ARIZONA STATE UNIVERSITY EAST/TEMPE CAMPUS

GENERAL STUDIES PROGRAM COURSE PROPOSAL COVER FORM

Courses submitted to the GSC between 2/1 and 4/30 if approved, will be effective the following Spring.

Courses submitted between 5/1 and 1/31 if approved, will be effective the following Fall.

(SUBMISSION VIA ADOBE.PDF FILES IS PREFERRED)

DATE April 12, 2010

1. ACADEMIC UNIT: School of Human Evolution and Social Change

2. COURSE PROPOSED: ASB/SOS/SOC 370 Production, People and Environment 3
   (prefix) (number) (title) (semester hours)

3. CONTACT PERSON:
   Name: Alissa Ruth
   Phone: 5-4628
   Mail Code: 2402
   E-Mail: alissa.ruth@asu.edu; sharon.harlan@asu.edu

4. ELIGIBILITY: New courses must be approved by the Tempe Campus Curriculum Subcommittee and must have a regular course number. For the rules governing approval of omnibus courses, contact the General Studies Program Office at 965-0739.

5. AREA(S) PROPOSED COURSE WILL SERVE. A single course may be proposed for more than one core or awareness area. A course may satisfy a core area requirement and more than one awareness area requirements concurrently, but may not satisfy requirements in two core areas simultaneously, even if approved for those areas. With departmental consent, an approved General Studies course may be counted toward both the General Studies requirement and the major program of study.

   Core Areas
   Literacy and Critical Inquiry—L X
   Mathematical Studies—MA CS
   Humanities and Fine Arts—HU
   Social and Behavioral Sciences—SB X
   Natural Sciences—SQ SG

   Awareness Areas
   Global Awareness—G
   Historical Awareness—H
   Cultural Diversity in the United States—C
   (Note: one course per form)

6. DOCUMENTATION REQUIRED.
   (1) Course Description
   (2) Course Syllabus
   (3) Criteria Checklist for the area
   (4) Table of Contents from the textbook used, if available

7. In the space provided below (or on a separate sheet), please also provide a description of how the course meets the specific criteria in the area for which the course is being proposed.

   CROSS-LISTED COURSES: ☐ No ☑ Yes; Please identify courses: SOS and SOC

   Is this a multisection course?: ☐ No ☑ Yes; Is it governed by a common syllabus?

   Chair/Director (Print or Type) [Signature]

   Date: 4/12/10

   Effect Date Fall 2010

Rev. 1/94, 4/95, 7/98, 4/00, 1/02
Arizona State University Criteria Checklist for

LITERACY AND CRITICAL INQUIRY - [L]

Rationale and Objectives

Literacy is here defined broadly as communicative competence in written and oral discourse. Critical inquiry involves the gathering, interpretation, and evaluation of evidence. Any field of university study may require unique critical skills which have little to do with language in the usual sense (words), but the analysis of spoken and written evidence pervades university study and everyday life. Thus, the General Studies requirements assume that all undergraduates should develop the ability to reason critically and communicate using the medium of language.

The requirement in Literacy and Critical Inquiry presumes, first, that training in literacy and critical inquiry must be sustained beyond traditional First Year English in order to create a habitual skill in every student; and, second, that the skills become more expert, as well as more secure, as the student learns challenging subject matter. Thus, the Literacy and Critical Inquiry requirement stipulates two courses beyond First Year English.

Most lower-level [L] courses are devoted primarily to the further development of critical skills in reading, writing, listening, speaking, or analysis of discourse. Upper-division [L] courses generally are courses in a particular discipline into which writing and critical thinking have been fully integrated as means of learning the content and, in most cases, demonstrating that it has been learned.

Students must complete six credit hours from courses designated as [L], at least three credit hours of which must be chosen from approved upper-division courses, preferably in their major. Students must have completed ENG 101, 107, or 105 to take an [L] course.

