ARIZONA STATE UNIVERSITY
GENERAL STUDIES COURSE PROPOSAL COVER FORM

Course information:
Copy and paste current course information from Class Search/Course Catalog.

Academic Unit  Engineering - SSEBE  Department  Construction Management

Subject  CON  Number  101  Title  Construction and Culture: A built Environment  Units:  3

Is this a cross-listed course? (Choose one)
If yes, please identify course(s)

Is this a shared course? (choose one)  If so, list all academic units offering this course

Course description:

Requested designation: (Choose One)

Note: a separate proposal is required for each designation requested

Eligibility:
Permanent numbered courses must have completed the university's review and approval process.
For the rules governing approval of omnibus courses, contact Phyllis.Lucie@asu.edu or Lauren.Leo@asu.edu.

Submission deadlines dates are as follow:
For Fall 2015 Effective Date: October 9, 2014  For Spring 2016 Effective Date: March 19, 2015

Area(s) proposed course will serve:
A single course may be proposed for more than one core or awareness area. A course may satisfy a core area requirement and more than one awareness area requirements concurrently, but may not satisfy requirements in two core areas simultaneously, even if approved for those areas. With departmental consent, an approved General Studies course may be counted toward both the General Studies requirement and the major program of study.

Checklists for general studies designations:
Complete and attach the appropriate checklist
- Literacy and Critical Inquiry core courses (L)
- Mathematics core courses (MA)
- Computer/statistics/quantitative applications core courses (CS)
- Humanities, Arts and Design core courses (HU)
- Social-Behavioral Sciences core courses (SB)
- Natural Sciences core courses (SO/SG)
- Cultural Diversity in the United States courses (C)
- Global Awareness courses (G)
- Historical Awareness courses (H)

A complete proposal should include:

☑ Signed General Studies Program Course Proposal Cover Form
☑ Criteria Checklist for the area
☑ Course Catalog description
☑ Course Syllabus
☑ Copy of Table of Contents from the textbook and list of required readings/books

Respectfully request that proposals are submitted electronically with all files compiled into one PDF. If necessary, a hard copy of the proposal will be accepted.

Arizona State University Criteria Checklist for

GLOBAL AWARENESS [G]

Rationale and Objectives

Human organizations and relationships have evolved from being family and village centered to modern global interdependence. The greatest challenge in the nuclear age is developing and maintaining a global perspective which fosters international cooperation. While the modern world is comprised of politically independent states, people must transcend nationalism and recognize the significant interdependence among peoples of the world. The exposure of students to different cultural systems provides the background of thought necessary to developing a global perspective.

Cultural learning is present in many disciplines. Exposure to perspectives on art, business, engineering, music, and the natural and social sciences that lead to an understanding of the contemporary world supports the view that intercultural interaction has become a daily necessity. The complexity of American society forces people to balance regional and national goals with global concerns. Many of the most serious problems are world issues and require solutions which exhibit mutuality and reciprocity. No longer are hunger, ecology, health care delivery, language planning, information exchanges, economic and social developments, law, technology transfer, philosophy, and the arts solely national concerns; they affect all the people of the world. Survival may be dependent on the ability to generate global solutions to some of the most pressing problems.

The word university, from universitas, implies that knowledge comes from many sources and is not restricted to local, regional, or national perspectives. The Global Awareness Area recognizes the need for an understanding of the values, elements, and social processes of cultures other than the culture of the United States. Learning which recognizes the nature of others cultures and the relationship of America’s cultural system to generic human goals and welfare will help create the multicultural and global perspective necessary for effective interaction in the human community.

Courses which meet the requirement in global awareness are of one or more of the following types: (1) in-depth area studies which are concerned with an examination of culture-specific elements of a region of the world, country, or culture group, (2) the study of contemporary non-English language courses that have a significant cultural component, (3) comparative cultural studies with an emphasis on non-U.S. areas, and (4) in-depth studies of non-U.S. centered cultural interrelationships of global scope such as the global interdependence produced by problems of world ecology, multinational corporations, migration, and the threat of nuclear war.

Reviewed 4/2014
Proposer: Please complete the following section and attach appropriate documentation.

CON101  Construction & Culture: A Built Environment

Arizona State University | Del E. Webb School of Construction
Course Syllabus

COURSE INFORMATION
Semester: Spring
Time/Location: 9:00am MUR101
Website: Blackboard (https://myasucourses.asu.edu)

INSTRUCTOR INFORMATION
Instructor: Kraig Knutson
Office: CAVC466
Email: kraig.knutson@asu.edu
Office Hours: Tuesday & Thursday (9:00am – 10:15am)

OVERALL PROGRAM GOALS
Construction management professionals combine knowledge of innovative technologies, construction principles and business management to lead a wide variety of construction projects from residential and commercial buildings to infrastructure projects. The DEWSC program goals are to teach students how to become responsible leaders in the construction industry through organization, leadership, and current/innovative management techniques.

