Course information:

Copy and paste current course information from Class Search/Course Catalog.

College/School: College of Nursing and Health Innovation

Department: Department

Prefix: HCR  Number: 294  Title: The Science of Sleep Behavior  Units: 3

Is this a cross-listed course? No  If yes, please identify course(s)

Is this a shared course? No  If so, list all academic units offering this course

Is this a permanent numbered course with topics? No

If yes, all topics under this permanent numbered course must be taught in a manner that meets the criteria for the approved designation(s). It is the responsibility of the chair/director to ensure that all faculty teaching the course are aware of the General Studies designation(s) and adhere to the above guidelines. Chair/Director Initials

Course description: This course focuses on the nature, organization, function, and biopsychosocial determinants of sleep and sleep disorders across the lifespan, emphasizing the social and behavioral processes that influence them.

Requested designation: Social-Behavioral Sciences-SB

Note: a separate proposal is required for each designation requested

Eligibility:

Permanent numbered courses must have completed the university's review and approval process. For the rules governing approval of omnibus courses, contact Phyllis.Lucie@asu.edu or Lauren.Leo@asu.edu.

Submission deadlines dates are as follow:

For Fall 2016 Effective Date: October 6, 2015  For Spring 2017 Effective Date: March 15, 2016

Area(s) proposed course will serve:

A single course may be proposed for more than one core or awareness area. A course may satisfy a core area requirement and more than one awareness area requirements concurrently, but may not satisfy requirements in two core areas simultaneously, even if approved for those areas. With departmental consent, an approved General Studies course may be counted toward both the General Studies requirement and the major program of study.

Checklists for general studies designations:

Complete and attach the appropriate checklist

- Literacy and Critical Inquiry core courses (L)
- Mathematics core courses (MA)
- Computer/statistics/quantitative applications core courses (CS)
- Humanities, Arts and Design core courses (HU)
- Social-Behavioral Sciences core courses (SB)
- Natural Sciences core courses (SO/SG)
- Cultural Diversity in the United States courses (C)
- Global Awareness courses (G)
- Historical Awareness courses (H)

A complete proposal should include:

- Signed course proposal cover form
- Criteria checklist for General Studies designation(s) being requested
- Course catalog description
- Sample syllabus for the course
- Copy of table of contents from the textbook and list of required readings/books

It is respectfully requested that proposals are submitted electronically with all files compiled into one PDF. If necessary, a hard copy of the proposal will be accepted.

Chair/Director name (Typed): Brenda Morris  Date: 5/11/2015

Chair/Director (Signature): Brenda Morris, EdD, RN, CNL

Rev. 4/2015
Arizona State University Criteria Checklist for

SOCIAL-BEHAVIORAL SCIENCES [SB]

Rationale and Objectives

Social-behavioral sciences use distinctive scientific methods of inquiry and generate empirical knowledge about human behavior, within society and across cultural groups. Courses in this area address the challenge of understanding the diverse natures of individuals and cultural groups who live together in a complex and evolving world.

In both private and public sectors, people rely on social scientific findings to consider and assess the social consequences of both large-scale and group economic, technological, scientific, political, ecological and cultural change. Social scientists' observations about human interactions with the broader society and their unique perspectives on human events make an important contribution to civic dialogue.

Courses proposed for a General Studies designation in the Social-Behavioral Sciences area must demonstrate emphases on: (1) social scientific theories, perspectives and principles, (2) the use of social-behavioral methods to acquire knowledge about cultural or social events and processes, and (3) the impact of social scientific understanding on the world.

Revised April 2014
Proposer: Please complete the following section and attach appropriate documentation.

**ASU--[SB] CRITERIA**

A SOCIAL-BEHAVIORAL SCIENCES [SB] course should meet all of the following criteria. If not, a rationale for exclusion should be provided.

