

Map and Geospatial Hub

Mission

The ASU Library Map and Geospatial Hub advances the use of geographically-referenced information by expanding access to and support for cartographic resources and geospatial technologies across the ASU community and beyond.

Select from the options below or keep reading to learn more.

About

We work in three core areas: resources, education, collaboration.

Resources

We're a center for maps, imagery, geospatial data, and the related software and hardware tools that can be used to bring them to life as powerful, value-added information.

Education

We design fun, engaging programming to teach the community how to integrate map interpretation, spatial analysis, data management, and geovisualization into their research and learning goals.

Collaboration

We draw upon our ever-expanding technical expertise and a collaborative professional network to support transdisciplinary research projects across the university and beyond.

Have questions about geospatial technology, maps, or how we can work together?
