## Arizona State University Criteria Checklist for

### **HISTORICAL AWARENESS [H]**

#### **Rationale and Objectives**

Recent trends in higher education have called for the creation and development of historical consciousness in undergraduates now and in the future. History studies the growth and development of human society from a number of perspectives such as—political, social, economic and/or cultural. From one perspective, historical awareness is a valuable aid in the analysis of present-day problems because historical forces and traditions have created modern life and lie just beneath its surface. From a second perspective, the historical past is an indispensable source of identity and of values, which facilitate social harmony and cooperative effort. Along with this observation, it should be noted that historical study can produce intercultural understanding by tracing cultural differences to their origins in the past. A third perspective on the need for historical awareness is that knowledge of history helps us to learn from the past to make better, more well-informed decisions in the present and the future.

The requirement of a course that is historical in method and content presumes that "history" designates a sequence of past events or a narrative whose intent or effect is to represent both the relationship between events and change over time. The requirement also presumes that these are human events and that history includes all that has been felt, thought, imagined, said, and done by human beings. The opportunities for nurturing historical consciousness are nearly unlimited. History is present in the languages, art, music, literatures, philosophy, religion, and the natural sciences, as well as in the social science traditionally called History.

The justifications for how the course fits each of the criteria need to be clear both in the application tables and the course materials. The Historical Awareness designation requires consistent analysis of the broader historical context of past events and persons, of cause and effect, and of change over time. Providing intermittent, anecdotal historical context of people and events usually will not suffice to meet the Historical Awareness criteria. A Historical Awareness course will instead embed systematic historical analysis in the core of the syllabus, including readings and assignments. For courses focusing on the history of a field of study, the applicant needs to show both how the field of study is affected by political, social, economic, and/or cultural conditions AND how political, social, economic, and/or cultural conditions are affected by the field of study.

Revised October 2015

Proposer: Please complete the following section and attach appropriate documentation.

<b>ASU--[H] CRITERIA</b>			
<b>THE HISTORICAL AWARENESS [H] COURSE MUST MEET THE FOLLOWING CRITERIA:</b>			
YES	NO		<b>Identify Documentation Submitted</b>
<input checked="" type="checkbox"/>	<input type="checkbox"/>	<b>1.</b> History is a major focus of the course.	Course Description/Competencies, Official Outline, Syllabus, Assignments, Readings
<input checked="" type="checkbox"/>	<input type="checkbox"/>	<b>2.</b> The course examines and explains human development as a sequence of events influenced by a variety of factors.	Course Description/Competencies, Official Outline, Syllabus, Assignments, Reading
<input checked="" type="checkbox"/>	<input type="checkbox"/>	<b>3.</b> There is a disciplined systematic examination of human institutions as they change over time.	Course Description/Competencies, Official Outline, Syllabus, Assignments, Reading
<input checked="" type="checkbox"/>	<input type="checkbox"/>	<b>4.</b> The course examines the relationship among events, ideas, and artifacts and the broad social, political and economic context.	Course Description/Competencies, Official Outline, Syllabus, Assignments, Reading
		<b>THE FOLLOWING ARE NOT ACCEPTABLE:</b>	
		• Courses that are merely organized chronologically.	
		• Courses which are exclusively the history of a field of study or of a field of artistic or professional endeavor.	
		• Courses whose subject areas merely occurred in the past.	

Course Prefix	Number	Title	General Studies Designation
IFS	213	Hacking and Open Source Culture	Applying for H

Explain in detail which student activities correspond to the **specific** designation criteria. Please use the following organizer to explain how the criteria are being met.

Criteria (from checklist)	How course meets spirit (contextualize specific examples in next column)	Please provide detailed evidence of how course meets criteria (i.e., where in syllabus)
1	The first listed Course Competency in the Syllabus explains that students will be able to “explain the history [...] related to hacking and open source culture.” The chronological history spans from the 1960’s to the present. In order to fully understand the interrelationship between hacking and open source, students must also understand their origins and development over time	MCCCD Official Course Description MCCCD Official Course Outline (I-VI) Syllabus: Sample Course Schedule (Units 1-Í) <b>Sample assignment: Short Essay: Researcher’s Choice</b> <b>Sample assignment: Group Presentation</b> <b>Sample reading: Hackers: Heroes of the Computer Revolution chapters 1-4, 15-16</b> <b>Sample reading: The Cathedral and the Bazaar chapter 1</b>
2	The course focuses on the development of computer technologies as they are impacted by and influence legal, social, political, and economic factors. Students learn that our understanding of how the world works and how information is owned and shared is tied to these technological developments and the ideals that drove them at different historical periods.	MCCCD Official Course Description MCCCD Official Course Outline (I-VI) Syllabus: Sample Course Schedule (Units 1-Í) <b>Sample quiz: Takeaways from “Major Moments”</b> <b>Sample assignment: Hacker Ethic in the Open World</b> <b>Sample reading: The Cathedral and the Bazaar chapter 3</b> <b>Sample reading: “The Digital Divide Revisited: What is Next?”</b>
3	Starting from the Tech Model Railroad Club to Anonymous, IFS 213 traces the development of technology, the internet, and open source from the 1960’s to the present. Students gain an appreciation of how the original hackers pushed each other in their exploration of computers to new heights and how those same people became the giants of the tech industry. Their stories repeatedly inspired new generations of hackers who in turn contributed to the	MCCCD Official Course Description MCCCD Official Course Outline (I-IV) Syllabus: Sample Course Schedule (Units 1-H) <b>Sample assignment: Hacking Incidents</b> <b>Sample assignment: Annotated Bibliography</b> <b>Sample reading: The Cathedral and the Bazaar chapters 1, 5, 6</b> <b>Sample reading: Hackers: Heroes of the Computer Revolution chapters 1-3, epilogue</b>

	development of the technologies that drive our modern world.	
4	As indicated in the course description, IFS213 "focus[es] on the multi-dimensions of ... open source culture... Social, economic, cultural, and political implications of hacking and technology, in historical and contemporary contexts [are] addressed." Students explore the influence of the hackers' ethic on the world around them. Emphasis is placed on the reactions and impact of societal institutions to the ideas and acts of hackers at various points in history.	MCCCD Official Course Description MCCCD Official Course Outline (I-IV) Syllabus: Sample Course Schedule (Units 1-1) <b>Sample assignment: Film Project</b> <b>Sample reading: Code chapters 10, 12</b> <b>Sample reading: Privacy in the Digital Age, Vol 2, Ch. 18, "Hacking, the Limits to the Fourth Amendment, and Challenges to Local Administration in the 21st Century"</b>

\* **Assignments** and **readings** listed are also highlighted in Course Syllabus.

