Reports

Survey Consultations

The UOEEE research and evaluation team designs and conducts original survey research projects for administrative planning, decision making, policy development, accreditation, and official reporting. Listed below are survey names of the annual survey research projects we conduct.

The research and evaluation team provides survey consultation to academic and administrative units. UOEEE also accepts requests for customized analyses of our survey data or ad hoc projects to meet college and departmental needs. If you have such a request please contact Dr. Gerald Blankson at 480-965-9291 or gerald.blankson@asu.edu.

Survey results are used for official reporting to the Arizona Board of Regents, Arizona State Legislature, the Higher Learning Commission, and other organizations. In addition, results are used internally to improve ASU programs, processes and policies.

For official enrollment data, please visit the Office of Institutional Analysis.
