ARIZONA STATE UNIVERSITY
PROPOSAL TO ESTABLISH A NEW UNDERGRADUATE DEGREE

This template is to be used only by programs that have received specific written approval from the Provost’s office to proceed with internal proposal development and review. A separate proposal must be submitted for each individual new degree program.

DEGREE PROGRAM INFORMATION
College/School(s) offering this degree: College of Arts and Sciences

Unit(s) within college/school responsible for program: School of Human Evolution & Social Change

If this is for an official joint degree program, list all units and colleges/schools that will be involved in offering the degree program and providing the necessary resources:

Proposed Degree Name: BS in Anthropology

Undergraduate Degree Type: BS-Bachelor of Science

If Degree Type is Other, provide proposed degree type: and proposed abbreviation:

Proposed title of major: Anthropology

Is a program fee required? Yes □   No □

Requested effective term: Fall and year: 2010
(The first semester and year for which students may begin applying to the program.)

PROPOSAL CONTACT INFORMATION
(Person to contact regarding this proposal)

Name: Alexandra Brewis Slade
Title: Prof & Assoc Director

Phone: 480-727-9879
email: Alex.Brewis@asu.edu

DEAN APPROVAL
This proposal has been approved by all necessary unit and College/School levels of review, and the College/School(s) has the resources to offer this degree program. I recommend implementation of the proposed degree program. (Note: An electronic signature, an email from the dean or dean’s designee, or a PDF of the signed signature page is acceptable.)

College Dean name:
College Dean signature ___________________________ Date: __________

College Dean name:
(if more than one college involved)
ARIZONA STATE UNIVERSITY
PROPOSAL TO ESTABLISH A NEW UNDERGRADUATE DEGREE

This proposal template should be completed in full and submitted to the University Provost’s Academic Council [mailto:curriculum@asu.edu]. It must undergo all internal university review and approval steps including those at the unit, college, and university levels. A program may not be implemented until the Provost’s Office notifies the academic unit that the program may be offered.

DEGREE PROGRAM INFORMATION

Undergraduate: BS-Bachelor of Science

If Degree Type is Other, provide proposed degree type:
and proposed abbreviation:

Proposed title of major: Anthropology

1. PURPOSE AND NATURE OF PROGRAM
   A. Brief program description (This is a catalog type description of no more than 250 words. Include the distinctive features of the program that make it unique. Do not include program or admission requirements.)

   The B.S. program in Anthropology gives students an opportunity to master anthropological or anthropologically-relevant knowledge and skills through applications of the scientific method and quantitative methodologies. Anthropology is the study of how and why humans evolved, and how our evolutionary biological, social and cultural trajectories help us understand the meaning of being human in past, present and future environments. Through core and elective courses, the BS Anthropology program allows students to explore problems that may require the use of theories and methods from diverse disciplines, including biology, global health, applied mathematics, psychology, economics, sociology, medicine, law, and engineering. Anthropology provides many exciting hands-on learning opportunities through laboratories and field-based courses that focus on finding human fossils; unearthing buried cities, villages and hunter-gatherer camps; understanding health, disease, human biology and genetics; appreciating the languages and cultures of such diverse areas as Southeast Asia, the South Pacific, Latin America and the Mediterranean Basin; and many other topics that explore humans of the past and present.

2. STUDENT LEARNING OUTCOMES AND ASSESSMENT
   A. List the knowledge, competencies, and skills students should have when they graduate from the proposed degree program. (You can find examples of program Learning Outcomes at [http://www.asu.edu/oue/assessment.html](http://www.asu.edu/oue/assessment.html))

   The program is structured by five goals: 1) ability to identify anthropological problems, 2) ability to articulate how anthropologists study those problems, 3) know the extent to which humans differ in multiple dimensions (biological, cultural, social) across time and space, 4) know how theories or paradigms are used to address anthropological questions, 5) know how different anthropological and other scientific methods are used to answer anthropological questions. These goals, and the associated specific learning outcomes, are met through the core curriculum of seven courses, three hard sciences electives, one theory elective and required and recommended introductory and advanced statistics courses as laid out in the following table. This table will be used as a guide to requests for course substitutions, whereby any substitutions should reasonably meet the listed core learning goals (X) for the substituted course.
### X Core knowledge and skills