The American Council for Construction Education (ACCE) states that it is essential that every Constructor be capable of effectively managing personnel, materials, equipment, costs, and time. The Constructor must be able to effectively communicate and understand their role as a member of a multi-disciplinary team, the assessment of project risk, and the alternate methods that can be used to structure the owner-designer-constructor team.

PROGRAM LEARNING OUTCOMES:
1. Lead individuals and teams in the delivery of projects in the built environment
2. Communicate effectively in verbal, written, and graphic forms to all participants in the built environment
3. Behave ethically, professionally, and sustainably in the construction industry and society
4. Effectively analyze, plan, and manage the components of the construction supply chain and manage the necessary human, material, equipment, time, and financial resources therein
5. Think critically and solve complex construction management problems

COURSE DESCRIPTION
An analysis of the cultural context of construction, emphasizing its centrality in the evolution and expansion of the built environments as expressions of ethical and aesthetic value systems.

The purpose of this course is to broaden the student's awareness of the significance of construction as a discipline which affects, and is affected by, ethical and aesthetic values in all societies. It emphasizes the critical role that construction has played in the evolution of cultures and looks at the centrality of construction of today's rapidly changing world. The basis for forming sound judgments and developing wise philosophies in the diverse areas of the construction process will be illustrated. Specifically, the course will be devoted to an historical review of construction and a study of current global issues. Primary focus throughout course will be on the human elements and issues that have impacted the industry and society.
LEARNING OBJECTIVES
Upon completion of this course, students are expected to:

a. **Explain** the connection between construction and culture.
b. **Remember** and explain historical construction methods.
c. **Summarize** the differences between historic and current construction equipment.
d. **Identify** the role of the builder in the construction process.
e. **Explain** how we learn from construction failures.
f. **List** the types of falsework used in the construction process.
g. **Understand** the effects of forces on the structure.
h. **Identify** historical and modern methods to provide ventilation and illumination in buildings.
i. **Appreciate** the role of the craftsperson in the construction process.
j. **Summarize** historical and modern transportation systems.
k. **Analyze** various theories of pyramid construction.
l. **Understand** the structural systems and construction methods used to construct a gothic cathedral.
m. **Compare** the basic process of designing and constructing a building in the past and today.
n. **Present** a comparison of historical and current construction methods and materials in written and graphical communication.

TEXTBOOKS AND REFERENCE MATERIAL
The required textbook for this class is:

*Title:* Construction & Culture: A Built Environment, second edition

GRADING POLICY
The following criteria, weights, and grading scale will be used to calculate the Final Grade (the Instructor may modify/adjust as necessary):

COURSE POLICIES, PROCEDURES, AND REQUIREMENTS

Classroom Procedures – Please turn off your cell phones prior to attending class. Cell phone usage in class is not allowed (this includes texting). Food or drinks cannot be brought into the classroom.

General Responsibilities – The responsibility for learning rests with each student. The professor or lecturer will assist by making the classroom environment one conducive to learning but your preparation is essential! The student is responsible for reading all assignments, doing any assigned homework problems, and seeking assistance if needed. Each student is expected to bring all necessary tools to class (including any course materials, notes, calculators, writing materials, etc).

Attendance and Participation – Class attendance is mandatory. Absence from class may result in the loss of participation points. Much of the learning that occurs during this course happens in the classroom. If you are absent, for whatever reason, you lose the benefit of sharing of knowledge by the faculty and other students. Additionally, the class does not gain the benefit of sharing your knowledge and experience; thus, the learning experience is diminished and will be reflected in your grade. Punctuality, class attendance, participation and preparation are explicit reflections of your interest in the course.

Make-Up Policy – Prior notice, when possible, will be given to the instructor when a class will be missed. Only under the most extreme circumstances, supported by written documentation, will a make-up quiz or test be given. The final decision rests with the instructor. When a class is missed, it is the student’s responsibility to obtain notes and assignments from fellow classmates.

Exams/Quizzes – Quizzes and Tests will be taken on BlackBoard. Quizzes will not be announced in advance and may be announced at the beginning or the end of the class period. Once announced Quizzes and Tests will only be available online for 24 hours and will NOT be turned back on. Normally a quiz or Test will begin at 10:00am and be available until 10:00am the following day. Once you have started to take a Quiz you will have 10 minutes to complete it. Tests will be broken into 25 question blocks and each block will have a 30 minute time limit. Tests 1 and 2 will have two 25 question blocks – Test 3 will have four 25 question blocks.

Assignments – Assignments are due at the beginning of class and will be turned in on time and in class. Late assignments will not be accepted. Assignments must be submitted in a professional format – that means they must be neat, complete, and free of all spelling and grammatical errors.

Professional Work – To receive credit for your work, it is imperative the work be organized, readable, and professional (part of your grade will be based on presentation of your work).

Course Requirements – Students will be required to prepare a written report on assigned topics. All quizzes and tests will be of the subjective type. All questions about scores or grades on specific assignments must be brought to the attention of the instructor within one week of the return of the assignment.

