ARIZONA STATE UNIVERSITY

GENERAL STUDIES PROGRAM COURSE PROPOSAL COVER FORM

Courses submitted to the GSC between 2/1 and 4/30 if approved, will be effective the following Spring.

Courses submitted between 5/1 and 1/31 if approved, will be effective the following Fall.

(SUBMISSION VIA ADOBE.PDF FILES IS PREFERRED)

DATE 3/2/09

1. ACADEMIC UNIT: School of International Letters and Cultures

2. COURSE PROPOSED: SLC 201 "Introduction to Language and Linguistics" 3.0
   (prefix) (number) (title) (semester hours)

3. CONTACT PERSON: Dan Devitt
   Name: Dan Devitt  Phone: 7-0098
   Mail Code: 0202  E-Mail: ddevitt@imap3.asu.edu

4. ELIGIBILITY: New courses must be approved by the Tempe Campus Curriculum Subcommittee and must have a regular course number. For the rules governing approval of omnibus courses, contact the General Studies Program Office at 965-0739.

5. AREA(S) PROPOSED COURSE WILL SERVE. A single course may be proposed for more than one core or awareness area. A course may satisfy a core area requirement and more than one awareness area requirements concurrently, but may not satisfy requirements in two core areas simultaneously, even if approved for those areas. With departmental consent, an approved General Studies course may be counted toward both the General Studies requirement and the major program of study. (Please submit one designation per proposal)

   Core Areas
   - Literacy and Critical Inquiry—L
   - Mathematical Studies—MA
   - Humanities, Fine Arts and Design—HU
   - Social and Behavioral Sciences—SB
   - Natural Sciences—SQ

   Awareness Areas
   - Global Awareness—G
   - Historical Awareness—H
   - Cultural Diversity in the United States—C

6. DOCUMENTATION REQUIRED.
   (1) Course Description
   (2) Course Syllabus
   (3) Criteria Checklist for the area
   (4) Table of Contents from the textbook used, if available

7. In the space provided below (or on a separate sheet), please also provide a description of how the course meets the specific criteria in the area for which the course is being proposed.

CROSS-LISTED COURSES: ☑ No ☐ Yes; Please identify courses: ________________________________

Is this a multisection course?: ☑ No ☐ Yes; Is it governed by a common syllabus? Yes

Robert Joe Cutter
Chair/Director (Print or Type)

Date: 3/5/09

New Course
SLC 201 - Introduction to Linguistics

Course description: Examines the nature and diversity of world languages, linguistic structures and functions of language, language variation, pragmatics, and language acquisition.

Enrollment requirements: None
SLC 201
"Introduction to Language and Linguistics"
Spring 2009
TTh 3:00PM – 4:15PM
Durham Languages & Literature 275

INSTRUCTOR: Dan Devitt
E-MAIL: ddevitt@imap3.asu.edu
OFFICE: LL 649C

OFFICE HOURS: MW 3:30 - 5:30,
or by appointment

Course Description:
This course offers a broad overview of language and the social and psychological phenomena associated with its use. Our aim is to identify elements that are shared by all languages, as well as the range of devices and strategies that different languages use to perform the same function. We will examine the definitional characteristics of language and general aspects of its structure and organization. We will also delve into issues related to the use of language, including how language users construct conversations, why and how languages develop dialects, and how language is learned and organized in the brain.

This course is a requirement for all majors in the School of International Letters and Cultures.

Required Text:
Language Files: Materials for an Introduction to Language and Linguistics (10th Edition) by Department of Linguistics, the Ohio State University. Columbus, OH: The Ohio State University Press.

The textbook is available at the ASU Bookstore.