## **Justification for Historical Awareness [H] for IFS 213**

### **1. Historical forces and traditions created modern life.**

IFS 213 examines how human interactions drove innovation in surprising directions as the students and researchers who created the earliest iterations of the internet worked and played together. This group informally developed a code of ethics which both embodied and influenced their ideals. The course explores how many of the original hackers went on to found major tech companies, facing the challenges of balancing their ideals and economic, society, political, and legal demands. In turn, they also influenced the world around them, including later generations of hackers who embraced the hacker ethic in various ways. Tracing this development and how the hacker ethic spilled over into the wider population is the focus of IFS 213.

### **2. A source of identity and values which facilitate cooperative effort.**

Open source culture is all around us. Regardless of intention, most of us have participated by searching for information online, using social media, or even sharing memes. IFS 213 requires students to examine how the group dynamics of the original hackers led to the “hacker ethic” and ultimately to the development of technologies which facilitate information sharing. Learners explore how current phenomena such as crowdsourcing, hacktivism, and social media all trace their roots back to the ideals held by the original hackers. Students critically examine how information sharing has changed over time, as well as the benefits and challenges of living in an open source world.

### **3. Learn from the past to make better, more well-informed decisions.**

Students think critically about the underlying social, legal, and economic questions that resulted from the development of the open source movement. Such questions as, who owns computer code and is it copyrightable? How can code be used to control end user rights and behaviors? What does the rapid spread of information mean for social movements? For warfare? For democracy? These types of questions allow students to think critically about the multi-dimensions of hacking and open source culture and to analyze the causes and effects of their own information sharing. By analyzing the history of hacking and open source culture with all of its complexity, students are then prepared to take the lessons from the past and apply them to their own personal and professional lives.

## Hacking and Open Source Culture

Course: **IFS213**

Lecture **3.0** Credit(s) **3.0** Period(s) **3.0** Load

First Term: **2020 Spring**

Course Type: **Academic**

Final Term: **Current**

Load Formula: **S- Standard**

**Description:** Focus on the multi-dimensions of hacking and open source culture, including rule-breaking, innovation, and creative use of programming/technology. Social, economic, cultural, and political implications of hacking and technology, in historical and contemporary contexts will be addressed.

**Requisites:** Prerequisites: None.

### MCCCD Official Course Competencies

1. Explain the history, concepts, and terms related to hacking and open source culture. (I, II)
2. Explore the interdependent relationship between hacking and open source software. (I, IV)
3. Evaluate the merits and demerits of open source software (including copyright issues). (II, III)
4. Analyze the role and impact of open source and open access as alternatives to traditional intellectual property law and policy. (II-IV)
5. Evaluate the implications of broader information sharing across a variety of mediums, including news, data, music, photographs, code, and texts. (II-VI)
6. Assess the influence of hacking and programming on current social, economic, political, technological, and cultural contexts. (IV-VI)

### MCCCD Official Course Outline

- I. History and definitions
  - A. Hacking communities and hacker ethic
  - B. Open source culture
  - C. Open access
- II. Open source software
  - A. Intentions behind early projects
  - B. Current developments
- III. Academic perspectives
  - A. Benefits
    1. Open access movement
    2. Open source code
    3. Copyright issues
  - B. Challenges
    1. Open access movement
    2. Open source code
    3. Copyright issues
- IV. Law and policy
  - A. Intellectual property rights

A. Intellectual property rights

B. Software developments and licensing

C. Net neutrality

V. Dimensions of influence

A. Social

B. Political

C. Cultural

D. Technological

E. Economic

VI. Information exchange

A. Social media

B. Public perceptions

C. Current trends and challenges

D. Commodification of information

# Syllabus

CGCC  
Online (Canvas)  
**IFS 213 Hacking and Open Source Culture (3.0 credits)**  
Section 37206  
Spring 2020

**Prof. Barbara Howe**

**Office:** LIB 222 (Pecos campus)

**Office Hours:** Monday 1:30-3pm  
Tuesday 10am-12pm  
Other days by appointment

**barbara.howe@cgc.edu**  
**(480) 726-4157**

**Communication Policy:**

Please use the Inbox within Canvas to contact me. (Top right corner where it says Inbox) If Canvas is down or you need an alternative email, you can use my CGCC email address. Be sure to label all messages as Course Prefix/Number, followed by a brief subject description.

I will respond within 24 hours Monday through Friday. On the weekends and holidays, I will respond within 48 hours.

Please send me a message in Canvas with specific questions about the class, or regarding personal matters. Do not hesitate to contact me whenever you have concerns about your progress, or if you need help.

**Course Description:**

Focus on the multi-dimensions of hacking and open source culture, including rule-breaking, innovation, and creative use of programming/technology. Social, economic, cultural, and political implications of hacking and technology, in historical and contemporary contexts will be addressed. Prerequisites: None.

**Course Competencies:**

1. Explain the history, concepts, and terms related to hacking and open source culture.
2. Explore the interdependent relationship between hacking and open source software.
3. Evaluate the merits and demerits of open source software (including copyright issues).
4. Analyze the role and impact of open source and open access as alternatives to traditional intellectual property law and policy.
5. Evaluate the implications of broader information sharing across a variety of mediums,

- including news, data, music, photographs, code, and texts.
6. Assess the influence of hacking and programming on current social, economic, political, technological, and cultural contexts.

### Course Content:

This course consists of 6 units spread over 13 weeks plus a final exam. Units are broken up into week-long modules. Modules will contain some or all of the following components:

- **Announcements:** Be sure to check this link (in the frame at the left of Canvas). Here you will find time-sensitive information, reminders, and changes.
- **Notes and Readings:** These are comparable to lectures in a face-to-face class. Every module will have readings labeled READ. You should follow the flow of the module, progressing through each element sequentially.
- **Writing Assignments:** The goal of the written assignments is for the student to think about issues and ideas related to the subject area. The assignments will demonstrate understanding and application of your reading and/or research.
- **Discussions:** You will benefit greatly by leveraging the vast experience everyone has in this course by participating in the discussions fully. Discussions will be held in Canvas and through comments on Google Docs. Please see info about netiquette below.
- **Quizzes:** There are very few quizzes in this course, but those that do exist are there to test your understanding of key concepts. All quizzes are open book/internet/whatever.
- **Final Exam:** The Final Exam will be a short answer/essay exam. By completing all of the modules, plus the online information literacy tutorial, you should be well-prepared for the final exam.

### Contact Hours:

This 3-credit requires the student to learn and complete assignments completely online. The assignments may include reading and research, writing discussion posts and papers, listening to videos of interactive lectures and speeches, and more. If this course were conducted only in a face-to-face classroom, it would be scheduled to meet for 45 clock hours and students would be expected to commit to at least 90 additional hours (135 hours total) for research, writing, and completing assignments. The time for research, writing, reading, and other assignments are also needed. If you are not prepared to **dedicate at least 135 hours** to this course—whether offered in a 5-week, 8-week, or 16-week format—you should seriously reconsider your enrollment.