Notes:

1. ENG 101, 107 or ENG 105 must be prerequisites
2. Honors theses, XXX 493 meet [L] requirements
3. The list of criteria that must be satisfied for designation as a Literacy and Critical Inquiry [L] course is presented on the following page. This list will help you determine whether the current version of your course meets all of these requirements. If you decide to apply, please attach a current syllabus, handouts, or other documentation that will provide sufficient information for the General Studies Council to make an informed decision regarding the status of your proposal.
Production, People and Environments

ASB/SOS/SOC 370

Description of how the course meets the Literacy and Critical Inquiry (L) criteria

(C-1) Ninety-five percent of the grade in this course is determined by individual written and oral assignments, including a research paper, written homework assignments with at least one class presentation, in-class debate topics with outside preparation, and an essay final exam. The proportionate weights assigned to activities are on page 2 of the syllabus. (Five percent of the 25% class participation grade is based on attendance. The other 20% is based on the homework assignments, which are described in a separate attachment.)

(C-2 and C-3) In addition to an essay exam, students gather, interpret, and evaluate evidence for an in-class debate and a research paper assignment. Each of these assignments is described here. Students form debate teams around resolutions that are derived from two major units of the course (example: The United States should ratify the 1998 Basel Ban, which prohibits the export of all forms of hazardous waste to developing countries.) Each student participates in one debate. Using debate rules adapted from the World Schools Debating Championships, each student is graded on a standard rubric by the instructor and one other student, who is responsible for submitting a written evaluation of the presenter. Students also write a 3,000 word research paper about a material good they select. They are graded on how well they describe, analyze, and evaluate: 1) how a particular good is embedded in a political economy of industries, government, other organizations, and places; 2) the environmental (social and natural) impacts of the product; 3) how (or whether it is possible) to create a more socially and environmentally sustainable product. Both of these assignments require students to gather additional evidence beyond the course reading assignments. They must use academic books and journals, national and international news sources, and Internet information.

(C-4) For the research paper assignment, students submit a research prospectus approximately six weeks before the final paper is due. (Previous to this, they also hand in five homework assignments on which they receive feedback on their ideas and writing styles.) The prospectus must identify: 1) the material good being investigated for the paper; 2) a thesis statement; 3) some of the environmental problems associated with the production of that good; 4) a preliminary list of the sources that will be used to collect the data; and 4) a diagram of the production process behind the creation of the particular good. The instructor provides written feedback and, if requested by students, oral feedback as well. A separate grade is assigned for the research prospectus, which must be handed in again with the final research paper. The extent to which students have integrated feedback into their final paper is a consideration in the final grade for the project.
Production, People and Environments
ASB/SOS/SOC 379

Description of how the course meets the Social and Behavioral Sciences (SB) criteria

(1) Production is the act of using human, economic, and natural capital to transform raw materials and energy into goods and services. This course uses social scientific theories and principles to understand the political economy of production. It covers the social shaping of production technologies, as well as social and environmental impacts of industrial and global production systems on workers' health and safety, the communities where production operations are located, and the earth's natural environment. Through an exploration of a global network of inter-connected production sites and case studies of local communities, students understand how industrial work technologies are shaped to produce goods for a global market. Connections to the globalization of production and consumption are made through sociological theories, such as world systems theory (Dickinson and Schaeffer readings), the treadmill of production theory, (Alan Schnaiberg readings), and the social shaping of work technologies (Wooding and Levenstein; Marx). Case studies of particular industries are used to illuminate relationships between social and natural environments in specific places. Readings by anthropologists (Thu and Durrenberger; Shostak; Diamond) explore the impact of industrial agriculture on human health, air pollution, and water quality in rural communities in the Midwestern U.S. The global factory of computer production and waste is used to explore the human and environmental impacts of mining, chip production, and electronic waste disposal in the Americas, Asia, and Africa. Other readings examine the national and international regulatory frameworks of industry, worker health and safety, and environmental protection.

(2) In this course, students do research in order to understand how changes in the social control of technologies and work practices can result in more sustainable production practices. They debate topics on the sustainable production of food and electronic items and they also write a paper on the production cycle of a material good that they select, emphasizing the social relationships and control inherent in production systems.

(3) Students read and write about a broad array of social scientific issues related to the political economy of work in historical and contemporary society, which increases their understanding of local to global social and economic relationships.
**ASU - [L] CRITERIA**

TO QUALIFY FOR [L] DESIGNATION, THE COURSE DESIGN MUST PLACE A
MAJOR EMPHASIS ON COMPLETING CRITICAL DISCOURSE—AS EVIDENCED BY
THE FOLLOWING CRITERIA:

<table>
<thead>
<tr>
<th>YES</th>
<th>NO</th>
<th>Identify Documentation Submitted</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Checkmark]</td>
<td>![Circle]</td>
<td>CRITERION 1: At least 50 percent of the grade in the course should depend upon writing, including prepared essays, speeches, or in-class essay examinations. Group projects are acceptable only if each student gathers, interprets, and evaluates evidence, and prepares a summary report</td>
</tr>
</tbody>
</table>

1. Please describe the assignments that are considered in the computation of course grades—and indicate the proportion of the final grade that is determined by each assignment.