Course Objectives:
Students in this course will:
- understand the definitional properties of language
- develop a critical awareness of explanations for language-related phenomena
- learn a vocabulary for talking about language and linguistic phenomena
- develop basic knowledge of procedures in linguistic analysis
- develop general academic skills in critical thinking, technological literacy and communication

Course Requirements:
The final grade in the course will be based on the student’s performance in the following areas:

<table>
<thead>
<tr>
<th>Attendance</th>
<th>10%</th>
</tr>
</thead>
<tbody>
<tr>
<td>Participation</td>
<td>10%</td>
</tr>
<tr>
<td>Written Assignments</td>
<td>20%</td>
</tr>
<tr>
<td>Thematic quizzes</td>
<td>40%</td>
</tr>
<tr>
<td>Final Exam</td>
<td>20%</td>
</tr>
</tbody>
</table>
Explanation of course requirements

Attendance and Participation (10% each):
- Students are expected to come to class and to participate actively in the course. Therefore, this grade will be based on a general evaluation of students’ participation in terms of (a) attendance and punctuality, and (b) class, group, and pair discussions.

Punctual attendance is required unless a student has a legitimate excuse (e.g., documentation of a medical or other type of emergency). Students who are absent or late are responsible for finding out what they have missed. Repeated unexcused absences or lateness will result in a significant deduction in the final total of points for attendance.

<table>
<thead>
<tr>
<th>Students critically assigned class as a students sets, carry discussion questions</th>
<th>Zero or one absence</th>
<th>10 points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Two absences</td>
<td>9 points</td>
<td></td>
</tr>
<tr>
<td>Three absences</td>
<td>8 points</td>
<td></td>
</tr>
<tr>
<td>Four absences</td>
<td>7 points</td>
<td></td>
</tr>
<tr>
<td>Five absences</td>
<td>5 points</td>
<td></td>
</tr>
<tr>
<td>Six absences</td>
<td>3 points</td>
<td></td>
</tr>
<tr>
<td>Seven or more absences</td>
<td>0 points</td>
<td></td>
</tr>
</tbody>
</table>

must come to class prepared to engage in the material covered in the readings in small groups or with the whole. Throughout the semester, will collaborate to solve problem out mini-projects and answer discussion questions. For most major themes treated in the course, students will participate in a discussion on a topic related to the theme using the Discussion board function in Blackboard. Further guidelines will be distributed.

Written assignments (20%):
- Throughout the semester students will be expected to complete written assignments, which may take the form of responding to guiding questions from readings, applying new knowledge (e.g., problem-solving activities), making identifications or giving definitions, critically reviewing materials, writing essays or reflections on concepts discussed in class, and comparing/contrasting key concepts.

There are two main types of written assignments: exercises from the textbook and written projects. The exercises from Language Files listed in the course calendar are intended to expose you to data and concepts we discuss in class. Answers to these exercises should be written out and handed in. These assignments will be graded on a pass/fail basis. The other assignment type is the written project. There will be three projects over the semester, and they will require you to collect and organize data and react to critical questions. Specific guidelines for each project will be made available on the dates indicated on the calendar. The projects will be evaluated on a five-point scale, based on effort (thoroughness of development of thoughts), completeness of assignment, evidence of critical thinking, organization, creativity, and use of academic English.

Students’ punctual submission of assignments is required unless (a) a student makes prior arrangements with the instructor, or (b) a student has a legitimate excuse (e.g., documentation of a medical or other type of emergency). Unexcused missed deadlines will result in a deduction in the grade for the assignment.
**Quizzes (40%)**
- There will be quizzes given quarterly to test students’ command of major concepts in the course content. Quizzes will be administered through Blackboard, and they will include questions in a variety of formats: multiple choice, fill-ins, matching, definitions, data analysis and/or essays.

**Final Exam (20%)**
- The final exam for this course will also be given online through Blackboard. The exam will be comprehensive, and the format will be similar to that of the quizzes.

**Tentative Schedule of Topics**
*(subject to revision)*

Examples of past projects assigned in SLC 201
SLC 201 “Introduction to Language and Linguistics”
FIRST PROJECT – The Loss of Linguistic Diversity

In class we talked about the difficulties of getting an exact count of languages in the world, and one of the more reasons why it is difficult to get an accurate count is the rate at which languages are disappearing. For this first project you will be looking into language loss and reacting to your findings.

The primary resource you will consult for this project is Ethnologue, an encyclopedic collection of information about languages, their genetic affiliation and their speakers. A web-based version of Ethnologue can be found at http://www.ethnologue.com/web.asp.