### Prof. Howe's Tips for Online Learning

1. Communicate with me frequently! I'm here to help you.
2. Ask the question. Even if you're not sure it's important or you aren't sure if you misunderstood something. Just ask!
3. Print out the course schedule (under "Syllabus" on Canvas) and highlight important deadlines.
4. Plan to turn in assignments at least 12 hours early. This gives you a cushion in case you have last minute changes or technology issues.

5. Let your family/roommates/friends know when you have set aside time to do your coursework. If they are aware, it's easier for them to give you some space or help you stay on track.
6. Check in with the class at least every other day. You will be less likely to miss something important!

### Online Tutoring

URL: [Online Tutoring](#)

The Learning Center provides students enrolled in CGCC online and/or hybrid courses access to online tutoring. Students are encouraged to take advantage of face to face tutoring as well. For information on how to access online tutoring, visit our website at

<http://www.cgc.edu/lc/onlinetutoring>

### Computer Lab

URL: [Computer Lab](#)

The CGCC Computer Lab is open extended hours to ALL currently enrolled CGCC students. The lab has Windows and Mac computers, scanners, headsets, etc. Staff provide FREE one-on-one walk-in or appointment-based assistance with technology questions, Wi-Fi, Canvas, software, and more. Labs are at both campuses Pecos (Bradshaw 123) and Williams (Bridget Hall 116). For more information, please visit [www.cgc.edu/computerlab](http://www.cgc.edu/computerlab) or call 480-732-7221.

### Assessment & Grading:

#### Grading:

Assignment types in this course are broken down into three areas: Discussions, Homework, and Major Assignment. Each type is weighted in the final course grade as follows:

#### Example:

Assignment	Grade Weight	Final Grade
Discussions (20 points each)	20%	<b>A 90-100%</b> <b>B 80-89%</b> <b>C 70-79%</b> <b>D 60-69%</b> <b>F 0-59%</b>
Homework Assignments (10-30 points each)	30%	
Major Assignments + Final (50 points each)	50%	

All assignments are mandatory. The College has an attendance policy for online classes that uses both communication and coursework as measures to determine if you are in attendance. Missing work could put you at risk for being withdrawn from the course! (See Last Date of Attendance and Attendance below.)

### Assignment Deadlines

All assignments have a specific due date. Assignments must be posted or submitted by 11:59 pm on the date specified. Assignments may not be turned in late unless there is a legitimate emergency that must be documented, and you email me before the due date and ask for an extension. I will consider each request on a case-by-case basis. **Late assignments will automatically lose 10% of the grade.** As the semester progresses, please contact me as soon as possible if you find yourself falling behind in the class for any reason.

The deadline for each module's assignments will always be the by 11:59 pm the Sunday after a module has been posted. Thus, you will have one week to complete the assignments for each module.

Because this course has an alternative schedule, you will be expected to continue your work on the mid-semester project over Spring Break. If you know you are going out of town or will not have internet for any other reason, contact me as soon as possible!

### **Student Learning Outcomes**

URL: [Student Learning Outcomes](#)

At CGCC, learning will be assessed in four areas called Student Learning Outcomes: Communication, Critical Thinking, Information Literacy, and Personal Development. Your instructor in this course will explain how one or more of these outcomes will be taught and assessed during the semester. Your participation in assessment activities is vital to the College's efforts to improve teaching and student learning.

### **Submitting Assignments:**

*Explain how assignment should be submitted and what types of files are acceptable.*

Most assignments will be submitted through Canvas, but we will also use Google Drive and Google Docs for collaborative work. For papers submitted in Canvas, you must type your assignment in a Word document and then add it as an attachment to the Assignment module. Again, be sure to keep copies of all your work. You should submit your work in a standard typeface and size. Please use either 12 Times New Roman or 12 Arial in all Word documents. (This document is in 12-point Arial type.)

### **Last Date of Attendance and Monitoring Academic Activity**

URL: [Last Date of Attendance and Monitoring Academic Activity](#)

- CGCC is a "term-based" institution, requiring weekly academic activity in an online course. For the purposes of disbursing federal financial aid, faculty must report the last date of attendance (LDA) in the event of a student withdrawal or course failure. To determine an LDA, faculty must ensure students engage in academic activity on a weekly basis. Examples of academic activities include:
- *Submitting an academic assignment (assignment required in the class, regardless of whether it is graded or not), paper, or project,*
- *Taking an exam, quiz, computer-assisted instruction, or an interactive tutorial required by the class,*
- *Participating in an online study group (where there is assigned attendance/participation as part of the class)*
- *Initiating contact with the instructor to ask a question about the academic subject studied in the class.*

**Simply logging in to an online class does not constitute academic activity. Students interested in working ahead in an online class should consult with their instructor as academic activity must still be recorded in every week of the class.**

**Attendance:**

Students will need to use the Learning Management System (Canvas) no less than twice a week to complete all assignments, discussions, quizzes, and projects by the deadlines (see below late-assignment policy for further details). Please contact me if you anticipate not being able to login to the course for a full week during the semester. As per college policies, students are expected to attend classes (“The faculty member has the option of withdrawing a student who has accumulated unofficial absences in excess of the number of times a class meets per week.”). If I determine through the tracking data that a student has not logged in during the week or if a student has not submitted work for two weeks, I will contact the student via email and through a mail message within the course prior to initiating a withdrawal.

