RE:        STS Courses Submitted for General Studies Review

Earlier this year the ABOR approved the B.S. degree program in Science, Technology, and Society for the Polytechnic campus (see attached memorandum from Provost Capaldi). Science, Technology, and Society (STS) is a social science discipline that investigates the interrelationship of science/technology and human systems. Typically, issues concerning the impact of science/technology on globalization, reproductive technology and human values, information technology and human relations, and science/technology and public policy and governance all come under the general domain of studies in STS. All of the STS courses included in this review are required to support this new degree program. These courses have all gone through the ACRES process and have received final approval (see attached front sheet from ACRES).

Course Description:

Information technology has revolutionized the political process both in determining who gets into office and the decision-making process once they get into office. Some would argue that this revolution will lead to a far more responsive and effective interactive democracy, where as others believe that information technology is going to allow the entrenched leaders of the “system” to have more control over the body politic.

Learning Outcomes

- Students will be able to articulate how information technology shapes the decision making process both in terms of electoral politics and governmental decision making.
- Students will have developed and are able to express their own position on what needs to be done in terms of the adoption of information technology to enhance democracy.
- Students will hone their ability to write one page essays with a strong thesis, argument, and conclusion.

**Graded Work**

**Homework**

Each week you will prepare a 1 page essay that draws from the text we are studying. You are not expected to re-capitulate the text. Rather, I expect you to come up with a thought provoking thesis drawn from policy making today, that you can argue for in three to four paragraphs. The essay should be single spaced and use the MLA citation system. Past students have often found an article on the Web that they can organize their essay around.

**Class Participation**

To earn full credit for class participation, you need to make a positive contribution to the discussion. Such contributions can take the following forms: Asking thoughtful questions and offering comments that move a discussion forward, showing respect for other members of the class—even if you disagree with them.

**Grading**

As the following table suggests, all of the work in the course is important because all of it is designed to help you achieve the general learning goals.

**Grading Scale**
Course Policies

**Missing Work:** Please note that if you don’t submit written work, you will receive a zero for that work.

**Late Work:** If any of your essays are late, I will reduce your grade by one-third of a letter for each weekday that it’s late. For instance, if you earn a “B” on a paper that was due on Wednesday but you turn it in on Friday, I will record “C+” in the grade book.

**Incomplete Grades:** A course grade of “Incomplete” will be given only in extreme situations because the sad story is that most students who request incompletes never finish the course. Please visit [http://www.asu.edu/registrar/forms/rcgforms.html](http://www.asu.edu/registrar/forms/rcgforms.html) under the Academic Record Forms section for the Incomplete Grade Request form, which is available in both Word and as a PDF. The form must be completed by the student, signed by the student, the instructor, and the department chair or school director. The completed form must be filed with Janice Frangella (Santa Catalina Hall, Room 233V) before the grade of "I" is given.

**Student Conduct:** Students are required to adhere to the behavior standards listed in Arizona Board of Regents Policy Manual Chapter V – Campus and Student Affairs: Code of Conduct ([http://www.abor.asu.edu/1_the_regents/policymanual/chap5/chapter_v.htm#C.%20CODE%20OF%20CONDUCT](http://www.abor.asu.edu/1_the_regents/policymanual/chap5/chapter_v.htm#C.%20CODE%20OF%20CONDUCT)), ACD 125: Computer, Internet, and Electronic Communications ([http://www.asu.edu/aad/manuals/acd/acd125.html](http://www.asu.edu/aad/manuals/acd/acd125.html)), and the ASU Student Academic Integrity Policy ([http://www.asu.edu/studentaffairs/studentlife/judicial/academic_integrity.htm](http://www.asu.edu/studentaffairs/studentlife/judicial/academic_integrity.htm)).

Students are entitled to receive instruction free from interference by other members of the class. If a student is disruptive, an instructor may ask the student to stop the disruptive behavior and warn the student that such disruptive behavior can result in withdrawal from the course. An instructor may withdraw a student from a course when the student's behavior disrupts the educational process under USI 201-10 ([http://www.asu.edu/aad/manuals/usj/usj201-10.html](http://www.asu.edu/aad/manuals/usj/usj201-10.html)).

