

Want to find a major, program or career that fits you?

With this online interactive tool, you can easily explore careers that fit your interests and passions. Then chart an academic pathway to find a major, a program and a career to design the future you want.

Take the me3 quiz today to get started.

I am currently a:

High School Student

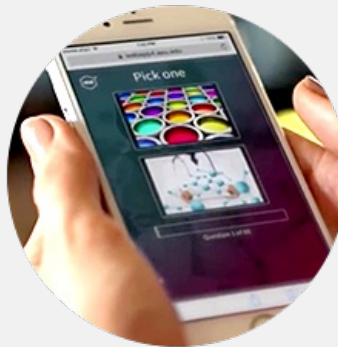

College Student

Educator

Take the visual quiz

Start out by choosing images based on your interests. It's quick and easy.

Rank matching careers

Your interests will match with a list of career options that you can rank in order of preference

Connect to a major

Then me3 will give you a list of majors that could lead you to that career.

Your personalized dashboard

If you are in high school, me3 can show you how you can get to your career goal with an interactive dashboard. You can chart out your academic path, find out what you need to do to get accepted into your chosen major and keep track of your milestones.

"I am very passionate about my major, taking this assessment reassured me that I am on the right career path. I was skeptical at first whether me3 would work, but when it gave me a list with my major along with other majors I'm interested in, I realized this was a very useful tool for people who are undecided about what major they want to study."

Christian Monzon, Aerospace Engineering

It's an easy way to compare careers

me3 also gives you an easy way to narrow down career options to those that fit your interests and then compare the differences in careers including average salary and career outlook. It's like getting a peek into the future.

Pharmacist

Dispense drugs prescribed by physicians and other health practitioners and provide information to patients about medications and their use. May advise physicians and other health practitioners on the selection, dosage, interactions, and side effects of medications.

National Average Hourly Wage: **\$58.15** ↑

Arizona Average Hourly Wage: **\$60.08** ↑

Jobs Available: **78,400** ↑

Wondering how it works?

me3 is designed from research and a Euclidean distance matching algorithm. Basically, as you make choices in the visual quiz, me3 is calculating your RIASEC score which represents your levels of interest in data, things, people, and ideas. Then me3 compares your scores to those of more than 500 careers based on data provided by the U.S. Department of Labor. The results you see are the careers with scores that are most similar to your individual results.

The RIASEC model has been studied for almost 60 years and has more empirical support than any other career theory. A match between one's interest code and related careers has been linked to greater career stability and job satisfaction. Who doesn't want that?