**Course Schedule:**

Unit	Modules	Dates
1. Open Source Culture	<u>1960's: Hacking and the Hacker Ethic</u> <b>Readings:</b> <ul style="list-style-type: none"> <li>• <i>Hackers: Heroes of the Computer Revolution</i>, ch. 1-2</li> <li>• <i>The Hacker Ethic and Spirit of the Information Age</i>, Conclusion</li> </ul> <b>Assignments:</b> Syllabus Quiz; Discussion; Collab.Glossary	1/27-2/2
	<u>1960's-70's: Hacking, Cracking + Phreaking</u> <b>Readings:</b> <ul style="list-style-type: none"> <li>• <i>The Cathedral and the Bazaar</i>, ch. 1-3</li> <li>• <i>Respawn: Gamers, Hackers and Technogenic Life</i>, “May the Lulz Be with You”</li> <li>• <i>The Hacker Ethic and the Spirit of the Information Age</i>, Appendix</li> <li>• <i>Hackers: Heroes of the Computer Revolution</i>, ch. 3, 10</li> </ul> <b>Assignments:</b> “Takeaways from ‘Major Moments’” Quiz; Short essay; Collab. Glossary	2/3-2/9
	<u>1980's: The Third Generation</u> <b>Readings:</b> <ul style="list-style-type: none"> <li>• <i>Hackers: Heroes of the Computer Revolution</i>, Chapters 15, 16, and Epilogue</li> <li>• <i>The Cathedral and the Bazaar</i>, ch. 4-7</li> <li>• “The Introduction to the World of Hacking”</li> <li>• “The Untold Story of the Teen Hackers Who Transformed the Early Internet,” <i>Gizmodo</i></li> </ul> <b>Assignments:</b> Group Presentation, Collab. 3. Influence of Hacking	<p><u>2010’s: Open Access to Information and Open Access Education</u></p> <p><b>Readings:</b></p> <ul style="list-style-type: none"> <li>• “What is Open Access?” Roy Kaufman</li> <li>• “Four Principles for the Open World,” Don Tapscott (TED Video)</li> <li>• “Why Open Education Matters,” <i>Blink Tower</i></li> <li>• “Wikipedia: Jimmy Wales,” <i>How I Built This</i></li> </ul> <p><b>Assignments:</b> Quiz, Personal Reflection, “Hacker Ethic in the Open World”</p>	3/23-3/29
	<p><u>Influence on Society: Disparity, Barriers, Equity</u></p> <p><b>Readings:</b></p> <ul style="list-style-type: none"> <li>• “The Digital Divide,” <i>Societal Issues &amp; Behavior</i></li> <li>• “The Digital Divide: What is Next?” Stephanie Huffman</li> <li>• “A Digital Inclusion Blueprint and Online Resilience,” Laurence Zwimpfer</li> </ul> <p><b>Assignments:</b> Short essay; SIFT Activity; Project due “Learning in an Open Source Society”</p>	3/30-4/5
4. Social Media	<p><u>Information Cycle, Sharing, and Cultural Effects of Open Information</u></p> <p><b>Readings:</b></p> <ul style="list-style-type: none"> <li>• “The Information Cycle” on Canvas</li> <li>• <i>Code, Ch. 12</i></li> <li>• “Should Facebook and Twitter Be Regulated Under the First Amendment?” <i>Wired</i></li> </ul> <p><b>Assignments:</b> Quiz; Discussion; Current events assignment</p>	4/6-4/12
	<p><u>Echoes of the Hacker Ethic: Crowdsourcing, Hacktivism, and Going Viral</u></p> <p><b>Readings:</b></p>	4/13-4/19

	<ul style="list-style-type: none"> <li>• “The Rise of Crowdsourcing,” <i>Wired</i></li> <li>• “Massive Scale Online Collaboration,” Luis Von Ahn (TED video)</li> <li>• “Anthropology of an Idea: Hacktivism,” <i>Foreign Policy</i></li> <li>• “Toward a Free Information Movement,” <i>Sociological Forum</i></li> <li>• Excerpts from <i>Social Media Freaks</i></li> </ul> <p><b>Assignments:</b> Quiz; Discussion; Proposal for film project</p>	
5. Navigating an Open Source World	<p><u>Pitfalls and Dangers</u></p> <p><b>Readings:</b></p> <ul style="list-style-type: none"> <li>• “Mutating Cyberthreats,” <i>Cybercrime and the Law</i></li> <li>• “How Russia Weaponized Social Media,” <i>The Washington Post</i></li> <li>• “It’s 2020. American Elections are Still Frighteningly Easy Targets,” <i>TechReview</i></li> <li>• “Governments Don’t Understand Cyber Warfare,” Rodrigo Bijou (TED video)</li> </ul> <p><b>Assignments:</b> Discussion, Research activity</p>	4/20-4/26
	<p><u>Big Data; Sifting Through the Deluge</u></p> <p><b>Readings:</b></p> <ul style="list-style-type: none"> <li>• “Marketers are Using AI,” <i>Marketing AI Institute</i></li> <li>• “Your Social Media ‘Likes’ Expose More than You Think,” Jennifer Golbeck</li> </ul> <p><b>Assignments:</b> Reflection; <b>Annotated Bibliography</b>; Rough draft of film project</p>	4/27-5/1
Final <b>Film Project</b> wrap up and Final Exam		5/2-5/5

### Technology Requirements:

#### Required Computer Skills:

Despite the fact that this course is *about* computers, programming, and hacking, you do not need advanced skills. What you do need is to:

- Be able to access and navigate the internet.
- Be able to use email, including attaching and downloading files.
- Be able to save and retrieve files on your computer.
- Be able to use a computer, a keyboard, and a mouse or touch pad.
- Be able to run and operate a variety of software programs, including a word processor.
- Be able to organize, copy, paste, name and rename files. Be able to browse, upload and attach files.
- Be able to cut and paste information from one document/program to another.

#### Required Technologies:

1. Access to a computer with Internet connection.
2. MS Word or another word processing program that can save and export in RTF.
3. Web browsers: The newest version of [Chrome](#), [Firefox](#), or Safari. [Internet Explorer](#) is not recommended (especially anything below IE 8).
4. Plug-ins: [Adobe Flash](#), [Adobe Acrobat Reader](#), and [Java](#).

#### Third Party Learning Tools:

In this course, we will use Google Drive and Google Docs as web-based 3rd party tools to complete or participate in assignments, activities and/or access course materials. **Your student email is the Google account that you should use for your login to these tools.** Additionally, you will be asked to produce a work in the format of your choosing which may necessitate the use of another we-based 3<sup>rd</sup> party tool. Students may be required to establish a username or password, submit work and/or download information from these tools. There is, therefore, some risk that individuals electing to use the products and services made available by these tools may place any student information shared with the tool vendor at a risk of disclosure. It is your responsibility to be aware of these risks and responsibilities.

## Course & College Policies

### Student Responsibilities:

Students are responsible for the information in the syllabus and college policies included in CGCC's college catalog and student handbook.

### Classroom Accommodations for Students with Disabilities:

In accordance with the Americans with Disabilities Act, the Maricopa County Community College District (MCCCD) and its associated colleges are committed to providing equitable access to learning opportunities to students with documented disabilities (e.g. mental health, attentional, learning, chronic health, sensory, or physical). Each class/term/semester that a student is in need of academic adjustments/accommodations, the qualified student is required to work with the Disability Resources & Services Office (DRS) at their individual college(s). Contact with the DRS should be made as soon as possible to ensure academic needs are met in a reasonable time. New and returning students must request accommodations each semester through DRS Connect online services. To learn more about this easy process, please contact your local DRS office. If you have not yet established services through DRS, but have a temporary health condition or permanent disability that requires accommodations, you are welcome to contact DRS at 480-857-5188 or <https://www.cgc.edu/Students/DisabilityServices/Pages/Home.aspx>. The DRS offers resources and coordinates reasonable accommodations for students with disabilities and/or temporary health conditions qualifying for accommodations/academic adjustments. Reasonable accommodations are established through an interactive process between you, your faculty, and DRS; and only those academic adjustments/reasonable accommodations granted by the DRS are recognized by the college and District. It is the policy and practice of the MCCCD to create inclusive and accessible learning environments consistent with federal and state law.