1. For the first part of the project you are going to collect some basic numerical information and summarize it in a table.
   a. To get a general sense of the range of diversity and language spread, go to the Statistical Summaries (right side of the page under “Table of Contents”) and click on the summary “by World Region.” Which region of the world has the largest number of languages? Which region has the smallest number? Record this information in the first column of a table arranged from the highest to the lowest.
   b. Go back to the Table of Contents and click on “Nearly Extinct Languages.” In the second column of the table, record the values for each of the regions in the appropriate row.
   c. One might argue that it is possible to compare regions on their rates of language extinction. In a third column, figure out the rate of extinction as a simple ratio of the number of nearly extinct languages divided by the number of living languages.
   d. Go down the list of nearly extinct languages and for each region (i.e. Asia, Africa, etc.) identify the endangered language that has the largest number of remaining speakers. Record this information in a fourth column in the table. (For purposes of this exercise, only use confirmed speaker numbers. Ignore figures given for “ethnic population” since this typically means that, although the people can be identified as ethnically distinct, most of them no longer use their heritage language.)

2. Some scholars suggest that the numbers of speakers that Ethnologue indicates as marking “nearly extinct” languages are misleadingly low, and that languages with much larger populations of speakers can still be considered endangered. For the second part of the project we’ll focus on one particular sub-region: North America (Canada, US, and Mexico). Create a second table in which you summarize the following information: (All of this information is available in the individual entries for each of the countries.)
   a. How many living languages are spoken in each country?
   b. How many of those living languages have 10,000 or more speakers?
   c. How many of those living languages have 100,000 or more speakers? (for this category, also record the names of the individual languages)
   d. How many of the languages listed are extinct?

3. Write a brief essay reflecting on the issue of language endangerment and your impressions from sifting through the data available in Ethnologue. In your essay, you are free to comment on anything relevant to the issue of language death and linguistic diversity, but you should make a point of saying which of the three approaches to language endangerment discussed in class – Conservationist, Preservationist, or Evolutionist – you would consider to best reflect your attitude and why, and how (or whether) your ideas about language diversity have changed over the course of looking into this issue.

The project should typewritten. It can be submitted wither in hard form in class or in digital form through email. It is due by February 20th.
SLC 201 – “Introduction to Language and Linguistics”
PROJECT 3 - Sociolinguistics

Do ONE of the following:

**Option 1**
Investigate Spanglish. There seems to be a difference of opinion among linguists as to what the linguistic status of Spanglish is. Is it a dialect of Spanish? A dialect of English? A pidgin? A creole? Ask several Spanish-English bilinguals their opinion of Spanglish. (Try to get a range of respondents—different ages, different backgrounds) What do they think it is? Do they have a positive opinion of it, a negative opinion, or a neutral opinion? What is their impression as to who uses Spanglish? What is the function of Spanglish? In your reflective essay, report the general trends that you noted from your interviews. Do the answers help you make a decision as to what the status of Spanglish is?

**Option 2**
Watch two hours of television (I told you that linguistic data is everywhere), changing the channel every half hour. For each half hour segment, make notes about the different dialects you hear. Try to identify one example of from each of the levels of dialect variation we talked about in class (accent, lexicon, sentence structure). Summarize your findings in a table, and write a reflective essay reacting to the exercise. In your reflective essay, address the following points:

- do the dialect features seem authentic? (e.g., do the people who are supposed to be about your age talk like you, use the slang terms you use, etc. We also talked about some features of African-American vernacular. Do African-American characters seem to be using those features as they’ve been described by linguists?)
- are dialects used to convey information about characters (e.g. in class we mentioned the commonly observed correlation between the Southern accent and implied lack of intelligence), and if so, what correlations can you note.
- what do you feel is the purpose of any dialect features used in the examples you viewed? are they there for comic effect? do they add authenticity to the dialogue? would the program, have been effective without the dialect features? explain why or why not.