<table>
<thead>
<tr>
<th>YES</th>
<th>NO</th>
<th>Identify Documentation Submitted</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td><strong>1. Course is designed to advance basic understanding and knowledge about human interaction.</strong> Syllabus</td>
</tr>
<tr>

|     |    | **3. Course emphasizes:** Syllabus |
|     |    | a. the distinct knowledge base of the social and behavioral sciences (e.g., sociological anthropological). **OR**  
|     |    | b. the distinct methods of inquiry of the social and behavioral sciences (e.g., ethnography, historical analysis). |
|     |    | **4. Course illustrates use of social and behavioral science perspectives and data.** Syllabus |

**THE FOLLOWING TYPES OF COURSES ARE EXCLUDED FROM THE [SB] AREA EVEN THOUGH THEY MIGHT GIVE SOME CONSIDERATION TO SOCIAL AND BEHAVIORAL SCIENCE CONCERNS:**

- Courses with primarily arts, humanities, literary or philosophical content.
- Courses with primarily natural or physical science content.
- Courses with predominantly applied orientation for professional skills or training purposes.
- Courses emphasizing primarily oral, quantitative, or written skills.
Explain in detail which student activities correspond to the specific designation criteria. Please use the following organizer to explain how the criteria are being met.

<table>
<thead>
<tr>
<th>Criteria (from checksheet)</th>
<th>How course meets spirit (contextualize specific examples in next column)</th>
<th>Please provide detailed evidence of how course meets criteria (i.e., where in syllabus)</th>

Course Prefix & Number: HCR 294
Course Title: The Science of Sleep Behavior
Course Title Abbreviation: Science of Sleep
Credits: Three (3) credit hours, Elective
Course Address: http://myasucourses.asu.edu
Faculty: Megan E. Petrov, PhD
         Assistant Professor
         Room: NHI-1 358J
         Office Telephone: 602-496-2297
         Email: megan.petrov@asu.edu
         Office Hours: By appointment
Prerequisites or Co-Requisites: None
Course Catalog Description: Explore the biopsychosocial organization and
determinants of sleep and sleep disorders across the lifespan.
Course Description: This course focuses on the nature, organization, function, and
biopsychosocial determinants of sleep and sleep disorders across the lifespan,
emphasizing the social and behavioral processes that influence them.
Course Objectives: Upon completion of this course, you should be able to:
1. Summarize the neurophysiology of sleep and circadian rhythms
2. Develop skills in assessing and interpreting sleep behavior
3. Describe social, psychological and behavioral theories and concepts relevant to
   the study of sleep, sleep disorders, and dreaming
4. Identify short and long-term benefits and consequences of sleep
5. Apply principles of sleep regulation and treatments to improve your own sleep as
   well as the sleep of the greater community
Course Requirements (Assignments):

Summary of Assignments:

1. Participation/In-Class Exercises (10%)—students are expected to read all assigned materials prior to class and should be prepared to participate in class exercises designed to supplement the assigned topic or previous topics. In essence, these exercises will demonstrate the students’ learning. In-class exercises may include writing assignments, group activities, class discussions and demonstrations, and quizzes. To receive full credit for this portion of your grade, you must be present and fully participate in 8 of 10 in-class exercises. By “fully participate”, I mean that you were prepared for the exercise and gave thoughtful responses. Each exercise is worth $1\frac{1}{4}\%$ toward your final grade and it will be graded on a pass/fail basis. If you complete more than 8 in-class exercises, the extras will count as bonus percentage points toward your final grade.

2. Experiential Exercise: Sleep Diaries and Rating Scales (15%)—students will complete a 2 week-long standardized sleep diary and sleep-related daytime functioning questionnaires about their own sleep and experience. Upon completion, they will analyze their sleep diary and rating scale data. Students will then write a 3 – 4 double spaced paper summarizing their data and indicate clear and concrete improvements that can made for their sleep. Papers must be typed in 11 point, Arial font with 1 inch margins.