### CGCC Statement: Information Regarding Counseling Services

Counseling assists currently enrolled CGCC students with academic concerns, career counseling, and personal support/goal setting. Connections with community resources and referrals are also available. Appointments are offered at the Pecos and Williams campus locations. For more information, please refer to our website at [www.cgc.edu/counseling](http://www.cgc.edu/counseling) or call us at 480-732-7158 (Pecos), or 480-988-8001 (Williams).

### Academic Honesty/ Integrity:

Besides academic performance, students should exhibit the qualities of honesty and integrity. Every student is expected to produce his/her original, independent work. Any student whose work indicates a violation of the MCCCD Academic Misconduct Policy including cheating, plagiarism, and dishonesty will be subject to disciplinary action. Refer to the CGCC Student Handbook for information regarding Academic Misconduct and due process procedures.

**Academic Misconduct (from CGCC's Student Handbook)**

- Academic Misconduct - includes any conduct associated with the classroom, laboratory, or clinical learning process that is inconsistent with the published course competencies/objectives and/or academic standards for the course, program, department, or institution. Examples of academic misconduct include, but are not limited to: (a) cheating and plagiarism (including any assistance or collusion in such activities, or requests or offers to do so); (b) excessive absences; (c) use of abusive or profane language; and (d) disruptive behavior.
- Cheating is any form of dishonesty in an academic exercise. It includes, but is not limited to, (a) use of any unauthorized assistance in taking quizzes, tests, examinations, or any other form of assessment whether or not the items are graded; (b) dependence upon the aid of sources beyond those authorized by the faculty member in writing papers, preparing reports, solving problems, or carrying out other assignments; (c) the acquisition, without permission, of tests or other academic material belonging to or administered by the college or a member of the college faculty or staff; and (d) fabrication of data, facts, or information.
- Plagiarism is a form of cheating in which a student falsely represents another person's work as his or her own – it includes, but is not limited to: (a) the use of paraphrase or direct quotation of the published or unpublished work of another person without full and clear acknowledgment; (b) unacknowledged use of materials prepared by another person or agency engaged in the selling of term papers or other academic materials; and (c) information gathered from the internet and not properly identified.
- Any student found by a faculty member to have committed academic misconduct may be subject to the following academic consequences, based on the faculty member's judgment of the student's academic performance
- Warning - A notice in writing to the student that the student has violated the academic standards as defined in 1.A.
- Grade Adjustment - Lowering of a grade on a test, assignment, or course.
- Discretionary assignments - Additional academic assignments determined by the faculty member.
- Course Failure - Failure of a student from a course where academic misconduct occurs.

**Appealing Final Course Grade:**

Appeals to change a final course grade must be initiated within 60 days of the date on which the grade was issued. See [Instructional Grievance Process](#) for additional information.

**Conduct:**

URL: [Conduct](#)

You are expected to treat your instructor and your fellow classmates with respect. In all correspondence whether communicating in person or online, you should show respect for the viewpoints of others who may disagree with you or see things from a different perspective. Criticizing, ridiculing, insulting, or belittling others will not be accepted. Keep in mind that electronic communications do not have the advantage of nonverbal cues that are so much a part of interpersonal communication. Humor or satire can sometimes be misinterpreted in strictly electronic communication forums.

**Activate and Access Your Maricopa Student Email:**

URL: [Activate and Access Your Maricopa Student Email](#)

The Maricopa District provides every student with google-powered Maricopa Student Email upon enrollment. CGCC uses this official student email to send information concerning class enrollment, financial aid, tuition, and other important student information. Students must activate this email account in order to receive these messages. Activate your Maricopa Student Email now at <http://google.maricopa.edu>

**Netiquette:**

URL: [Netiquette](#)

Netiquette refers to the rules of behavior while on the Internet. When interacting within the online course environment, please follow the below guidelines.

- Show professionalism and courtesy in all communications within the course.
- No one else should be given access to the course or conferences without the instructor's permission.
- Do not use the words or text from others without acknowledging the source.
- Humor can easily be misinterpreted within the online environment, please be cautious with the use of humor and use symbols to help prevent misunderstandings. :-)
- Adhere to the same behavioral standards as you would in a face-to-face classroom and as is specified in the student handbook.
- Avoid typing in all capital letters, for those of us using the Internet frequently, this can seem like you are 'yelling'.
- Respect other people's time and contribute thoughtful comments and ideas to the discussions rather than simply making statements such as 'I agree'.
- Use correct spelling and grammar. Avoid the use of abbreviations and use spell check within your word processor or within the course to check the spelling of your communications.

**Withdrawing from the Course:**

There are two kinds of withdrawal: student-initiated withdrawal and instructor-initiated withdrawal. You can find the specific withdrawal dates in my.maricopa.edu > Student Center > My Class Schedule > (Course Prefix/Number) > Calendar button under Deadlines. After the last day for student-initiated withdrawal, students may ask instructors to withdraw them. Failing to submit assignments and maintain steady progress will result in withdrawal by your instructor.

**Withdrawal Warning for Non-payment of Fees:**

URL: [Withdrawal Warning for Non-Payment of Fees](#)

Every term, students suddenly discover that they have been dropped from all of their classes because they have failed to pay a lab fee or some other fee that is required for an online class. Please log on to your student account at My.Maricopa and verify that you have paid all your fees. If you are dropped for nonpayment, paying your fees will NOT automatically reinstate you in your classes. Reinstatement requires permission from your instructor and the department chair and can take as much of a week or more! Also, there is no guarantee of reinstatement after your fees are paid, so please check your account now to be sure that you are not withdrawn for nonpayment of fees.

**Syllabus Changes:**

This syllabus is intended to contain complete and accurate information; however, I reserve the right to adjust this syllabus during the course. Students will be notified by the instructor of any changes in course requirements or policies.

Revised: Jan. 15, 2020

## Short Essay: Researcher's Choice

### Instructions:

Here's your chance to learn about a topic that we have not yet covered, or just briefly touched on. You will be sharing your essays, so everyone gets the benefit of your work.

Choose an event, important hacker, or important computer-related development that impacted hacker culture but stay within the years 1950-1979ish. This will be a research-based, informative essay, written for an audience comprised of your fellow students. Remember to back up what you say with sources!