**Accommodations for Disabilities:** Accommodations for disabilities will be made according to the policy of Arizona State University in compliance with the Americans with Disabilities Act. If you have concerns not addressed by these policies, reasonable accommodations may be made contingent upon circumstances and the approval of the instructors and administrators in the College of Education. For more details about ASU’s Disability Resource Center, point your browser to [http://www.asu.edu/studentaffairs/ed/drc/](http://www.asu.edu/studentaffairs/ed/drc/).

**The Public Nature of the Class (Writing and Discussion):** Part of becoming an effective writer is learning to appreciate the ideas and criticisms of others, and in this course our purpose is to
come together as a community of writers. Remember that you will often be expected to share your writing with others. Avoid writing about topics that you may not be prepared to subject to public scrutiny or that you feel so strongly about that you are unwilling to listen to perspectives other than your own. You are free to express your perspectives in writing and discussion, but you also need to write responsibly, contemplating the possible effects on others and on yourself.

**Attendance:** Because class participation is so important in grasping the relevance of these writers, you are expected to be in class each day. As we will discuss during the first class meeting, missing class will negatively affect your grade in several ways.

**Bringing work to class:** In the course schedule, I've listed work that is due throughout the semester.

**Time Commitment:** You should plan to spend two to three hours a week outside of class working on your assignments for every credit hour for this course (e.g., three credit hours equals nine hours a week of work that you should do outside of class). Writing classes often require more time from students than some other classes do.

**Keeping Your Work:** Please keep your work after any course has ended. You may need it for such things as grade appeals.

**Labeling Work:** To avoid confusion, please label all of your work carefully. Include your name, the course prefix and number, the date of submission, the assignment label, some indication of the version, and a descriptive title. For instance:

```

October 9, 2008

SOCIAL AND BEHAVIORAL SCIENCES [SB]

Rationale and Objectives

The importance of the social and behavioral sciences is evident in both the increasing number of scientific inquiries into human behavior and the amount of attention paid to those inquiries. In both private and public sectors people rely on social scientific findings to assess the social consequences of large-scale economic, technological, scientific, and cultural changes.

Social scientists' observations about human behavior and their unique perspectives on human events make an important contribution to civic dialogue. Today, those insights are particularly crucial due to the growing economic and political interdependence among nations.

Courses proposed for General Studies designation in the Social and Behavioral Sciences area must demonstrate emphases on: (1) social scientific theories and principles, (2) the methods used to acquire knowledge about cultural or social events and processes, and (3) the impact of social scientific understanding on the world.
### ASU-[SB] CRITERIA

<tr>
<td>Course is designed to advance basic understanding and knowledge about human interaction and emphasizes the study of social behavior such as found in anthropology, economics, cultural geography, history, political science, social psychology, and sociology.</td>
<td>This survey course for the B. S. in Science, Technology, and Society examines the foundations of the interrelations of science, technology and democratic governance with emphasis on the American political system. For this course to be successful, it will not only treat the place of science and technology in human interaction, but it must also treat in detail the basic materials covered in an American government, public policy, and public institutions courses. Thus, this course is core social and behavioral science material in letter and in spirit.</td>
<td>The learning outcomes in this course require that students gain an understanding of how information technology shapes the decision-making process both in terms of electoral politics and governmental decision-making and the adoption of information technology to enhance democracy.</td>
</tr>
<tr>
<td>Course emphasizes both the distinct knowledge of the social and behavioral sciences and the distinct methods of inquiry of the social and behavioral sciences.</td>
<td>The course emphasizes the interrelationship between science and technology and governance. Again, this is core social science material.</td>
<td>The list of the books in this course speaks directly to its place as mainstream social science core material. These books talk about Congress and the internet, democracy and the internet, electronic democracy, digital divide, and civic engagement (remember the elections of 2004 and the case of Florida’s hanging chads).</td>
</tr>
<tr>
<td>Course illustrates use of social and behavioral science perspectives and data.</td>
<td>The course relies on accumulated literature predicated upon practical and theoretical evidence based upon social and behavioral perspectives and data.</td>
<td>The kinds of governance issues addressed in the texts listed for this course speak for themselves. These issues are baseline social science perspectives and are based on social science data.</td>
