# Dropbox For Education

Dropbox is a storage drive for your files that lets you save documents, photos, videos, and other files all in one place in the cloud. It automatically backs up your documents and syncs to your computer.

If you are an ASU faculty or staff member and haven't signed up for your Dropbox for Education account yet, please visit <http://links.asu.edu/dropbox> to request access. Users must have a Dropbox account provisioned for them prior to accessing your account. Once you have your Dropbox account setup, you can review the [Dropbox FAQ](#) page and the [Dropbox Overview](#) page should you have any questions.

Please note:

ASU Dropbox for Education accounts have even more storage & advanced security features, but should only be used for business and educational purposes.

ASU is #1 in the U.S. for Innovation