You may use the sources we have looked at so far, but you must also find at least 2 **reliable** outside sources.

### Requirements:

- 400-800 words
- Min. 2 reliable sources
- Cite your sources in MLA format, using in-text citations.
- Include a Works Cited at the end

### Content:

- Inform your reader about the topic, including all the pertinent details.
  - Be sure you answer the W's: Who, What, Where, When, and Why
    - What aspects of the cultural/historical context of the time influenced the people involved?
  - Where do you see evidence of the hacker ethic? Is there any part of the topic that seems to run contrary to what we've learned about that ethic so far? If so, how has that impacted (or not impacted) how we view hackers today?
- Reflect on how the person/event/item impacted the hacker culture and why the topic is important to understand.
  - What were the consequences? Were there positive effects? Negative?
  - What did people at the time think of it/them? Has that view changed over time? How?
  - Make a judgment about the effects or repercussions that exist in our society today as a result of the event/person/item. Explain your reasoning.

You will submit your work here on Canvas for grading **and** upload it to our shared Google Drive for comments.

### Rubric

#### Short Essay Grading Rubric

	A	B	C	D
<b>Technical requirements:</b> <ul style="list-style-type: none"><li>• source number</li><li>• source type</li><li>• citations</li></ul>	Meets all minimum requirements for the assignment. Overall satisfactory work.</p>	<p>Addresses the assignment in a general way but may be off-topic. Does not use terms correctly which may be confusing for the audience. Does not make any connections to other course material or themes. Overall unsatisfactory work.</p>

NOTE: An “F” assignment (1) does not meet the minimum requirements, including length, source number and type, citations, or format **OR** (2) does not address the assignment **OR** (3) shows evidence of plagiarism.

\*“Product” refers to the end product turned in for a grade, whether that be an essay, short answer, or any other type of project.

## Assignment: Group Presentation

For this module, you will be split into groups based on the presentation time slot that you selected last week. You will be filling in a pre-created Google Slides presentation with each person responsible for their own slide. At the designated time, you will join the Google Meet and present your work to me.

### What you will do:

1. Find the slide with your name on it and read the questions.
  2. Using **this week's readings** and **at least 1 reliable source**, answer the questions as fully as you can.
  3. Present your answers in your group's Google Slides presentation.
  4. Include your sources on the **Works Cited** slide. Remember to include the articles from this week that you use!
- You may:
    - Change your slide's look
    - Insert more slides (I expect you will have to)
    - Add images/video. (Remember to cite these!)
  - You will be able to view **all** slide presentations in our shared Google Drive (Links to an external site.).

### Requirements

- Each person is responsible for their own slide **and** for presenting that slide.
- You need to not only address the questions you are given, but also consider effective presentation delivery, including:
  - Speaking clearly and in an appropriate tone
  - Using visual elements effectively
    - Limit the text on slides to just 5 or fewer phrases—you should be talking about the answer, not just reading what you wrote.
  - Remember to cite your sources on the slides or in your narration

NOTE: You are in effect processing and interpreting the readings for each other, each person focusing on their assigned topic. However, each student is responsible for their own learning. Someone doing a halfhearted job on their slide is not an excuse for you not knowing the information in this module.

### Topics and Questions: Hacking in the 80s

#### Personal computers

- What attracted people to Apple computers initially? What set Apple apart from other personal computers available at the time?
- How did the average computer owner feel about their computers around this time? Contrast this with how people view their computers now.
- Name 2 hacker ethics that relate to this topic and explain the connection.

### Video Games: Companies

- What were On-line, Sirius, and Brøderbund? What was their relationship?
- Name 2 notable people discussed in the readings and **assess their contributions.**
- Which hacker ethics relate to this topic? Explain.

### Video Games: *Jawbreaker*

- What was the controversy behind the game *Jawbreaker*?
- **Describe how the court case developed and ended. Appraise each side and make a determination of who was in the “right.”**
- Which hacker ethics relate to this topic? Explain.

### The Inner Circle

- Who was the Inner Circle? Describe the people involved and the characteristics they shared.
- Summarize the article which relates best to this topic.
- **Comment on the lasting impacts of this group; support your reasoning with sources.**
- Which hacker ethics relate to this topic? Explain.

### The 414s

- Who were the 414s? Describe the people involved and the characteristics they shared.
- Summarize the article which best relates to this topic.
- **Comment on the lasting impacts of this group; support your reasoning with sources.**
- Which hacker ethics relate to this topic? Explain.

### Linux

- Who is Linus Torvalds? What is his background?
- **Appraise the impacts of Linux, both initially, and in the long-term. Which is of most importance in the open source culture? Why? Support your reasoning with sources.**
- Which hacker ethics relate to this topic? Explain.

## Quiz: Takeaways from "Major Moments"

### Directions:

Answer the following short answer questions to synthesize the articles presented on the "Major Moments" page of this module. Each answer should be a minimum of one full paragraph (4-5 full sentences).

#### Question4 pts

What was the Tech Model Railroad Club? How is it related to *Spacewar*? What was notable about the group and its purpose?

#### Question4 pts

Tell me about the Homebrew Computer Club.

What was so remarkable about this group? Who was involved? What kinds of developments resulted from the work this group did?

#### Question4 pts

What was the Blue Box? What aspect of the hacker ethic does it embody? -

#### Question4 pts

What are Unix and C? Why are they important to the history of hacking?

## Hacker Ethic in the Open World

A major theme of this course is **how the hacker ethic of the computer pioneers has impacted our larger culture, specifically in relation to how we view, use, and share information.** For this assignment, you will watch the video “Four Principles for the Open World,” and explore how it mirrors the hacker ideals we have been discussing. You will then go on to find a current example (good or bad) of that ethic in a tech-related event (or person) **and defend your position with supporting sources.**

### Directions:

After watching Don Tapscott's TEDtalk, "Four Principles for the Open World," choose 2 of the following (simplified) hacker ethics that you feel are most clearly embodied in his speech:

- Sharing
- Openness
- Decentralization
- Free access to computers
- World Improvement

For each ethic chosen:

- Write 4-5 sentences explaining the connection you see and include at least one important quote from the video which supports your point (remember to cite it!).
- Research in the Library databases to find a current technology-related event or person that you feel is either a good or poor example of living up to the hacker ethic you chose. **In 2-3 paragraphs, explain the connection and justify why it is a good/poor example.** Assume you are writing for an audience unfamiliar with the topic. You will need to **include background and context** to successfully demonstrate the connection and your position.

### Requirements:

- 3-4 pages (double-spaced, 12pt font)
- MLA format, including in-text citations and a Works Cited.
  - Remember, the video counts a source, so it should be included
- 4 sources found in the Library databases
  - see *Research Activity* which will step you through the process
- You may also use one reputable source found on the open web.