3. Sleep Improvement Program (15%) – Based upon the data gathered from the rating scales, sleep diaries, as well as course readings and discussions, students will implement a sleep improvement program for one week, following evidence-based parameters. Students will then write a 3 - 4 page, double-spaced paper in which they evaluate and summarize the effectiveness and outcomes of the sleep improvement program, which will be submitted along with one additional week of sleep diaries. Papers must be typed in 11 point, Arial font with 1 inch margins. You must use at least three sources as reference materials to justify the choices made in the sleep improvement program. Citations and references must be in APA style. Wikipedia is NOT a source.

4. Community Sleep Project (20%) – This assignment recognizes the lack of understanding and value placed on sleep among Americans, particularly among college students. Students will design a project aimed at educating their peers, family members, or other persons in the community about sleep focused on a single issue, such as sleep hygiene, a particular sleep pathology of interest, a public policy that directly or indirectly impacts sleep, driving or other situations where drowsiness presents a hazard, alcohol and substance use, or a theme of the students’ choosing. Students can work alone, in pairs, or in small groups of 3-4; all topics must be preapproved by the instructor. (Larger student groupings will be expected to produce more substantial projects.) Students are encouraged to
be creative in their presentations, some of which will be showcased in class. Students may wish to consider a public service announcement, video or video essay, webcast, brochure, blog, or poster format for their project.

5. **Exams** (40%) – There will be 2 non-cumulative exams (mid-term and final exam given during finals week). Any and all of the material covered in class lectures, class activities, and assigned readings will be fair game for the exams. However, the majority of the exam questions will cover material that was discussed during class. (Yet another reason you should attend class!) Exams will consist of multiple-choice questions, and may include short answer questions. Each of the exams will be worth 20% of your total grade.

**Policy on Late Assignments:**

Students are strongly encouraged to keep up with course readings and assignments. Students may submit assignments on or before due dates. The Sleep Improvement Program and the Sleep Diary and Rating Scale Experiential Exercise will not be accepted if they are more than seven days past due. Each day past due will result in a 2.5% reduction in the final grade of that particular assignment or exercise. Individual needs to extend due dates for course assignments must be negotiated with faculty at least 48 hours prior to the published due date.

The date for the mid-term exam will be noted on the class schedule. If you see that you have a conflict with this exam dates (i.e., you have had a longstanding commitment that occurs on that day), you must notify me and place your request for a make-up exam by [Insert date]. Requests for make-up exams will not be accepted after [Insert date] (except in extreme circumstances, such as a medical emergency or death in the family). Sudden out-of-town travel does not qualify for a make-up exam. To qualify for a make-up exam, your professor must be notified either prior to the exam (highly preferable) or as soon as possible afterward. In the case of a medical emergency, written proof from a physician will be required. Proper medical documentation includes (a) date and time of visit, (b) description of the medical problem, and (c) clear description of why the student could not take the exam, even with this problem. You must also provide the name and contact information of the physician. Further documentation may be requested. The make-up exam will be different from the original exam. If you miss an exam without an approved excuse, you will receive a score of 0 for that exam.

Exceptions to the above absence/late policies are below:

- Religious observances/practices that are in accord with ACD 304–04, “Accommodation for Religious Practices”
- University sanctioned events/activities that are in accord with ACD 304–02, “Missed Classes Due to University-Sanctioned Activities”
Methods of Evaluation: Students will be evaluated through participation/in-class exercises, assignments, and exams.

ASU’s +/- grading will be used:

Materials: There is a required text for this course, and reading assignments from seminal and recent articles and reviews, which will be posted on the course website.

