Rationale and Objectives

The humanities disciplines are concerned with questions of human existence and meaning, the nature of thinking and knowing, with moral and aesthetic experience. The humanities develop values of all kinds by making the human mind more supple, critical, and expansive. They are concerned with the study of the textual and artistic traditions of diverse cultures, including traditions in literature, philosophy, religion, ethics, history, and aesthetics. In sum, these disciplines explore the range of human thought and its application to the past and present human environment. They deepen awareness of the diversity of the human heritage and its traditions and histories and they may also promote the application of this knowledge to contemporary societies.

The study of the arts and design, like the humanities, deepens the student’s awareness of the diversity of human societies and cultures. The arts have as their primary purpose the creation and study of objects, installations, performances and other means of expressing or conveying aesthetic concepts and ideas. Design study concerns itself with material objects, images and spaces, their historical development, and their significance in society and culture. Disciplines in the arts and design employ modes of thought and communication that are often nonverbal, which means that courses in these areas tend to focus on objects, images, and structures and/or on the practical techniques and historical development of artistic and design traditions. The past and present accomplishments of artists and designers help form the student’s ability to perceive aesthetic qualities of art work and design.

The Humanities, Arts and Design are an important part of the General Studies Program, for they provide an opportunity for students to study intellectual and imaginative traditions and to observe and/or learn the production of art work and design. The knowledge acquired in courses fulfilling the Humanities, Arts and Design requirement may encourage students to investigate their own personal philosophies or beliefs and to understand better their own social experience. In sum, the Humanities, Arts and Design core area enables students to broaden and deepen their consideration of the variety of human experience.

<td>The primary source material for this course are texts and films by African writers and artists, which are interpreted in order to gain a better understanding of the cultural and social implications of science and technology. The course material inherently addresses the ways in which aesthetic and epistemic traditions have been formulated in diverse African cultural contexts.</td>
<td>By reading African literary and cinematic texts in order to understand science and technology from endogenous African perspectives, this course leads students to a better understanding of the particular aesthetic sensibilities of African cultural productions. Students will analyze films and texts for both their forms and contents. This information is expressed in the syllabus in the following Learning Outcomes: Knowledge #3; Skills #3, as well as in the heavy concentration of Literary, Cinematic, and Theoretical works by African intellectuals and artists. <td>Reading African cinema and literature involves gaining an understanding of the underlying cultural codes and value systems that find their aesthetic expression in various literary and cinematic techniques. Through interpreting artistic works for their embedded social critiques, this course requires students to engage with the intrinsically African value systems that are encoded in the works themselves.</td>
<td>In this course, engaging with cinematic and the literary productions from Africa introduces students to the particularities of African epistemologies and values by inviting interpretation of the works in their societal contexts. Students will therefore engage with the African literary and cinematic works and how they engage with and differ from European aesthetic traditions. **African Sci-fi** (Session C) T/Th 1:30-2:45

Professor: Isaac Joslin  
Office: DH 302F  
Email: ijoslin@asu.edu  
Office Hours: Zoom: [https://asu.zoom.us/j/9036089989](https://asu.zoom.us/j/9036089989).

**Course Description:**

Through a survey of European and African science-fiction literature and film from the late nineteenth to early twenty-first century, students in this course will engage concepts of futurity, imagination, and technology from different historical and geographical perspectives. Through discussion and analysis of films and texts, students will identify key ideas in science-fiction that reflect diverse societal values and goals of scientific discourses in societal contexts.

**General Studies Designations:**

This course meets the General Studies Designations requirements for G (Global Awareness), HU (Humanities, Arts, and Design), and Science and Society.

**Learning Objectives:**

**Knowledge**

1. Demonstrate a clear understanding of the geographies, histories, and cultures of the African continent and diaspora.
2. Identify key issues in science-fiction and how these reflect societal aspirations and imaginaries.
3. Analyze different perspectives related to knowledge production, science, and futurity. (2)

**Skills**

1. Identify appropriate questions and theoretical approaches related to literary and filmic analyses of science-fiction.
2. Demonstrate depth and rigor in analytical thought with respect to different source material.
3. Articulate thoughtful and responsible arguments regarding the cultural contingencies of science-fiction discourses. (2)

**Required Texts:**

All additional texts will be made available through the library’s e-reserves and/or disseminated on Canvas.

**Student Expectations**

**Activities, Prompts and Questions.** Students may be asked to respond to specific Discussion Questions posted on Canvas that examine fundamental themes for individual works and allow for thoughtful preparation for in-class discussions and collaborative activities. Students may be asked to prepare an Informal Reflection on their reaction to or understanding of a particular work. Students may be asked to prepare a Reading Summary or simply present their Reading Notes on a given work. These activities are designed to help orient students toward identifying the kinds of critical questions that are appropriate for further discussion and intellectual analysis.

**Three Short Papers.** The course is divided into four sections, each of which focuses on a specific theme related to science-fiction. For each section, students will read critical texts in conjunction with primary sources, which may include fictional texts, films, documentaries, digital sources, images, or other representational forms related to each topic. For each section, students will respond to discussion posts and engage in group activities that will help them to build the resources for a short paper (2-3 pages). In so doing, students will learn how to 1) analyze and synthesize information, 2) format a bibliography and cite source material in their writing, 3) formulate a thesis based on their findings and 4) make a coherent, logical and convincing argument.

**Final Project.** Students will create a Final Project that will consist of a culmination of their work over the semester, integrating their discussion posts, group activities, and short papers into a coherent final project that incorporates course material while also expanding the scope of inquiry beyond the course.

**Grades.**

Attendance and Participation: 10%

**Course Policies**

**Late or Missed Assignments**

The due dates for all assignments are marked on the syllabus. Unless you have a serious excuse, such as a medical issue or a personal/family emergency, late submissions of all
assignments will be penalized by 3% for every 24 hours past the deadline. This rule does not apply for peer-review commentaries and group assignments in case your collaborator was late. Please get in touch with your professor, whenever you need to request an accommodation.

Submitting Assignments

All online assignments MUST be submitted via the associated assignment submission feature in Canvas. Do NOT submit an assignment via email.

Grading Procedure

We will aim to grade and provide feedback on all assignments within one week of submission. You will be able to see instructors’ comments on the margins of your papers on Canvas.

Grade Appeals

Grade disputes must first be addressed by discussing the situation with the instructor. If the dispute is not resolved with the instructor, the student may appeal to the department chair per the University Policy for Student Appeal Procedures on Grades (Links to an external site.).

Absences

Students must attend lectures and recitation sections for the course and complete the online activities and assignments. You are entitled to one unexcused absence per semester. Besides that, unless you have a serious excuse, such as a medical issue or a family emergency, each absence will lower your overall attendance grade by 2%.

Students that need to be absent from class or are unable to follow along with the scheduled online modules due to religious observances (ACD 304–04 (Links to an external site.): Accommodations for Religious Practices) or due to participation in university-sanctioned activities (ACD 304–02 (Links to an external site.): Missed Classes Due to University-Sanctioned Activities) should notify the instructor at the beginning of the semester about the need to be absent from class and make arrangements to make up missed assignments and in-class work.

Communication

Your Canvas Email/Messages is an official means of communication among students, faculty, and staff. Students are expected to read and act upon messages in a timely fashion. Students bear the responsibility of missed messages and should check their ASU-assigned email regularly. All instructor correspondence will be sent to your ASU email account.