2. Also:

   Please circle, underline, or otherwise mark the information presented in the most recent course syllabus (or other material you have submitted) that verifies this description of the grading process—and label this information "C-1".

| ![Checkmark] | ![Circle] | CRITERION 2: The composition tasks involve the gathering, interpretation, and evaluation of evidence |

1. Please describe the way(s) in which this criterion is addressed in the course design

2. Also:

   Please circle, underline, or otherwise mark the information presented in the most recent course syllabus (or other material you have submitted) that verifies this description of the grading process—and label this information "C-2".

| ![Checkmark] | ![Circle] | CRITERION 3: The syllabus should include a minimum of two substantial writing or speaking tasks, other than or in addition to in-class exams |

1. Please provide relatively detailed descriptions of two or more substantial writing or speaking tasks that are included in the course requirements

2. Also:

   Please circle, underline, or otherwise mark the information presented in the most recent course syllabus (or other material you have submitted) that verifies this description of the grading process—and label this information "C-3".

**PRODUCTION, PEOPLE & ENVIRONMENTS**  
**School of Human Evolution & Social Change**  
M - W 2:00 - 3:15  
Fall 2009  
Payne Hall (EDB) 205

Instructor: Dr. Sharon Harlan  
Office hours: M - W 3:15 - 4:15 and by appointment  
Office: School of Human Evolution and Social Change 260  
E-mail: sharon.harlan@asu.edu  
Phone: 480-727-6780

**Course Description:** Production is the act of using human, economic, and natural capital to transform raw materials and energy into the “stuff” of the material world. Throughout history, production sites have included homes, fields, seas, mines, factories, and offices. These workplaces have continued to evolve in response to ideologies, technologies, and the circulation of capital, until today we have a vast global network of inter-connected production sites that serve the interests of the few rather than the many. The premise of this course is that the path to creating a sustainable world – a global society that protects and preserves the health of people, communities, and the natural environment – is through changing the way we produce our goods and services.

**Goals:**  
We will explore four important questions about production cycles, from the origins in raw materials of the earth, through processing goods on farms and in factories, to the handling of waste generated by production and consumption.  
1) How are goods made in pre-industrial and industrial systems of production?  
2) What are the observed consequences of industrial technologies for work environments, community environments, and the natural environment?  
3) Why do societies choose methods of production that are environmentally unsound?  
4) Are there strategies for creating healthier and sustainable production cycles that have positive global impacts?

**Outcomes:**  
In this course, students will learn how to apply social scientific theories and principles to understanding the relationship between social and environmental changes. Through discussion, debate, and written assignments, you will learn to communicate views formulated from empirical evidence and reasoned analysis.

**Prerequisite:** Students must have completed ASB 102 or ASB 100 or SSH 100 or SOC 101 or SOS 101 or SOS 110 and must have completed ENG 102/108 or ENG 105 with grade C or better.

**Required Reading:**

3. All other readings for this course are posted on or accessed through Blackboard. They are in the Course Documents folder, organized in unit folders and subfolders labeled with reading due dates. Within the folders, file labels correspond to authors’ last names listed in the syllabus. 

***I expect you to be in class and to read the daily assignments before class.***

***Bring hard copies of your reading material to class.***

**Course Requirements:** There are multiple components to your grade, all of which measure knowledge and written or oral communication skills. More detail is given in separate handouts.

**Class participation:** Class participation is heavily weighted in this course – it is worth 25% of your grade. HOWEVER, there is work required in participation and you must earn your class participation grade. Your score includes attendance, AND preparation for class (reading ahead of time), AND contributions to class discussions, AND handing in assignments related to reading (as described next). We will also discuss relevant current events once a week and you should plan on submitting at least one during the semester.

**Homework Assignments Related to Reading:** There are 5 homework assignments related to the readings. Four of these are about one-page in length and are due for everyone on the same date listed in the syllabus. In addition, each person will sign up for one class where they will contribute a short summary of the day’s reading and a discussion question. These assignments will not be graded but will each count toward class participation.

