
Anthony Peguero  
PhD University of Miami  
Peguero is a professor in the T. Denny Sanford School of Social and Family Dynamics and School of Criminology and Criminal Justice in the Watts College of Public Service and Community Solutions. His research interests involve youth violence, socialization and marginalization, schools and the adaptation of the children immigrants. Peguero is also a member of Latina/o/x Criminology and also the Racial Democracy, Crime, and Justice Network, which holds the goals of advancing research on the intersection of race, crime and justice.

Tracy Perkins  
PhD University of California, Santa Cruz  
Perkins is an assistant professor in the School for Social Transformation. She comes to ASU from a position as an assistant professor in the Department of Sociology and Criminology at Howard University (2015–2020). Perkins specializes in social inequality, social movements and the environment through a focus on environmental justice activism.

Timothy Peterson  
PhD University of Missouri  
Peterson’s research spans the study of foreign policy, international political economy, international conflict and human rights. An associate professor in the School of Politics and Global Studies, his current project explores how U.S. sanctions motivate third-party compliance with U.S. foreign policy goals such as counterterrorism, human rights promotion, anti-narcotics trafficking and nuclear nonproliferation. He serves as an editor for International Studies Review.

Patricia Rankin  
PhD Imperial College, London (United Kingdom)  
Rankin is an experimental particle physicist who is developing the inclusive Department of Physics of the future. Effective team approaches to complex grand challenge problems, like climate change, need diverse physicists with broad competencies as well as the traditional discipline-based skills. She has held a variety of administrative roles, including being a program officer at the U.S. National Science Foundation and associate vice chancellor for research at University of Colorado, Boulder.
José Rosales Chavez  
MPH University of Minnesota  
Rosales Chavez is an assistant professor in the School of Geographical Sciences and Urban Planning. He studies the food environment with a focus on community development, access to food, culturally relevant food sources, eating behaviors, health outcomes and social determinants of health. His current project focuses on street food stands in Mexico City as a culturally relevant food source.

Liesel Sharabi  
PhD University of Illinois  
Sharabi is an assistant professor in the Hugh Downs School of Human Communication. Her research primarily explores the uses and effects of communication technologies in interpersonal relationships, including the role of technological mediation in processes related to attraction and relationship development. She also conducts research on multimodality and the increasingly integrated nature of online and offline communication in close relationships.

Colleen Sheehan  
PhD Claremont Graduate School.  
Sheehan is a professor and director of graduate studies at the School of Civic and Economic Thought and Leadership. She has served in the Pennsylvania House of Representatives and on the Pennsylvania State Board of Education. She is author of numerous books and articles, including “The Mind of James Madison” (Cambridge University Press, 2015) and “James Madison and the Spirit of Republican Self-Government” (Cambridge University Press, 2009).

Molly Simon  
PhD The University of Arizona  
Simon will be an assistant professor in the School of Earth and Space Exploration beginning January 2021. Her work focuses predominantly on astronomy education research, with an emphasis on the development and assessment of curricular materials for undergraduates. Simon is particularly interested in using citizen science as a mechanism to bring authentic research experiences to nonscience majors and she is eager to expand her curriculum development efforts to online courses.
Noah Snyder-Mackler  
PhD University of Pennsylvania  
Snyder-Mackler is an assistant professor in ASU’s School of Life Sciences and the Center for Evolution and Medicine. His research sits at the nexus of the social environment and the genome. His lab uses molecular genetic techniques to probe the dynamic interaction between the environment and the genome with the aim of understanding how environmental experiences “get under the skin” to affect health, reproduction and survival.

Samuel Teitelbaum  
PhD Massachusetts Institute of Technology  
Teitelbaum is an assistant professor in the Department of Physics. Before coming to ASU, he was postdoctoral fellow at SLAC National Accelerator Lab. He uses light to control and interrogate atomic motion in solid-state systems. These experiments use recent advances in x-ray free electron laser technology to track the motion of solids on their fundamental length and time scales.

William Terrano  
PhD University of Washington  
Terrano joins ASU as an assistant professor in the Department of Physics. His research involves studying fundamental physics by making precision measurements of very weak interactions. These measurements search for possible forces beyond the four known forces, look for the influence of dark matter in the laboratory and probe for differences between matter and anti-matter.