<table>
<thead>
<tr>
<th>ASM 104</th>
<th>ASB 102</th>
<th>ASM300 Anthro Science Seminar</th>
<th>ASB 222 or 223</th>
<th>4 Anthro Science Courses</th>
<th>Stats/ math courses</th>
<th>AML 100</th>
</tr>
</thead>
</table>

### Goal 1: Ability to identify anthropological problems

- Identify the primary approaches to the study of human diversity
- Apply basic tools to describe and interpret human variation patterns
- Apply methods for measuring human variation
- Define culture
- Identify relationships between culture and other human dimensions
- Theorize and test associations between cultural, social and biological variables

### Goal 2: Ability to articulate how anthropologists study human variation

- Distinguish causality from association, and identify its criteria
- Explain and evaluate the scientific method
- Recognize different forms of research design
- Illustrate and apply the concepts of adaptation, evolution, selection and life history
- Explain the bases and patterns of human biological variation
- Develop and test evolutionary and alternative explanations of behavioral and other phenotypes

### Goal 3: Know the extent to which humans differ in multiple dimensions (biological, cultural, social) across time and space

- Characterize the major social, cultural and biological differences between human groups

### Goal 4: Know how theories or paradigms are used to address anthropological questions

- Identify differences between theories, conceptual framework, descriptive hypotheses, research design and measurement methods

### Goal 5: Know how different anthropological and other scientific methods are used to answer anthropological questions

- Know methods that are used to measure cultural variation
- Know methods that are used to measure social and behavioral variation
- Know methods that are used to measure biological variation
- Know how mathematical models are used to identify complex causes and associations
- Know how statistical models are used to measure associations between variables

---

**B. Describe the plan and methods to assess** whether students have achieved the knowledge, competencies and skills identified in the Learning Outcomes. (You can find examples of assessment methods at [http://www.asu.edu/oue/assessment.html](http://www.asu.edu/oue/assessment.html))

The methods of assessment are:
1. Course Grades and Instructor Feedback in the Core Required Courses
   a. Individual students will be assessed as attaining learning outcomes if they complete relevant courses with a grade of C or better.
   b. Overall student learning will be assessed through grade distributions for those courses, interpreted in relation to feedback from faculty teaching those courses.

2. Student Evaluations of Courses
   a. Each of the core required courses will be evaluated by students each time it is taught using standard instruments, and summary scores will be assessed.

3. Alumni Surveys. Alumni contact information will be maintained and they will be periodically surveyed to determine if they have entered a graduate program or a career; if employed, whether their education as an anthropology BS is of value in their current position and how, whether the major has contributed in significant ways to their current endeavors, etc. The focus will be on assessing alumni at one year, three years, and five years post graduation.

3. CURRICULUM OF THE PROPOSED PROGRAM
   Total credit hours must be 120 to include: first year composition, general studies, core/required courses, program specific electives, and any additional requirements.

   A. Major Map. Please prepare and attach a Major Map. If there are concentrations in this degree program, prepare a separate Major Map for each one. (Examples of Major Maps can be found at http://provost.asu.edu/curriculum)

   B. Total credit hours required for this program: 120

   C. Core/Required Courses.
      i. Total required and/or core course credit hours: 27-29
      ii. List the name, prefix, and credit hours for each required/core class for this program

   All students take the following introductory courses (12-13 credits):
   ASB 102 Intro to Cultural and Social Anthropology (3)
   ASB 222 Buried Cities and Lost Tribes OR ASB 223 Buried Civilizations of the Americas (3)
   ASM 104 Bones, Stones, and Human Evolution (3-4)
   AML 100 Intro to Applied Mathematics for the Life & Social Sciences (3)

   All students must take one core course (3 credits)
   ASM 300 Anthropological Sciences Seminar (3) or approved equivalent.