UNIVERSITY POLICIES

Academic Integrity - All students in this class are subject to ASU’s Academic Integrity Policy (http://provost.asu.edu/academicintegrity) and shall acquaint themselves with its content and requirements, including a strict prohibition against plagiarism. By registration in this class, you are assumed to have read, understand and agreed to this policy. All violations will be reported to the Dean’s office, who maintains records of all offenses.

Student Code of Conduct - The Student Code of Conduct sets forth the standards of conduct expected of students who choose to join the university community. Students who violate these standards will be subject to disciplinary sanctions (http://students.asu.edu/srr/code).

Classroom Behavior - Any violent or threatening conduct by an ASU student in this class will be reported to the ASU Police Department and the Office of the Dean of Students. The use of recording devices is not permitted during class (unless permitted by the Instructor).
Religious Observances - Accommodations will be made for religious observances provided that students notify the instructor at the beginning of the semester concerning those dates. Alternative arrangements will generally be made for any examinations and other graded in-class work affected by such absences.

University Sanctioned Activities - Students who expect to miss class due to officially university-sanctioned activities should inform the instructor early in the semester. Alternative arrangements will generally be made for any examinations and other graded in-class work affected by such absences.

Disability Accommodations - Suitable accommodations will be made for students having disabilities and students should notify the instructor as early as possible if they will require same. Such students must be registered with the Disability Resource Center and provide documentation to that effect.

Academic Calendar - The academic calendar (https://students.asu.edu/academic-calendar) contains important dates that students should be aware of, including: the first and last day of class, drop/add deadlines, withdrawal deadlines, and observed holidays.

Copyright Protection - All contents of these lectures, including written materials distributed to the class, are under copyright protection. Notes based on these materials may not be sold or commercialized without the express permission of the instructor.

Syllabus Changes - Any information in this syllabus may be subject to change with reasonable advance notice.

DETAILED CLASS SCHEDULE
Class sessions will be in accordance with the attached schedule. The instructor reserves the right to modify and/or adjust the schedule.

See BlackBoard Announcements page

   Miscellaneous ............................................................................................................................. 196
Case Studies ....................................................................................................................................... 196
   Westminster Abbey—England .................................................................................................... 196
   What/Where ............................................................................................................................... 197
## Table of Contents

When/Why/Who ............................................................... 197
How (Size, Equipment, Materials) ...................................... 199
Westminster Cathedral ..................................................... 199
Sagrada Familia Cathedral—Spain ....................................... 200
What/Where ................................................................. 201
When/Why ................................................................. 201
Who ........................................................................... 202
How (Size, Equipment, Materials) ....................................... 203
Notre Dame de Paris (Our Lady of Paris)—France .................. 203
What/Where ................................................................. 203
When/Why ................................................................. 204
Who ................................................................. 205
How (Size, Equipment, Materials) ....................................... 206
The Gargoyles of Notre Dame ........................................... 206
Quasimodo—the Hunchback of Notre Dame .......................... 207
Summary .............................................................. 207
Review Questions/Assignments/Exercises ............................ 208

### Chapter 11  Pyramids of Egypt  ....................................... 209

Egyptian Culture and History ........................................... 209
Masasbas ................................................................. 209
The Step Pyramid of King Djoser ....................................... 210
Great Pyramid of Giza ..................................................... 211
Description of the Great Pyramid ....................................... 212
Who Built the Pyramids? .................................................. 213
Construction .............................................................. 214
Site Selection .............................................................. 215
Method of Finding True North .......................................... 216
Preconstruction Ceremonies ............................................. 217
Stone Quarries ............................................................. 217
Transporting the Stone ................................................... 218
Raising the Blocks ........................................................ 220
Controlling the Shape and Slope of the Pyramid .................... 223
Capstone ................................................................. 224
Mummification ............................................................ 225
  Mummification and Burial of the Pharaoh .......................... 225
Summary .............................................................. 227
Review Questions/Assignments/Exercises ............................ 228

### Chapter 12  Globalization—Twentieth Century ....................... 229

Introduction .............................................................. 229
Building the World ....................................................... 230
Issues and Concerns Affecting Global Construction .................. 230
  Sustainable Development ............................................. 230
  "Green Building ........................................................ 231
  Dealing with Obsolescence .......................................... 231
  Standardization ....................................................... 232
  Long Lead Times ...................................................... 232
Construction Relationships ............................................. 232
  Partnership ............................................................ 233
  Partnering ............................................................. 233
  Joint Ventures ......................................................... 233
  Alliance ............................................................... 234
  Co-operation Agreement ............................................. 234
| TABLE OF CONTENTS |  
|-------------------|---
| Consortium        | 234  
| Changes in the Procurement Process | 234  
| Design–Build      | 234  
| Construction Management at Risk | 235  
| Build–Operate–Transfer (BOT) | 235  
| Case Studies      | 236  
| The “Chunnel”     | 236  
| History           | 236  
| Description       | 237  
| Construction and Engineering | 237  
| Operation and Update | 238  
| Three Gorges Dam  | 239