Joris Van Ouytsel  
PhD University of Antwerp (Belgium)  
Van Ouytsel is an assistant professor in the Hugh Downs School of Human Communication. His award-winning research focuses on media literacy, sexting, online intimate partner violence and the role of digital media in romantic relationships. Van Ouytsel was a Fulbright grantee and is author of more than 40 peer-reviewed publications. He also serves as an associate editor for the journal Personal Relationships.
Jessica Verpeut  
PhD Rutgers, The State University of New Jersey  
Verpeut is an assistant professor in the Department of Psychology. She is a behavioral neuroscientist with an interest in understanding underlying neural mechanisms involved in neurodevelopmental disorders. Her research combines whole brain imaging of neural structure and activity with pose tracking to understand how the brain ultimately produces behavior.

Shuang Zhou  
PhD Texas A&M University  
Zhou is an assistant professor in the School of Mathematical and Statistical Sciences. She studies Bayesian methods in statistical inference. Her work has numerous applications in physics and other areas of science. Her work, published in Physical Review, statistically confirmed new experimental work in determining the radius of a proton and is the basis for an upcoming grant application to the U.S. Department of Energy.

Qiyun Zhu  
PhD University at Buffalo, New York  
Zhu is an assistant professor in the School of Life Sciences and ASU’s Biodesign Center for Fundamental and Applied Microbiomics. A computational biologist with expertise in phylogenetics, comparative genomics, metagenomics and multiomics, Zhu strives to expand understanding of the microbial world through its multiple levels: genes, genomes, lineages, communities, hosts and environments. Prior to joining ASU, he was a postdoctoral fellow at J. Craig Venter Institute and the University of California, San Diego.
Edson College of Nursing and Health Innovation

**Molly Maxfield**  
PhD University of Colorado, Colorado Springs  
Maxfield is an associate professor and a clinical psychologist with research interests in psychology and aging. Her current projects focus on dementia-related anxiety among middle-aged and older adults and later-life effects of childhood maltreatment.

**Barret Michalec**  
PhD Emory University  
Michalec is an associate professor and the director of the Center for Advancing Interprofessional Practice, Education and Research. He studies socialization processes within health professions, focusing on intergroup mechanisms, humanism and empathy. He is a Josiah Macy Jr. Foundation Faculty Scholar and holds leadership roles within the National Center for Interprofessional Practice and Education and the American Interprofessional Health Collaborative.

**Janet Pohl**  
PhD University of Washington School of Nursing  
Pohl is an assistant professor. She investigates the health implications of caregiver and older adult social connectedness and the multiple aspects of isolation, with attention on the conceptual definition and measurement of the social isolation construct for research and clinical assessment. Pohl is the recipient of University of California, Davis and Arizona State University fellowships.
Fang Yu
PhD University of Pennsylvania
Yu is a professor, the Edson Chair in Dementia Translational Nursing Science, and a gerontological nurse practitioner. She studies the effects and mechanisms of nonpharmacological interventions on cognitive decline due to aging and Alzheimer's disease. She holds an MSW, is an RN and a fellow of The Gerontological Society of America and the American Academy of Nursing.
Watts College of Public Service and Community Solutions

Shanondora Billiot  
PhD Washington University in St. Louis  
Billiot (United Houma Nation) is an assistant professor in the School of Social Work. Her research explores the intersection of health, environment and culture among Indigenous peoples with the goal to develop community-based adaptation interventions and inform policymakers. She earned a doctorate in social work from Washington University in St. Louis and a fellowship at Yale University.

Abigail Henson  
PhD Tempe University  
Henson is an assistant professor in the School of Criminology and Criminal Justice. Her research interests involve policy and program evaluation and the impact of corrections and policing on identity, families, and communities. Her work strives to shift narratives and eliminate stigmas by engaging in strengths-based human-centered frameworks and applying a critical gaze toward systemic injustices.

Matt Ignacio  
PhD University of Washington  
Ignacio is a tribal member of the Tohono O’odham Nation and an assistant professor in the School of Social Work. His research is focused on improving the health and wellness of Indigenous people and communities across the U.S. Ignacio brings more than 21 years of experience in the fields of HIV and STIs, harm reduction, and Indigenous wellness and is committed to strengths-based approaches to social work education, practice and research.
Junyu Lu
PhD University of South Carolina
Lu is an assistant professor in the School of Community Resources and Development. His research interests are mainly in the areas of parks and recreation management, climate change and adaptation, and sustainability. He integrates advanced methodologies into his research, including advanced statistical methods, GIS, big data and high performance computing. Before joining ASU, he held a postdoc in Natural Resources Social Science Lab at Purdue University.