   Plus any four of the following Anthropological Science Courses (or approved equivalents): at least 2 must be at the 400 level (12-13 credits)

   ASM 246 Human Origins
   ASM 294 Forensic Anthropology
   ASM 301 Peopling of the World
   ASM 330 Principles of Archeology
   ASM 332 Life and Death in Ancient Egypt
   ASM 338 Anthropological Field Sessions
   ASM 341 Human Osteology
   ASM 342 Human Biological Variation
   ASM 343 Primatology
   ASM 344 Fossil Hominids
   ASM 345 Disease and Human Evolution
   ASM 348 Social Issues in Human Genetics
   ASM 365 Laboratory Methods in Archaeology
   ASM 394 Australopithecus and Early Homo at Hadar
   ASM 394 Fossil Primates
   ASM 394 Numeracy in the Life and Social Sciences
D. Program Specific Electives.
   i. Total required program elective credit hours: 12
   ii. List the name, prefix, and credit hours for any program specific electives for this program:

Electives may be drawn from the list above, or from additional approved courses from a list maintained by the undergraduate committee.

E. Additional Program Requirements, if any. List and describe any capstone experiences, milestone, and/or additional requirements for this degree program: 6 credits

All students must take one of the following (6 cr):
ASM 465 Quantification & Analysis for Anthropologists (3) OR
AML 400 Probability & Statistics with Applications to Life & Social Sciences (3) OR
BIO 415 Biometry (3) OR
STP 420 Introductory Applied Statistics (3)

AND

MAT 251 Calculus for the Life Sciences- (3) OR
MAT 265 Calculus for Engineers I (3) OR
MAT 270 Calculus with Analytic Geometry I (3)
Or approved equivalent (3 cr min.)

F. Are any concentrations to be established under this degree program? □ Yes  □ No

   i. If “Yes”, please check one:
      □ Students select a concentration as part of this degree program
      □ Concentrations are optional

   ii. List courses & additional requirements for the proposed concentration (s):
4. NEW COURSE DEVELOPMENT
   A. Will a new course prefix(es) be required for this degree program? Yes ☐ No ☐
      If yes, complete the request for establishment of a new prefix for each prefix and submit with this proposal.

   B. New Courses Required for Proposed Degree Program. List all new courses required for this program, including course prefix, number and course description.

      AML 400  Probability and Statistics with Applications to Life & Social Sciences (3)
      Use of statistical methods to build and assess models in the life and social sciences.

      ASM 300 Anthropological Sciences Seminar (3).
      Introduces students to the process, parameters, and application of scientific approaches to anthropology.

5. PROGRAM NEED. Explain why the university needs to offer this program (include target audience and market).
   In the 21st Century, a workforce with a truly global perspective – who can understand how multiple factors interact at and between the local, national and international levels to produce disparities, what we might do about it, and recognize that solutions as well as problems can cross both physical and cultural borders – is critical in any field, and it requires training in anthropology. At present, SHESC only offers a BA in Anthropology, a degree that does not provide the necessary math and science background for students interested in pursuing careers in Medicine, Public/Global Health Sciences, Computer Science, Informatics Forensics, Engineering, Economics, Biology, Psychology, Chemistry, Genetics, Business Administration, Statistics, Basic or Applied Mathematics. A high student demand is expected, because very few universities offer similar Bachelor of Sciences programs in Anthropology (mainly, University of California at Los Angeles, Emory University, Stanford University), and there is to our knowledge no other similar degree program offered in Arizona or the Southwest.

6. IMPACT ON OTHER PROGRAMS. List other academic units that might be impacted by the proposed program and describe the potential impact (e.g., how the implementation of this program might affect student headcount/enrollment, student recruitment, faculty participation, course content, etc. in other programs). Attach letters of collaboration/support from impacted programs.

   As we are already offering a BA in Anthropology, we expect impact on other programs to be subdued. However, the most likely impacted programs will be the BS programs in the School of Life Sciences.

7. PROJECTED ENROLLMENT How many new students do you anticipate enrolling in this program each year for the next five years? Please utilize the following tabular format.

<table>
<thead>
<tr>
<th>5-YEAR PROJECTED ANNUAL ENROLLMENT</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1st Year</strong></td>
</tr>
<tr>
<td>1st Year (Yr 1 continuing + new entering)</td>
</tr>
<tr>
<td>2nd Year (Yr 1 &amp; 2 continuing + new entering)</td>
</tr>
<tr>
<td>3rd Year (Yrs 1, 2, 3 continuing + new entering)</td>
</tr>
<tr>
<td>4th Year (Yrs 1, 2, 3, 4 continuing + new entering)</td>
</tr>
<tr>
<td>5th Year (Yrs 1, 2, 3, 4, 5 continuing + new entering)</td>
</tr>
</tbody>
</table>

(Please expand table as needed. Right click in white space of last cell. Select “Insert Rows Below”)
8. **ACCREDITATION OR LICENSING REQUIREMENTS (if applicable).** Provide the names of the external agencies for accreditation, professional licensing, etc. that guide your curriculum for this program, if any. Describe any requirements for accreditation or licensing.

