- Emeritus Faculty Fellowship

### How PFX Got Started

Stemming from the nationally recognized Preparing Future Faculty (1993) (PFF), and the more recently developed Preparing Future Scholars (2013) (PFS) professional development programs, PFX (2017) provides doctoral students, MFA students, and postdocs with an overview of the requirements, career development skills, and plan stratagems necessary for a competitive career.

Preparing Future Faculty and Scholars (PFx) is a two-semester course that will introduce you to the many ways of mobilizing knowledge for multiple audiences as you explore diverse career pathways. You will learn about the various roles of faculty members (research/scholarship/creative activity, teaching, service) as well as administrators, entrepreneurs, and leaders in industry, government, and other non-profit sectors. PFX will help you gain multiple perspectives and develop the skills needed for a successful career inside and outside of academia.

PFx supports an environment in which the diversity and variety of human experience are welcomed and valued. The program, staff, and administrators recognize that race/ethnicity and gender are historically markers of diversity in institutions of higher education, and also further recognize that diversity includes socioeconomic background, religion, sexual orientation, gender identity, age, disability, veteran status, nationality and intellectual perspective. PFX supports an environment in which the diversity and variety of human experiences are welcomed and valued. As PFX reflects and represents the makeup of our regional and national populations, we acknowledge and appreciate the unique history of each student and are committed to meeting the needs and providing a safe and welcoming atmosphere sensitive to all students.

PFx is a two-semester course (fall and spring), one credit hour per semester. Course enrollment approval is competitive and requires approval of the student's advisor (supervisor for postdocs) and the Graduate College. For more information, review the Q & A, or email us at [gradinfo@asu.edu](mailto:gradinfo@asu.edu).