Susan Miller
PhD University of Missouri
Miller is an associate professor in the School of Public Affairs. Her research interests are in the areas of public management and policy. She explores the consequences of institutional and program design for policy implementation and outcomes, including a focus on administrative burden in government programs. She currently serves as an associate editor for the Journal of Public Administration Research and Theory.

Sabrina Oesterle
PhD University of Minnesota
Oesterle is an associate professor in the School of Social Work and director of the Southwest Interdisciplinary Research Center in the Watts College of Public Service and Community Solutions. Oesterle is a prevention scientist focusing on health disparities, life course research, the prevention of behavioral health problems among adolescents and young adults, and quantitative research methods.

Bruno Miguel Simoes Ferreira
PhD North Carolina State University
Simoes Ferreira is an assistant professor with the Hainan University-ASU International Tourism College in the School of Community Resources and Development. His research focuses on the psychological and environmental antecedents of tourism microentrepreneurship among individuals with vulnerable livelihoods. Other areas of interest include destination stewardship, permatourism, agritourism, social entrepreneurship and development through sport. He has worked in Europe, Africa, South and Central America.
Neil Websdale  
PhD University of London (United Kingdom)  
Websdale directs the Family Violence Center in the School of Social Work. His work addresses domestic violence, interpersonal violence, the history of crime and the social responses to these phenomena. His public policy work involves helping establish domestic violence fatality review teams. Websdale also directs various multiagency and interdisciplinary initiatives including the National Domestic Violence Fatality Review Initiative.

Nicholas Wise  
PhD Kent State University  
Wise joins the School of Community Resources and Development as an assistant professor after working abroad since 2012, most recently at Liverpool John Moores University in England. Originally from Lancaster, Pennsylvania, he has travelled extensively in 100 countries and brings an international perspective to his teaching informed by scholarly research focusing on the Dominican Republic, Argentina, Brazil, Croatia, Serbia and Italy. His current research focuses on placemaking, competitiveness, social regeneration and community impacts, conducting work across the areas of sport, events and tourism. He is a senior fellow of the Higher Education Academy.
Mary Lou Fulton  
Teachers College

**Geoffrey Borman**  
PhD University of Chicago  
Borman is a Foundation Professor and professor of quantitative research. Prior to ASU, he was Vilas Distinguished Achievement Professor at the University of Wisconsin-Madison. His research includes analysis of social distribution and ways practices can overcome educational inequality. He was the 2004 recipient of the Raymond Cattell Early Career Award from the American Educational Research Association (AERA), the 2004 AERA Review of Research Award, and the 2008 AERA Palmer O. Johnson Award.

**Carlos Casanova**  
PhD Iowa State University  
Casanova is a first-generation college graduate from a small post-industrial town in southeastern Michigan. He has years of experience working with historically marginalized groups in educational settings and community youth-based organizations in Michigan, Texas, Iowa and Arizona. His research focuses on liberating pedagogy, Latino and Latina youth development, and preparing educators to work within and outside urban K-12 settings. He is an assistant professor of educational studies.

**Shyla Doğan**  
PhD The University of Arizona  
Doğan is an assistant professor of educational studies. She holds a doctorate in educational leadership and policy. She also holds an MEd in anthropology and education from Columbia University and an MA in Near Eastern studies from the School of Middle East and North African studies at The University of Arizona. Her work centers on race, identity, migration, community-based education and schooling.
Karen Koellner  
PhD Arizona State University  
Koellner is an associate professor. She has served as co-principal investigator on several Institute of Education Sciences and National Science Foundation grants investigating professional development efficacy for algebra and geometry. She co-authored the book “Mathematics professional development: Improving teacher using the problem-solving cycle and leadership preparation models.” She has also directed childhood education at Hunter College and taught mathematics methods courses and supported teacher candidates in New York City schools.
ASU Charter

ASU is a comprehensive public research university, measured not by whom it excludes, but by whom it includes and how they succeed; advancing research and discovery of public value; and assuming fundamental responsibility for the economic, social, cultural and overall health of the communities it serves.

provost.asu.edu
New American University

Arizona State University has become the foundational model for the New American University, a new paradigm for the public research university that transforms higher education. ASU is committed to excellence, access and impact in everything that it does.