### Rubric

## Instructions: Hacking Incidents Project

ROUGH DRAFT DUE \_\_\_\_\_

FINAL DRAFT DUE \_\_\_\_\_

### Hacking Incidents Project

Time to get creative.

For this assignment, you will research a major hacking incident or person/group from the list below and produce a creative work highlighting the following areas:

- What happened? Explain the events and **assess the surrounding circumstances or influences.**
  - How does it fit in with our chronology? Was it a natural progression, a rebellion, or more of an anomaly?
- Why was it important or notable? (either to the world or to the hacking community)
- **How did it impact later hackers, technology, or society in general?**
- What hacker ethic(s) motivated the person or action? Was it an important motivating factor or were there more important motivations? How do you know?

The work needs to be based on research: 3 sources required--at least 2 from the Library databases. Possible Library databases include *Gale eBooks*, *Gale Biography*, or *US Major Dailies*. 1 online source allowed.

(The activity "Library Database Research" will step you through the process of researching in those databases.)

### Possible topics:

- Captain Crunch and Joybubbles
- Kevin Mitnick
- Lex Luthor and the Legion of Doom
- Chaos Communication Congress
- The Morris Worm
- Operation Sundevil
- Def Con
- The LOft testimony to Congress
- ILOVEYOU worm
- Any other notable incident, hacker, or group BEFORE 2005.

### Possible works:

- Comic/graphic novel
- Song
- Website
- Infographic
- Video
- Short story

- Etc.

**Citations:**

Either cite your sources with parenthetical citations and a Works Cited page submitted separately OR write a short paragraph explaining which parts of the work are based on which source with a Works Cited at the end. Use your discretion, but remember I have to be able to figure out why you included each part and where you used your sources.

Examples:

In a short story: "I met him at the Homebrew Computer Club (Author pg.)."

In the descriptive paragraph accompanying a drawing: "The calendar on the wall shows the date of the event (Author pg.)." **OR** "The overall mood is frantic as described in the article by Author."

## Annotated Bibliography on Information Security

So far this semester, we have learned about the original hackers, the proliferation of open-source and open information, legal challenges as technology has developed, and white-hat and black-hat hackers. We have explored some of the ongoing concerns as infosec professionals scramble to keep up with bad actors. In all of these areas, our culture has impacted and been affected by the people, inventions, etc. involved.

You will choose an area/theme/innovation related to information security and research how it is/was impacted by surrounding culture or context and how it has affected the way we navigate the world.

As an example, let's say I wanted to research RFID. I would look for information on when it was invented and why, what was going on in the world at the time that might have impacted the invention, etc. It would be interesting to know what the initial reception was at the time. Was it widely implemented immediately? Did it take a while to catch on? Finally, I would want to find sources to support my conclusion about how it influenced or changed our society, including the way we work, travel, communicate, etc?

By exploring these and other aspects, you will illustrate how your chosen theme fits in with the larger history and our chronology, what contributed to its creation/development and assess how it impacts our culture today.

### Directions:

You will be researching a theme in the area of information security with a focus on the following:

- History and development over time
- Impact on society, including politically, economically, socially, etc.

Possible themes could include (but are not limited to): Constitutional concerns and technology, national or local laws, cyberwarfare, bots, phishing, etc.

Your annotated bibliography will consist of an introductory paragraph followed by entries for 6-8 scholarly sources. For each entry, you will include the MLA citation, a short summary, and a comment on how it relates to the central theme and focus.

### Requirements:

- An introductory paragraph (or 2) explaining the theme and a brief discussion of your overall findings.
- Entries for 6-8 scholarly sources (as we have previously discussed)
- MLA formatting for citations (including sources being in alphabetical order) Each entry (the summary and comment) should be at least 5 sentences

(see "How to Write an Annotated Bibliography" for examples)

DUE Sunday, \_\_\_\_\_

### Rubric

## Annotated Bibliography Grading Rubric

	<b>A</b>	<b>B</b>	<b>C</b>	<b>D</b>
<b>Technical requirements:</b> <ul style="list-style-type: none"> <li>• source number</li> <li>• source type</li> <li>• citations</li> </ul>	Meets all minimum requirements for the assignment.	Meets almost all minimum requirements for the assignment.	Meets most minimum requirements for the assignment.	Meets some of the minimum requirements for the assignment.
<b>Presentation:</b> <ul style="list-style-type: none"> <li>• spelling</li> <li>• grammar</li> <li>• sense of audience</li> <li>• impact</li> </ul>	The product* is well polished with no misspellings or grammatical errors. It indicates a good sense of audience and makes a significant impact.	The product is polished with few misspellings or grammatical errors. It shows a sense of audience in general and makes an impact.	The product is less polished, but any misspellings or grammatical errors do not detract from the overall meaning. It may lack a sense of audience in places and have minimal impact.	The product is not polished and has several misspellings or grammatical errors which may be confusing. There is no sense of audience or make very little impact.
<b>Content</b> <ul style="list-style-type: none"> <li>• addressing the assignment</li> <li>• assesses topic and its place in our chronology</li> <li>• appropriate terms</li> <li>• connections to historical context</li> <li>• explains impact on today's culture</li> <li>• overall quality</li> </ul>	Addresses the assignment in an excellent way, demonstrating a deep understanding of the topic. Uses appropriate terms correctly and makes insightful connections to other course material and themes. Overall impressive work.	Addresses the assignment well, shows a clear understanding of the topic. Uses appropriate terms correctly most of the time and makes connections to other course material or themes. Overall good work.	Addresses the assignment fairly well in general and shows an understanding of the topic for the most part. Attempts to use appropriate terms but shows some confusion about meaning or applicability. May not make deeper connections to other course material or themes. Overall satisfactory work.	Addresses the assignment in a general way but may be off-topic. Does not use terms correctly which may be confusing for the audience. Does not make any connections to other course material or themes. Overall unsatisfactory work.

NOTE: An "F" assignment (1) does not meet the minimum requirements, including length, source number and type, citations, or format **OR** (2) does not address the assignment **OR** (3) shows evidence of plagiarism.

## Film Project: Open Source World

### Description:

Beginning this week, you will be working on your last project (yay!) related to a documentary film on the topics of hacking, open source, and media. You will choose from the list of films below.

Your assignment is to **watch the film** and **create a digital presentation** covering an issue/idea/argument central to the film.

