Briefly describe the rationale for disestablishment:

This degree was closed to new enrollment effective Spring 14 with Provost approval. This disestablishment proposal will complete the process of disestablishment.

Impact on other existing programs:

May include availability of course content for students in other majors who may need it; other.

None expected. Other majors that may need related content have it available via the BS in Software Engineering or the BS Information Technology.

Impact on current students:

Estimate number of students still enrolled; anticipated date of last graduates; arrangements for continuing students and students in articulated transfer pathways (e.g., MAPP, TAG).

There are 79 students enrolled in the program, six of whom are freshman. The program advisors will work with each student to determine a degree completion plan. Students will have access to content needed to complete their program available through the BS in Software Engineering or the BS Information Technology, both active degree plans. Freshman may also elect to pursue one of these programs. The last anticipated graduation would be Spring 2017.

This program does not have a MAPP, TAG or other transfer partnership agreement.