**Option 3**
Investigate attitudes about dialects. Ask ten to twelve people to identify the regions of the U.S. where the people speak the best English and the worst English. (This recreates a research project done by Professor Dennis Preston in a clip we saw from Do You Speak American? You can download materials at the shows website: http://www.pbs.org/speak/speech/mapping/map.pdf.) I compiling data, be sure to collect background information about your respondents (i.e., age, native region (where did they grow up), language background). You should also ask respondents to describe the characteristics of the regional dialects that they consider to be the best and the worst. Also ask respondents to evaluate their own language: do they speak standard English? Finally, ask respondents whether it’s important to speak standard English and why/why not, and whether dialects have any function. Summarize the responses in a table and write a reflective essay on the results. Your essay should address the following points:
• Is there an identifiable trend in people's attitudes about different dialects of American English? (is there a particular region all or most people associate with incorrect usage or correct usage? Does it relate to the respondents' native region?)

• What are the ramifications of the responses you get? What does a negative attitude about the dialect of a particular region imply? If respondents' don't evaluate their own dialect highly, what does that mean? How might such negative attitudes play out in real life?

• Are the attitudes linguistically valid? Do respondents' answers seem to accurately describe actual features of the regions they identify, or are they stereotypes? Do respondents maintain that there are people who always speak standard English?
SLC 201 - Introduction to Language and Linguistics  
Project #3 - Slang

As has been mentioned, dialect differences may be noted in all levels of language—vocabulary, pronunciation and grammar. Of these three major components of variation, the vocabulary, or lexical variation, is probably the area in which people note these differences most readily. Slang is an example of this kind of lexical variation. The variation often goes along with other divisions that occur within speech communities, i.e. they occur along regional, social, ethnic or generational lines.

Another point we made is that most slang terms aren’t usually around long enough to enter the mainstream; therefore, you can’t look them up in dictionaries or usage guides. Despite that fact, people do develop usage patterns that suggest they have an awareness of constraints on usage. In this project, you’ll examine contemporary slang and attempt to do a basic lexicographic description of them.

1. Think of at least five slang terms that you use yourself or that you observe your peers using. For each term, offer a preliminary definition in your own words. (Also as you do this, think of what makes these examples of slang. How do you know that they are slang?)

2. Ask five of your peers what the term means, i.e. have them define the word for you in other words. In addition, have them use the word in a sentence (or if at all possible, recall an actual use of the term.)

3. Try to uncover the connotations of each term. Do people think of it as having positive connotations (Do you use it to praise people or show admiration?), negative connotations (Do you use it to insult people?) or neutral connotations?

4. Try to uncover the register of each term. As slang terms, all are going to be considered informal, but see if you can get people to differentiate between them in terms of whether they are polite (acceptable in use with acquaintances), familiar (only used with intimate friends) or vulgar (cannot be used, e.g. with members of the opposite gender or members of the older generation).

5. Compile your findings into a mini-dictionary. (Remember: dictionaries are descriptive grammar.) For each entry, indicate part of speech, a generalized sense (based on what seems to be common to all the definitions you collected), an example of the term in use, and descriptive notes of its connotations and register.

6. Ask three older people what the five terms mean and collect their responses. Ask them for two terms they think of as slang.

7. Write a reflective essay reacting to the process and what it tells you about slang. You can comment on any aspect that impresses you, but you should be sure to include some discussion on the following points:

   - what is slang?

   - how much variation did you find in definitions offered by your peers for the slang terms? was there general agreement or wide variation? what does that tell you about lexical knowledge in a speech community?

   - how does slang relate across generations? were older speakers aware of your generation’s slang? did you know the slang terms the older respondents offered up? are they, in your opinion, slang? if someone uses those slang terms, does it sound funny? what does that suggest about the life cycle of slang terms?
Arizona State University Criteria Checklist for

GLOBAL AWARENESS [G]

Rationale and Objectives

Human organizations and relationships have evolved from being family and village centered to modern global interdependence. The greatest challenge in the nuclear age is developing and maintaining a global perspective which fosters international cooperation. While the modern world is comprised of politically independent states, people must transcend nationalism and recognize the significant interdependence among peoples of the world. The exposure of students to different cultural systems provides the background of thought necessary to developing a global perspective.

