Briefly describe the proposed change and rationale for the change:

The name is more in alignment with the expertise and courses offered through the new School of Biological and Health Systems Engineering.

Impact on current students: In general, all students with a “catalog year” for the program prior to the effective date will maintain the current name of the program regardless of when they complete the requirements. If a current student wants to have the new title for their program, they may change their catalog year/program code to align with the date of the title change.

The change will have no impact on current students.