NA

9. **FACULTY and STAFF**
   a. **Current Faculty.** List the name, rank, highest degree, area of specialization/expertise and estimate of the level of involvement of all current faculty who will teach in the program.

   Alexandra Brewis  
   Ph.D., University of Arizona, 1992; Professor  
   Biocultural anthropology; human adaptation; human reproduction; medical anthropology; demographics; nutrition, growth and development

   Anne Stone  
   Ph.D., Pennsylvania State University, 1996; Associate Professor  
   Ancient DNA research, genetics, human and non-human primate genetics

   Barbara L. Stark  
   Ph.D., Yale University, 1974; Professor  
   Fellow, American Association for the Advancement of Science  
   Archaeology, complex society; Mesoamerica

   Ben A. Nelson  
   Ph.D., Southern Illinois University—Carbondale, 1980; Professor  
   Archaeology, ethnoarchaeology, political transformations (especially in frontier contexts), long-distance exchange; Mesoamerica, Southwestern United States

   Brenda J. Baker  
   Ph.D., University of Massachusetts—Amherst, 1992; Associate Professor  
   Bioarchaeology, human osteology, paleopathology; North America, Egypt, Nubia, Cyprus

   C. Michael Barton  
   Ph.D., University of Arizona, 1987; Professor  
   Archaeology, hunter-gatherers and agricultural origins, human ecology, geoarchaeology, lithic technology, spatial technology and computer applications, evolutionary theory; Old World, Western North America

   Carlos Castillo-Chavez  
   Ph.D., University of Wisconsin—Madison, 1984; Regents' Professor  
   Mathematical and theoretical biology, disease evolution, epidemiology

   Christopher Carr  
   Ph.D., University of Michigan, 1979; Professor  
   Archaeology, method and theory, quantitative analysis, ecology, death and dying across cultures, mortuary practices, worldview, symbolism, style, art; Eastern United States

   Christopher Stojanowski  
   Ph.D., University of New Mexico, 2001; Assistant Professor  
   Bioarchaeology, demographics, ethnohistory, forensic anthropology, mathematics and statistics, Native North America, Postcolonialism, quantitative methods
Curtis Marean
Ph.D., University of California—Berkeley, 1990; Professor
Human origins, evolution and diversity, societies and their natural environments, archaeology, paleoanthropology, zooarchaeology; Africa, Near East

David Abbott
Ph.D., Arizona State University, 1994; Associate Professor
Archaeology, community organization, ceramic analysis, large-scale irrigation management, quantitative analysis; Hohokam, Southwestern United States

Donald Johanson
Ph.D., University of Chicago; Professor
Paleoanthropology

Gary Schwartz
Ph.D., Washington University, 1997; Associate Professor
Anatomy and morphology, dental anthropology, human growth and development, paleoanthropology

Geoffrey Clark
Ph.D., University of Chicago, 1971; Regents' Professor
Fellow, American Association for the Advancement of Science
Old World prehistory, systematics in paleoanthropology, logic of inference, human evolution: Western Europe, Near East, Africa

Gerardo Chowell-Puente
Ph.D., Cornell University, 2005; Assistant Professor
Biostatistics, mathematical epidemiology

Jane Buikstra
Ph.D., University of Chicago, 1972; Professor
Member, National Academy of Sciences
Fellow, American Association for the Advancement of Science
Bioarchaeology, forensic anthropology, mortuary site archaeology, paleodemography, paleogenetics, paleopathology

Katherine A. Spielmann
Ph.D., University of Michigan, 1982; Professor
Archaeology, ecology, craft specialization, exchange; North America

Kaye Reed
Ph.D., State University of New York—Stony Brook, 1996; Associate Professor
Ecology, Paleoeoclogy

Keith Kintigh
Ph.D., University of Michigan, 1982; Professor
Archaeology, quantitative analysis, sociopolitical organization, settlement patterns, archaeological data integration; Southwestern United States

Kelly Knudson
Ph.D., University of Wisconsin—Madison, 2004; Assistant Professor
Bioarchaeology, archaeological chemistry, residential mobility and paleodiet; Andes

Leanne Nash
Ph.D., University of California—Berkeley; 1973; Professor
Behavior analysis, ecology, primatology
New Faculty. Describe the new faculty hiring needed during the next three years to sustain the program. List the anticipated hiring schedule and financial sources for supporting the addition of these faculty.