**Debate:** Using different perspectives on production that are covered in reading assignments, we will hold class debates on propositions after each main unit on meat, computers, and sustainability. For example, a simple proposition might be, “Corporations have a responsibility to improve the environment.” Students will work together in teams to develop arguments. Each student will make a short individual presentation for the team and will also have the opportunity to serve as a presentation judge with a rating rubric.

**Research Project:** This will begin in September and continue until the end of the semester. You will be graded separately on a draft summary and outline of the project and on the final paper, which will incorporate the instructor’s feedback on the draft. The project involves investigating the production process of a good or service of your choice and tracing the impacts of that product. You will be asked to present evidence showing how human uses of technology affect social and natural environments. The instructions for preparing the research paper are described in a separate handout and I will discuss them in class.

**Final Exam:** There will be a final exam during the scheduled final exam period. This will contain short answer and essay questions

**Late Assignments:** There is a penalty of minus 5 points for each day an assignment is late. Illnesses or legitimate family-related excuses must be documented. I will not accept late work for the assignments related to readings.

**Grading:**

<table>
<thead>
<tr>
<th>Components of your grade:</th>
<th>Grading Scale:</th>
</tr>
</thead>
<tbody>
<tr>
<td>25% = Class participation</td>
<td>A+ = 97-100</td>
</tr>
<tr>
<td></td>
<td>C+ = 77-79</td>
</tr>
</tbody>
</table>
10% = Outline, Research Project  
20% = Debate  
25% = Research Report  
20% = Final Exam  

Attendance: I will take attendance on random days. If you are absent, you must provide documentation if you were ill or encountered some emergency in order to receive an excused absence. Absences that are undocumented are unexcused. Points will be deducted from your class participation score for unexcused absences. Having no unexcused absences will boost the class participation score, but your biggest benefit is that attendance will help ensure that you learn something. Besides, this course is very interesting.

Academic standards:  
Academic dishonesty includes borrowing ideas without proper citation, copying others’ work (including information posted on the internet), and failing to turn in your own work for group projects. Please be aware that the work of students suspected of academic dishonesty will be scanned using SafeAssignment on Blackboard, which compares them against everything posted on the internet, online article/paper databases, newspapers and magazines, and papers submitted by other ASU students. If you are caught plagiarizing, you will automatically receive an “E” for the assignment and will be reported to administration. Students are responsible for understanding ASU’s policies: http://provost.asu.edu/academicintegrity.

Student Support and Disability Accommodations  
ASU offers support services through Counseling (http://students.asu.edu/counseling), the Learning Resources Center (www.asu.edu/lrc), and the Disability Resource Center (http://www.asu.edu/studentaffairs/ed/drc/). If you are a student in need of special arrangements for we will do all we can to help, based on the recommendations of these services. For the sake of equity for all students, we cannot make any accommodations without formal guidance from these services.

Accommodations: Please see me as soon as possible if you have any special concerns or problems this semester that I should know about. Students with disabilities who would like to request a reasonable accommodation should contact us so we can make arrangements. Disability information is kept confidential.

Class Schedule and Assignments:
***I may make minor adjustments in the syllabus. Any changes will be announced in class and posted on Blackboard.***

Acknowledgments

The crafting of a multiple-authored volume is a challenge requiring patience and flexibility among contributors. We thank all of the authors for their willingness to work together and for their unflagging responsiveness to editorial requests and deadlines. A special note of gratitude is owed to Prof Walter Goldschmidt for his support of this effort and for reviewing all chapters. We hope this volume is a reminder of the enduring value of his reticent and empirical contributions to understanding the role of food production and affection.

Julia Venzke played a pivotal role in helping to edit chapters, prepare illustrations and tables, check bibliographies, and electronically assemble the volume. Without her keen assistance and sharp eye we would still be flummoxed by our electronic ineptitudes. Thanks to Judy Thiriat for her assistance in preparing the details of this volume, and thanks also to W. Jamie Ward for help in preparing the tables.

And finally we owe a debt of gratitude to the hundreds of farmers and other rural residents who invited us into their homes and neighborhoods to explain to us the changes occurring in their communities. We hope this volume provides others with a broader understanding of those changes and their significance for the health of our society.
