Educational Outreach and Student Services has two overarching goals: to provide timely and responsive service to students and to create an optimum environment for learning.

Three operating principles inform routine decision making and guide daily interaction with students.

**Achievement:** Academic success and personal growth for each student.

**Engagement:** Intentional and meaningful opportunities for student engagement, involvement and participation in the broader university community.

**Responsibility:** Structured opportunities for values driven decision-making and experiences that reinforce self-discipline and a developed sense of civic responsibility.

Key learning outcomes that support the core objectives are:

- Students will excel and succeed academically.
- Students will experience and understand the intersection of academic and co-curricular life through the residential college model.
- Students will access support systems to enhance their individual success.
- Students will be involved with faculty outside of the classroom environment (undergraduate research, service learning).
- Students will apply their education and co-curricular experience in professional settings and experiences (internships, co-ops).
- Students will be engaged, educated, and empowered to influence their lifelong career development and professional ambitions.
- Students take responsibility for their own success and contribute to the success of others.
- Students will be involved in civic engagement and community based experiences.
- Students will participate in the intellectual life of the university (lectures, debates, competitions).
