Request to implement a new master’s degree program 11-6-17
1. PURPOSE AND NATURE OF PROGRAM

A. Provide a brief program description:
   The MGLS in Global Leadership and Strategy is a global cohort executive leadership and strategy program that centers on development of advanced capabilities to conceptualize and deliver profitable growth along with the competencies to lead the strategy execution effort in a complex and dynamic global environment. This requires an innovative, integrated educational experience. Rather than a static arrangement of courses fragmented by disciplines this program more closely patterns executive decision realities by orienting around key themes that naturally flow from the macro to the micro, global to local, public to private, drawing from and interweaving relevant disciplines to successfully address the pressing issues executives face. It is by definition trans-disciplinary in nature and reflects this fundamental philosophy in both approach and execution.

   Blended learning makes this possible by combining thematically anchored content delivered using a combination of digital modules and on ground activities with field-deployed experiential learning projects (alternating between developed and emerging markets) that allow participants to interact first-hand with leaders who shape policy and industry and to demonstrate executive acumen through action/response simulation, sprint consultancy engagement, and innovation challenge delivery. Two culminating deliverables (TGM 605 and TGM 606) bridge the program’s six modules: 1) Organizational Level – Gamechanger Project (blueprint the future of participant’s industry, design for how participant’s firm can reimagine itself within this near future, and articulate participant’s and team/s/division’s role in the new reality) 2) Individual Level – Leadership Development Plan (work with advisor/coach to develop a personalized view of strengths and weaknesses and pathway to sustained leadership performance).

   The result is a deeply innovative, action-oriented, global executive finishing experience.

B. Will concentrations be established under this degree program? □ Yes □ No
   (Please provide additional concentration information in the curricular structure section – number 7.)

2. PROGRAM NEED

Explain why the university should offer this program (include data and discussion of the target audience and market).

Thunderbird has developed this unique degree program with blended learning that combines digital and ground coursework with thematically anchored content using hub-based experiential learning in major international cities like Geneva, Mumbai, Shanghai or Nairobi. This degree is designed for individuals who are headed to the C-Suite (or similar); they are advanced (high potential) mid-career with at least 8+ years of managerial experience. Students will be drawn from multinational corporations (MNCs), Global private businesses, global start-ups, international organizations (IOs), international non-governmental organizations (INGOs), etc., with sufficient mobility to engage in this program. This is a finishing degree.

The largest readiness gap for organizations around the world is a shortage of senior leadership talent. Emsi (2016, Request to implement a new master’s degree program 11-6-17
2017) identified a 10 percent growth in managerial and executive jobs that require leadership, critical thinking and project management skills. Deloitte found that only 14 percent of global firms were doing an excellent job of senior leadership development; 85 percent were doing an inadequate job. (https://www2.deloitte.com/global/en/pages/human-capital/articles/leaders-at-all-levels.html). Grant Thornton and the Conference Board identify similar gaps (https://www.grantthornton.global/en/insights/articles/q2-2017-economic-update-insight/; https://www.conference-board.org/closing-talent-gaps/). Successful senior leaders need much more than business skill mastery; they need to be globally sophisticated, innovative, curious and able to make rapid decisions. Most organizations are "redesigning their entire strategy for leadership development, driving deeper skills faster, developing leaders globally, and building leadership on a continuous basis." The Master of Global Leadership and Strategy is designed to accelerate the career trajectory of high potential individuals to fill the global senior leadership pipeline talent gap.

3. IMPACT ON OTHER PROGRAMS

Note: The Arizona Board of Regents (ABOR) requires that nine master's degrees be awarded every three years. Thus, the projected enrollment numbers must account for this ABOR requirement.

Additional Recommendations

All new graduate programs require specific processes and procedures to maintain a successful degree program. Below are items that the Graduate College strongly recommends that academic units establish after the program is approved for implementation.

☐ Establish satisfactory academic progress policies, processes and guidelines – Check within the proposing academic unit and/or college to see if there are existing academic progress policies and processes in place. If none have been established, please go to http://graduate.asu.edu/faculty_staff/policies and scroll down to the academic progress review and remediation processes (for faculty and staff) section to locate the reference tool and samples for establishing these procedures.

☐ Establish a Graduate Student Handbook for the new degree program – Students need to know the specific requirements and milestones they must meet throughout their degree program. A Graduate Student Handbook, provided to students when they are admitted to the degree program and published on the website for the new degree, gives students this information. To be included in the handbook are the unit/college satisfactory academic progress policies, current degree program requirements (outlined in the approved proposal) and a link to the Graduate Policies and Procedures website: http://graduate.asu.edu/faculty_staff/policies.
