RE: Indigenous Teacher Program in Elementary Education (EDIEDBAE)

The College of Teacher Education and Leadership requests the disestablishment of the Indigenous Teacher Program in Elementary Education (EDIEDBAE).

Students have not been admitted to the professional program since Fall 2006 due to low interest and enrollments. A request to disestablish this plan code was made by Dean Hynd prior to the reorganization.

There are currently eight students in the plan code; however, they have not yet started professional program coursework and disestablishing this plan code will not inhibit their ability to successfully transfer into another plan and graduate on time. Advisors will work with these students to transition them into another teacher preparation program.
