

Addendum
HCR543 – Food Safety & Protection Course
Reviewed at the April 2CAPC Committee

Per review and discussion of the above course by the CAPC Committee, I am submitting the requested addendum to move the course forward for approval.

1. I met with Kathleen Dixon via Zoom on April 7 to discuss her concerns about the course. She assures me that after further review of the course she does not have any concerns and is in favor of moving the course forward through the approval process.
2. The Regulatory Science program is willing to share classes with other programs who have an interest in the courses and consider adding courses from other departments that support this course.
3. Katherine Kenny, Associate Dean of the Edson College has requested an impact statement from the AgBus College; this will be submitted upon receipt.

JoAnn Pfeiffer
Director, Clinical Research Management & Regulatory Science Programs
