STAR (Strategic Tracking, Analysis and Reporting)

The Strategic Tracking Analysis and Reporting (STAR) system centralizes data for budget and reporting, and provides an infrastructure for the budget process. Users can utilize its powerful "slice and dice" capability to generate management and ad-hoc reports for analysis and day-to-day reporting. Budget Planning and Consolidation (BPC) for Excel is developed by SAP and is the underlying technology for STAR.

STAR has the look and feel of MS Excel, but contains live financial summary and budget data in four models (data sets):

- Financial, Transfers, Salary, and Planning to suit various reporting and budgeting needs
- STAR financial data is updated daily through feeds from the ASU data warehouse
- Quarterly forecasts and budget data are input by end users throughout the year; and
- During ASU's budget input cycle each Spring as announced by the Office of Planning and Budget (OPB).

Questions can be directed to STAR Administrators (Susan Wynn and Tod Kemper) through [email](#) or at 480-727-0669.

Existing user | **Request access** | **STAR training schedule**

For existing users, documentation and instruction is available on the STAR_Budget_System Blackboard course which can be accessed with the link below.

[STAR Blackboard site](#)

Note: We are now on version EPM10 of STAR and are no longer using the old 7.5 version that used to connect via Citrix. The new EPM10 requires the EPM add-in software on the user's workstation. Step-by-step instructions are available in the EPM10 Training --> Getting Started section of the STAR_Budget_System Blackboard Course.

Additional budget process documentation is available on the [budget development resources](#) section of this website.
