Arizona State University Criteria Checklist for

SOCIAL-BEHAVIORAL SCIENCES [SB]

Rationale and Objectives

Social-behavioral sciences use distinctive scientific methods of inquiry and generate empirical knowledge about human behavior, within society and across cultural groups. Courses in this area address the challenge of understanding the diverse natures of individuals and cultural groups who live together in a complex and evolving world.

In both private and public sectors, people rely on social scientific findings to consider and assess the social consequences of both large-scale and group economic, technological, scientific, political, ecological and cultural change. Social scientists' observations about human interactions with the broader society and their unique perspectives on human events make an important contribution to civic dialogue.

Courses proposed for a General Studies designation in the Social-Behavioral Sciences area must demonstrate emphases on: (1) social scientific theories, perspectives and principles, (2) the use of social-behavioral methods to acquire knowledge about cultural or social events and processes, and (3) the impact of social scientific understanding on the world.

ENG 312: General directions for doing the three assignments involving maps and linguistic usages

Your assignments ask you to gather examples of language use from other speakers of English. When you gather these examples from people, it is important for you to be sensitive about several issues. First, please don't give me or your colleagues the names of the people who volunteer to help you. Let them remain anonymous. What affects the choices they make has to do with where they were raised, their social identity, their age, etc. In your assignments you will often be asked to keep track of that information because it will affect a speaker’s responses, but that is all you need to know in order to understand their usage.

Second, please also be aware of something called the observer's paradox. People change their language choices when they are being observed and when they think that you might be making judgments about the way they speak. You shouldn't suggest usages or answers to those who help you or comment on what they are saying or doing as they do it. Lastly, when you are finished gathering the information you need, if your volunteers have questions go ahead and answer them, but try to remain 'objective.' These people, friends, family members have been kind enough to help you, and they are probably interested in what you have learned, but they aren’t looking to be critiqued.

Please remember as people are volunteering if they say they are too busy, find someone else who has the time.