Required Textbook:

Readings by Week (Articles on Blackboard):

Week 1:
Moorcraft: Chapter 2, pages 17-26
Chapter 3, pages 39-43, 57-65

Week 2:
Moorcraft: Chapter 2, pages 32-36
Chapter 4, pages 67-77

**Week 3:**
Moorcraft: Chapter 5

**Week 4:**
Moorcraft: Chapter 2, pages 26-31
Chapter 4, pages 78-83

**Week 5:**
Moorcraft: Chapter 10, pages 236-249

**Week 6:**
Moorcraft: Chapter 3, pages 43-57
Chapter 12, pages 293-300

**Week 7:**
Moorcraft: Chapter 12, pages 308-319
Chapter 13, pages 323-341

**Week 8:** None – Mid-term

**Week 9:**
Moorcraft: Chapter 6, pages 130-131
Chapter 13, pages 344-350

**Week 10:**

**Week 11:**

Moorcraft: Chapter 9, pages 214-224

Chapter 11, pages 272-284

**Week 12:**

**Week 13:**

Moorcraft: Chapter 4, pages 83-86

**Week 14:**

Moorcraft: Chapter 6, pages 133-139

**Week 15:**

Moorcraft: Chapter 12, pages 300-305

**Course Evaluations:** Course evaluations are a very important part of running a university. They are an opportunity for you to directly reflect on the teaching you experienced, and provide feedback so adjustments can be made. Your feedback whether extreme or in the middle is incredibly valuable for promoting better learning for future students.

**Disability Accommodations:** In compliance with the Rehabilitation Act of 1973, Section 504, and the Americans with Disabilities Act of 1990, professional disability specialists and support staff at the Disability Resource Centers (DRC) facilitate a comprehensive range of academic support services and accommodations for qualified students with disabilities. Students requesting accommodation for a disability must be
registered with the Disability Resource Center (DRC) and submit appropriate documentation from the DRC to the Course Faculty. (See SSM 701–01 for more information).

Note: Prior to receiving disability accommodations, verification of eligibility from the Disability Resource Center (DRC) is required. The DRC is located in University Center, 411 N. Central Avenue, Suite 160. DRC staff can also be reached at: 602-496-4321 (V), 602-496-0378 (TTY), and at: Disability-Q. Their hours are 8:00 AM to 5:00 PM, Monday through Friday. Eligibility and documentation policies can be viewed at: http://www.asu.edu/drc. Disability information is confidential.

Academic Conduct

Students are subject to the behavioral standards set forth in ASU Student Academic Integrity Policy (see Student Academic Integrity Policy) as well as the Student Code of Conduct (see SSM 104–01)

Avoid threatening behavior. Course faculty will manage any threatening behavior in accordance with SSM 104–02, “Handling Disruptive, Threatening, or Violent Individuals on Campus”.

Adhere to behavior standards for Computer, Internet, and Electronic Communications (see ACD 125)
- Turn off or mute all electronic devices during all course related activities. May respond or initiate use of electronic devices only in emergent situations or if faculty request you to use.
- Understand that during course related activities, computers, laptops, tablets, smart phones, etc may be used for course related purposes only.

Information in the syllabus, other than grade and absence policies, may be subject to change with reasonable advance notice.

Title IX
Title IX is a federal law that provides that no person be excluded on the basis of sex from participation in, be denied benefits of, or be subjected to discrimination under any education program or activity. Both Title IX and university policymake clear that sexual violence and harassment based on sex is prohibited. An individual who believes they have been subjected to sexual violence or harassed on the basis of sex can seek support, including counseling and academic support, from the university. If you or someone you know has been harassed on the basis of sex or sexually assaulted, you
can find information and resources at http://sexualviolenceprevention.asu.edu/faqs/students.

Chapter 1
A Visit to a Sleep Lab: Sleep Science at Work

If you were asked to determine if a person is asleep, you might check for the person's breathing, pulse, eye movements, or other signs. However, if you were asked if another person is asleep, you might ask if they are breathing regularly or if they have a pulse. Alternatively, you might ask if they are moving. There are two important implications of these observations: one is that the person is likely asleep, and the other is that they are not. Understanding the process of sleep and dreaming is crucial to comprehending how the brain functions and how our experiences shape our lives. In this chapter, we will explore the science of sleep and dreaming, focusing on the biological and psychological aspects of these processes.