Your 5-8 minute presentation will be a **research-based analysis** of the case or event addressed in the film, **exploring the differing perspectives of those involved**. What is the motivation behind their actions? Consider what pro/con arguments arise and tie it back to the hacker ethics we have discussed. **What are the underlying social, political, economic and/or cultural factors shaping the situation? What is the significance of this case and its current ramifications?**

### Instructions:

- **Presentation must include audio narration and effective visuals.** ○ Use any presentation software of your choosing and do a screen recording of the presentation along with your voice narration. Consider a free screencast tool such as Screencast-o-matic. [www.screencastomatic.com](http://www.screencastomatic.com) or the [sound tool in PowerPoint](#) is pretty easy!
- **Voice narration should present a coherent description** of the case or event depicted in the film, **as well as the controversies surrounding it, including the social, political, economic and/or cultural factors shaping the situation, and the perspectives of the different people involved. You will conclude with the significance of the case and its impact on open source culture.**
- **The voice-over narration should complement the information on the slides** (Google Slides or PowerPoint or Prezi etc.) and reinforce what you are telling your audience. **DO NOT JUST READ THE SLIDES DIRECTLY.** Include well-chosen images and succinct bullet points of information that emphasize the most important points and then use your voice-over narration to elaborate in more detail.
- **Layout and Style:** A good guideline to follow is the 5x5 rule: no more than five lines per slide, with no more than five words per line. Take advantage of slide headings to guide your audience through the specific details of the narrative.
- **Clearly document ALL information** in the slides. Identify the author and/or publication of your sources through signal phrases and include in-text citations for sources of all information on EACH slide. Always put direct quotations in quotation marks (or provide an appropriate verbal cue in the narration), but keep direct quotes to a minimum.

Requirements:

- 5-8 minute video presentation
- Audio narration and visual elements
- Minimum of 5 sources with citations
- Works Cited slide

## Dedication

## Foreword

## Preface: Why You Should Care

Revision Notes for the Second Edition

### **1. A Brief History of Hackerdom**

Prologue: The Real Programmers

The Early Hackers

The Rise of Unix

The End of Elder Days

The Proprietary-Unix Era

The Early Free Unixes

The Great Web Explosion

### **2. The Cathedral and the Bazaar**

The Cathedral and the Bazaar

The Mail Must Get Through

The Importance of Having Users

Release Early, Release Often

How Many Eyeballs Tame Complexity

When Is a Rose Not a Rose?

Popclient becomes Fetchmail

Fetchmail Grows Up

A Few More Lessons from Fetchmail

Necessary Preconditions for the Bazaar Style

The Social Context of Open-Source Software

On Management and the Maginot Line

Epilog: Netscape Embraces the Bazaar

### **3. Homesteading the Noosphere**

An Introductory Contradiction

The Varieties of Hacker Ideology

Promiscuous Theory, Puritan Practice

Ownership and Open Source

Locke and Land Title

The Hacker Milieu as Gift Culture

The Joy of Hacking

The Many Faces of Reputation

Ownership Rights and Reputation Incentives  
The Problem of Ego  
The Value of Humility  
Global Implications of the Reputation-Game Model  
How Fine a Gift?  
Noospheric Property and the Ethology of Territory  
Causes of Conflict  
Project Structures and Ownership  
Conflict and Conflict Resolution  
Acculturation Mechanisms and the Link to Academia  
Gift Outcompetes Exchange  
Conclusion: From Custom to Customary Law  
Questions for Further Research

#### **4. The Magic Cauldron**

Indistinguishable From Magic  
Beyond Geeks Bearing Gifts  
The Manufacturing Delusion  
The “Information Wants to be Free” Myth  
The Inverse Commons  
Reasons for Closing Source  
Use-Value Funding Models  
    The Apache Case: Cost-Sharing  
    The Cisco Case: Risk-Spreading  
Why Sale Value is Problematic  
Indirect Sale-Value Models  
    Loss-Leader/Market Positioner  
    Widget Frosting  
    Give Away the Recipe, Open a Restaurant  
    Accessorizing  
    Free the Future, Sell the Present  
    Free the Software, Sell the Brand  
    Free the Software, Sell the Content  
When to be Open, When to be Closed  
    What Are the Payoffs?  
    How Do They Interact?  
    Doom: A Case Study

Knowing When to Let Go

Open Source as a Strategic Weapon

Cost-sharing as a competitive weapon

Resetting the competition

# THE DIGITAL DIVIDE REVISITED: WHAT IS NEXT?

STEPHANIE HUFFMAN  
*University of Central Arkansas*

As soon as the Internet came into existence and the World Wide Web was introduced to make Internet utilization much easier, leaders have been worried about the “digital divide.” The digital divide refers to the inequality of access to information services. There has been marked improvements over the last 20 years, however the poorest people, who would benefit the most from Internet and computer access, are often the least likely to have it. In addition, even if access is available, knowledge of appropriate use is alarming low. The new “digital divide” is not just about access but focus on how to use the Internet and computer technology efficiently and effectively.

Keywords: Digital Divide, Internet, Bring Your Own Device (BYOD), and New Digital Divide Support Structure Model (NDDSS)

The digital divide refers to the gap between those who have access to technology and those who do not. As stated by Morley in 2013, the “haves” and the “have nots.” It also refers to the differences between individuals within a particular country, as well as to the differences between countries. When looking at differences within a country the use of computers and/or technology based on age, race, education, and income are addressed. The term digital divide was first coined in the mid-1990’s by then President Bill Clinton. In the five years between 1991 and 1996, the U.S. went from 300,000 personal computers to over 10 million (Cohen, 2013).

Since that time, the nature and scope of the digital divide has changed. When first defined, the digital divide primarily focused on access to technology. Access is no longer enough. Just as technology and the demands for it and the vast changes in the use have broadened, so has the digital divide. Implementing technology in schools is a good starting point, but the

digital divide will not actually close until citizens have access to technology at home and understand how to use it appropriately. Therefore, our priorities must also adjust and shift from simple access to include comprehensive training on the use of technology, the pitfalls and dangers, and the ramifications of such use. Otherwise, we are doing our students and citizens a disservice and leaving them vulnerable to predators and their own ignorance.

## **Benefits of Technology**

Why is it so important to modify our definition of the digital divide as well as shift our priorities in relation to the goals established by the definition? Because technology offers access not only to educational tools, but also information resources. In the Field of Education, access to technology can help in the basic skills of writing papers, completing homework, doing research, providing assistance to those who need accommodations, helping English as a Second Language students increase

The background of the cover is an aerial photograph of a coastal city, likely Miami, showing a mix of residential neighborhoods, high-rise buildings, and a beach. A black drone with two propellers is flying in the upper half of the image against a blue sky. The cover features several overlapping geometric shapes: a red trapezoid in the top left, a dark blue trapezoid containing the main title, a green trapezoid containing the subtitle, and a light green trapezoid at the bottom containing the editors' names.