Cultural learning is present in many disciplines. Exposure to perspectives on art, business, engineering, music, and the natural and social sciences that lead to an understanding of the contemporary world supports the view that intercultural interaction has become a daily necessity. The complexity of American society forces people to balance regional and national goals with global concerns. Many of the most serious problems are world issues and require solutions which exhibit mutuality and reciprocity. No longer are hunger, ecology, health care delivery, language planning, information exchanges, economic and social developments, law, technology transfer, philosophy, and the arts solely national concerns; they affect all the people of the world. Survival may be dependent on the ability to generate global solutions to some of the most pressing problems.

The word university, from universitas, implies that knowledge comes from many sources and is not restricted to local, regional, or national perspectives. The Global Awareness Area recognizes the need for an understanding of the values, elements, and social processes of cultures other than the culture of the United States. Learning which recognizes the nature of others cultures and the relationship of America’s cultural system to generic human goals and welfare will help create the multicultural and global perspective necessary for effective interaction in the human community.

Courses which meet the requirement in global awareness are of one or more of the following types: (1) in-depth area studies which are concerned with an examination of culture-specific elements of a region of the world, country, or culture group, (2) the study of contemporary non-English language courses that have a significant cultural component, (3) comparative cultural studies with an emphasis on non-U.S. areas, and (4) in-depth studies of non-U.S. centered cultural interrelationships of global scope such as the global interdependence produced by problems of world ecology, multinational corporations, migration, and the threat of nuclear war.

1. Studies must be composed of subject matter that addresses or leads to an understanding of the contemporary world outside the U.S.

2. Course must be one or more of following types (check all which may apply):
   - In-depth area studies which are concerned with an examination of culture-specific elements of a region, country or culture group. The area or culture studied must be non-U.S. and the study must contribute to an understanding of the contemporary world.
   - Contemporary non-English language courses that have a significant cultural component.
   - Comparative cultural studies in which most, i.e., more than half, of the material is devoted to non-U.S. areas.
   - In-depth studies of non-U.S. centered cultural interrelationships of global scope, such as the global interdependence produced by problems of world ecology, multinational corporations, migration, and the threat of nuclear war. Most, i.e., more than half, of the material must be devoted to non-U.S.
### Course Prefix | Number | Title | Designation

SLC | 201 | Introduction to Language and Linguistics | G

Explain in detail which student activities correspond to the specific designation criteria. Please use the following organizer to explain how the criteria are being met.

<table>
<thead>
<tr>
<th>Criteria (from checksheet)</th>
<th>How course meets spirit (contextualize specific examples in next column)</th>
<th>Please provide detailed evidence of how course meets criteria (i.e., where in syllabus)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Studies are composed of subject matter that addresses or leads to an understanding of the contemporary world outside of the U.S.</td>
<td>The course focuses on the diversity that can be found in languages to help students develop a critical awareness of the range of potential formal and functional differences that can be found in the languages of the world. In addition, students consider social and political issues related to language that are often uncharacteristic of the sociolinguistic situation in the U.S.</td>
<td>Through lectures, readings and assignments, students are exposed to a broad array of data from languages other than English and are forced to confront the diversity of languages in terms of their structure (WEEKS 2-7) and their communicative practices (WEEK 9).</td>
</tr>
<tr>
<td>Course must emphasize comparative cultural studies in which most, i.e. more than half, of the material is devoted to non-US areas.</td>
<td>Throughout the course, students confront data from languages other than English and sociolinguistic situations that are generally unfamiliar in the American context.</td>
<td>Knowledge of English forms the basis for comparison in the class. While knowledge of other languages is not assumed, all students in the class are required to examine data from other languages to gain a greater awareness of the range of possibility in languages of the world. Most of the first half of the course is devoted to understanding the structural properties of language and how to describe them. Students look at language structure at all levels: sound (WEEKS 3 &amp; 4), words (WEEK 5), sentences (WEEK 6), meaning (WEEK 7), writing (WEEK 8), and discourse (WEEKS 8 &amp; 9). At each level, students are asked to</td>

<tr>
<th>Students are required to think critically about issues of language diversity; the impact of the spread of international languages like English, Spanish and French; the alternative policy stands on multilingualism and their consequences; and the response to language death.</th>
</tr>
</thead>
</table>