None required.
c. **Administration of the program.** Explain how the program will be administered for the purposes of admissions, advising, course offerings, etc. Discuss the available staff support.

The administration of the program will match and mirror that of the existing BA in Anthropology in all respects. The program will be supervised by the undergraduate committee composed of an undergraduate director, two undergraduate student advisors and faculty representatives of the Physical Anthropology, Archaeology and Socio-cultural approaches, and Environment, Technology and Society programs. The undergraduate committee oversees academic policies, curriculum planning, program activities and a faculty undergraduate director charged with everyday implementation. We have an existing student advisor and a curriculum and student services coordinator who will provide administrative support. No new administrative support is required.

10. **RESOURCES (necessary to launch and sustain the program)**
   a. Describe any new resources required for this program’s success, such as new support staff, new facilities, new library resources, new technology resources, etc.

The library already has a basic core of books and journal in anthropological sciences. Facilities are adequate to initiate the proposed program. No additional faculty space is needed to establish this degree. Existing support staff in SHESC are more than adequate to initiate the instructional program.

   b. Explain where you will get the resources to support this program.

   NA
APPENDIX
OPERATIONAL INFORMATION FOR UNDERGRADUATE PROGRAMS
(This information is used to populate the Degree Search /catalog website.)

1. **Contact and Support Information**
   
   Office Location (Building & Room): SHESC 233
   
   Campus Telephone Number: 480-965-6215
   
   Program email address: shesc.undergrad@asu.edu
   
   Program website address: shesc.asu.edu/undergraduate_studies

2. **Additional Program Description Information**
   
   A. Additional program fee required for this program? Yes ☐   No ☒
   
   B. Does this program have a second language requirement? Yes ☐   No ☒

3. **Career Opportunities & Concentrations** Provide a brief description of career opportunities available for this degree program. If program will have concentrations, provide a brief description for each concentration.
   
   - Postgraduate academic research and teaching.
   - Professional employment in heritage (cultural resource) management in the private or public sectors.
   - Consulting for large and small private and public organizations.
   - Directing programs in the private or public sector.
   - Providing healthcare as nurses, doctors or public or global health professionals.
   - Analyzing and proposing policies.
   - Acting as legal advocates in international cases.
   - Curating cultural resources.
   - Planning communities.
   - Modeling infectious diseases.
   - Directing nonprofit organizations.

4. **Additional Admission Requirements** If applicable list any admission requirements (freshman and/or transfer) that are higher than and/or in addition to the university minimum undergraduate admission requirements.)
   
   n/a

5. **Keywords** List all keywords used to search for this program. Keywords should be specific to the proposed program.
   
   anthropology, human origins, ecology, environment, health, sustainability, biology, genetics, math, applied math, medicine, culture, paleoanthropology, archaeology, bioarchaeology, physical anthropology, biological anthropology, nursing, public health, dentistry, forensics, science

6. **Area(s) of Interest**
A. Select one (1) primary Area of Interest from the list below that applies to this program.

- Architecture, Construction & Design
- Artistic Expression & Performance
- Biological Sciences, Health & Wellness
- Business, Management & Economics
- Communication & Media
- Computing & Mathematics
- Education & Teaching
- Engineering & Technology
- Environmental Issues & Physical Sciences
- Interdisciplinary Studies
- Languages & Cultures
- Law & Justice
- Social Science, Policies & Issues

B. Select any additional Areas of Interest that apply to this program from the list below.

- Architecture, Construction & Design
- Artistic Expression & Performance
- Biological Sciences, Health & Wellness
- Business, Management & Economics
- Communication & Media
- Computing & Mathematics
- Education & Teaching
- Environmental Issues & Physical Sciences
- Engineering & Technology
- Interdisciplinary Studies
- Languages & Cultures
- Law & Justice
- Social Science, Policies & Issues
