Rationale and Objectives

The humanities disciplines are concerned with questions of human existence and meaning, the nature of thinking and knowing, with moral and aesthetic experience. The humanities develop values of all kinds by making the human mind more supple, critical, and expansive. They are concerned with the study of the textual and artistic traditions of diverse cultures, including traditions in literature, philosophy, religion, ethics, history, and aesthetics. In sum, these disciplines explore the range of human thought and its application to the past and present human environment. They deepen awareness of the diversity of the human heritage and its traditions and histories and they may also promote the application of this knowledge to contemporary societies.

The study of the arts and design, like the humanities, deepens the student’s awareness of the diversity of human societies and cultures. The arts have as their primary purpose the creation and study of objects, installations, performances and other means of expressing or conveying aesthetic concepts and ideas. Design study concerns itself with material objects, images and spaces, their historical development, and their significance in society and culture. Disciplines in the arts and design employ modes of thought and communication that are often nonverbal, which means that courses in these areas tend to focus on objects, images, and structures and/or on the practical techniques and historical development of artistic and design traditions. The past and present accomplishments of artists and designers help form the student’s ability to perceive aesthetic qualities of art work and design.

The Humanities, Arts and Design are an important part of the General Studies Program, for they provide an opportunity for students to study intellectual and imaginative traditions and to observe and/or learn the production of art work and design. The knowledge acquired in courses fulfilling the Humanities, Arts and Design requirement may encourage students to investigate their own personal philosophies or beliefs and to understand better their own social experience. In sum, the Humanities, Arts and Design core area enables students to broaden and deepen their consideration of the variety of human experience.

Course Description: An introduction to world mythology via a comparative approach.

Enrollment Requirements: No prerequisites. Course fulfills the following General Studies requirements: TBD.

Course Overview: This course will guide students in comparing the mythology of a number of different cultures, including ancient Greek, Asian, Middle Eastern, European, Biblical, and aboriginal traditions. The readings and assessments for the course will be rooted in the relevant literature from each tradition. The course will therefore introduce students to (short selections from) texts from a variety of cultures, including ancient Greek epic and tragedy, the Bhagavad Gita, the classical Chinese epic Journey to the West, the various flood stories from Mesopotamian cultures, the Egyptian Book of the Dead, the Persian Shahnameh, and Old Norse sagas. In addition, students will encounter oral tradition and folklore from the Brothers Grimm, Slavic creature stories, Navajo texts, African records, and Mesoamerican cultures like the Aztecs. These types of texts will invite discussion of cultural appropriation and the modern uses of such traditions as well.

Student Learning Outcomes: After completion of the course, students will be able to:

- demonstrate knowledge of the mythological traditions of every major geographical area of the world
- assess new mythological material and place it within its cultural and thematic context
- compare and contrast mythological themes as expressed by different cultures with a view to insight both into mythology and culture
- analyze different cultures’ attitudes towards and use of mythology
- explore the use of mythology in the modern world
- evaluate the cultural appropriation of myth between cultures
- state the effect of increasing globalization on mythological traditions and studies

Required Materials:

- a few other readings are available on the Blackboard site
- a TurningPoint account (used with either a clicker, responseware.com, or the ResponseWare smartphone app)

Grading Scale:
The grading scale for the course will be as follows:

A+: 100 (A+'s are only given for natural 100s, before the addition of any extra credit that may be offered)
A: 93-99
A-: 90-92
B+: 87-89
B: 83-86
B-: 80-82
C+: 77-79
C: 70-76
D: 60-69
E: below 60

Breakdown of the Final Grade: Your final grade will comprise the weighted total of the grades from the following categories.

Attendance and Participation (measured by TurningPoint) 20%
Two midterms (15% each) 30%
Final examination 20%
Video presentation (5 minutes) 10%
Group activities on Blackboard (blog) 20%

Attendance and participation. Students are expected to attend class, as this is crucial to success in the course. Attendance will be measured by answering questions on the lecture and reading material for the day using a TurningPoint account via a clicker or responseware.com. Participation will be measured by answering opinion questions or polls during the lectures.

Two midterms. Each of the (roughly) first two-thirds of the course will end with a midterm examination or the final. The first midterm will be M 9/25, and covers the first three units of the course. The second midterm will be M 11/13, and covers units 4-6. The midterms are not cumulative, only covering their specific units.

Final Examination. The last third of the course will end with a final during final exam period (currently scheduled for M 12/4, 12:10-2 pm). The final will cover unit 7 and the
concluding lectures (not cumulative) and include an essay that is meant to demonstrate knowledge of the breadth of material covered in the course (cumulative).

Video presentation: Each student will create a five-minute video presentation comparing and contrasting two different myths. One myth will have been covered in the course; the other myth will not have been covered in the course and will be of the student's choosing.

Group activities on Blackboard (blog): Each student will be assigned to a group representing one of the cultures or areas covered in the course. For each unit, each student will submit a blog post on one of the myths covered in that unit for their culture, stating what they think are the most important themes and noting any parallels or correspondences with other cultures' mythologies.