<p>| In addition to a thorough-going examination of the range of structural characteristics to be found in the world's languages, students consider the rate of endangerment within the population of the world's languages, the global situation that has led to the current state, and alternative responses to the loss of languages (WEEK 2 &amp; Sample Project). In this connection, students also consider the consequences of language loss and the interrelation between language and culture (WEEK12). In addition, students develop an awareness of the sociolinguistic situations that are typical in other regions of the world, such as societal multilingualism and policies relevant to it, language contact in the context of globalization (WEEK 11). and questions of language minority rights, language as |</p>

Chapter 1: Introduction
File 1.0 What Is Language?
File 1.1 Introducing the Study of Language
File 1.2 What You Know When You Know a Language
File 1.3 What You Don't (Necessarily) Know When You Know a Language
File 1.4 Design Features of Language
File 1.5 Language Modality
File 1.6 Practice

Chapter 2: Phonetics
File 2.0 What Is Phonetics?
File 2.1 Representing Speech Sounds
File 2.2 Articulation: English Consonants
File 2.3 Articulation: English Vowels
File 2.4 Beyond English: Speech Sounds of the World's Languages
File 2.5 Suprasegmental Features
File 2.6 Acoustic Phonetics
File 2.7 The Phonetics of Signed Languages
File 2.8 Practice

Chapter 3: Phonology
File 3.0 What Is Phonology?
File 3.1 The Value of Sounds: Phonemes and Allophones
File 3.2 Phonological Rules
File 3.3 Phonotactic Constraints and Foreign Accents
File 3.4 Implicational Laws
File 3.5 How to Solve Phonology Problems
File 3.6 Practice

Chapter 4: Morphology
File 4.0 What Is Morphology?
File 4.1 Words and Word Formation: The Nature of the Lexicon
File 4.2 Morphological Processes
File 4.3 Morphological Types of Languages
File 4.4 The Hierarchical Structure of Derived Words
File 4.5 Morphological Analysis
File 4.6 Practice
Chapter 5: Syntax

File 5.0  What Is Syntax?  194
File 5.1  Basic Ideas of Syntax  195
File 5.2  How Sentences Express Ideas  199
File 5.3  Lexical Categories  204
File 5.4  Phrase Structure  208
File 5.5  Tests for Structure and Constituency  216
File 5.6  Word Order Typology  221
File 5.7  Practice  223

Chapter 6: Semantics

File 6.0  What Is Semantics?  232
File 6.1  An Overview of Semantics  233
File 6.2  Lexical Semantics: The Meanings of Words  235
File 6.3  Lexical Semantics: Word Relations  242
File 6.4  Compositional Semantics: The Meanings of Sentences  248
File 6.5  Compositional Semantics: Putting Words Together and Meaning Relationships  252
File 6.6  Practice  259

Chapter 7: Pragmatics

File 7.0  What Is Pragmatics?  268
File 7.1  Language in Context  269
File 7.2  Rules of Conversation  273
File 7.3  Drawing Conclusions  279
File 7.4  Speech Acts  284
File 7.5  Presupposition  292
File 7.6  Practice  297

Chapter 8: Language Acquisition

File 8.0  What Is Language Acquisition?  310
File 8.1  Theories of Language Acquisition  311
File 8.2  First-Language Acquisition: The Acquisition of Speech Sounds and Phonology  319
File 8.3  First-Language Acquisition: The Acquisition of Morphology, Syntax, and Word Meaning  326
File 8.4  How Adults Talk to Young Children  333
File 8.5  Bilingual Language Acquisition  339
File 8.6  Practice  343

Chapter 9: Language Storage and Processing

File 9.0  How Do We Store and Process Language?  352
File 9.1  Language and the Brain  354
File 9.2  Aphasia  360
File 9.3  Speech Production  365
File 9.4  Speech Perception  374
File 9.5  Lexical Processing  379
File 9.6  Sentence Processing  385
File 9.7  Experimental Methods in Psycholinguistics  390
File 9.8  Practice  393
