Briefly describe the rationale for disestablishment:

This program is not accredited by ABET. Students who initially choose this premedical concentration ultimately change majors within their first year to the BSE in Biomedical Engineering or other science related fields. No students have graduated from this program in the past seven years.

Impact on other existing programs: Could include availability of course content for students in other majors who may need it; other.

Minimal or no impact on other existing programs. The students who initially choose this concentration are already changing to other majors.

Impact on current students: Estimate number of students still enrolled; anticipated date of last graduates; arrangements for continuing students and students in articulated transfer pathways (ex. MAPP, TAG).

Minimum impact on current students. No students have graduated from this program in the past seven years. An average of two upper class students are currently enrolled. Effective advising will be utilized to support these students.

Additional information: Provide any relevant information not required above that will assist in evaluating the proposal.
