Training and Workshops

Requirements

Each compliance area has training resources and several areas have mandatory training requirements. If you have questions about required training, please contact ORIA at 965-4796 for assistance.

Online training (click training topic on right menu)

Online training allows the participant to train at their own pace. Most online modules can be completed at one sitting or over a number of sessions. Training modules often have case studies to enhance your learning experience.

Workshops and presentations

Workshops and presentations are offered by ORIA, researchers, and faculty from a variety of departments. Each workshop or presentation is topic driven, relevant to the audience needs, and engages audience participation.
